# AtCom Presents

## Electronic Enclosures

OFF THE SHELF  
from

# SERPAC™

Serpac's award winning designs will sell your product, whether it's a modem, a beeper, test equipment, or any other type of electronic device. Remember, when the sale of your product is on the line, its outside appearance is a key selling factor.

# Hearst Engineering Software | ICMASD

## Alternate Source Directory

The all new 1993 ICMASD-IC Alternate Source Directory on Disk is identical to the Alternate Source Directory Section contained in Volume Two of the printed version of the 1993 IC Master. All you need is an IBM XT/AT or 100% compatible personal computer with hard drive.

ICMASD is the most comprehensive and reliable guide available to all ICs known to have a realistic replacement or alternative. The 1993 version contains over 106,000 listings to help you find the functional equivalents for both current and discontinued parts.

The electronic ICMASD is fast, convenient...and can be customized for your specific needs!

### ENHANCED FLEXIBILITY

ICMASD is organized in a similar fashion to the printed version in the IC MASTER. The database is arranged by manufacturer, showing the manufacturer's original basic part number. All known replacements for that part are listed in alphanumeric order.

The enhanced flexibility of the electronic ICMASD allows you to add comments, up to 19 digits long, to any device listing in the system. These comments can be part numbers, project notes, prices, or any information unique to your application.

### USER FRIENDLY

ICMASD is very user friendly. There are no tricky commands to learn. The software is completely menu driven. ICMASD comes complete with documentation that is brief and to the point. It can be ordered on five 5 1/4" double-sided, double-density disks OR on one 5 1/4" high-density disk OR on one 3 1/2" high-density disk.

*Published annually in March*

### FAST AND CONVENIENT

ICMASD includes a complete Manufacturers & Distributors Directory listing the addresses and phone numbers of every manufacturer in the IC industry. With this complete directory any manufacturer or distributor is just a phone call away.

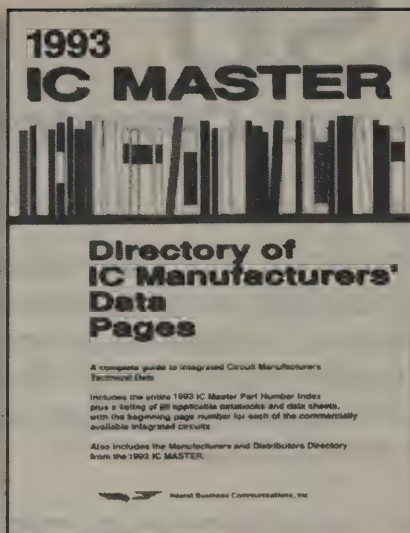

**To order your 1993 ICMASD,**  
contact your local IC MASTER distributor or,  
send your purchase order and check for  
\$179.50 plus tax\* to:

**Marie Botta**  
**Hearst Business Publishing**  
645 Stewart Avenue  
Garden City, NY 11530  
(516) 227-1300 • FAX (516) 227-1901

\*Please add sales tax in NY, MA, IL,  
CA, or GST tax in Canada  
For delivery outside the USA, please  
add \$20 per ICMASD.

# THE FAST AND EASY WAY TO FIND IC MANUFACTURERS' DATA BOOKS!

The 1993 **DIRECTORY OF IC MANUFACTURERS' DATA PAGES** is a unique index designed to save you time and help you find the manufacturers' precise data book or sheet that you need on any integrated circuit listed in the 1993 IC Master.

Simply look up any IC by base number. The cross-reference will show you the manufacturer's complete device number together with the name and issue date of the applicable manufacturers' data book.

For example: If you wanted the complete manufacturers' data on device number ADOP07. Look up base number 07. Following the base number is the manufacturer's name...Analog Devices, the complete device number ADOP07 and the page number of where the device is described in the IC Master. The listing will then show you that the manufacturer's data book is Analog Devices "Linear Products DataBook".

Now you can contact Analog Devices by phone or FAX and request the EXACT data book you need. No wasted words, no wasted time.

Plus, where and whom to call for technical information, at any IC manufacturer, is at your fingertips in the complete Manufacturers & Distributors Directory.

A guaranteed time saver, this unique directory is a must for every engineering department!

Don't waste another precious engineering minute.

**ORDER THE 1993 DIRECTORY OF IC MANUFACTURERS' DATA PAGES...TODAY!**

**To order your 1993 Directory of IC Manufacturers' Data Pages,**

**Contact your local IC MASTER distributor or,  
send your purchase order and check for \$84.50 plus tax\* to:**

# 1993 IC MASTER CD-ROM PLUS

3 reference sources on a single compact disk! CD-ROM PLUS is fast, easy to use and very user friendly. It combines all of the Master Selection Guides and all of the Indexes from the printed IC Master with hundreds of additional manufacturers data sheets. CD-ROM PLUS also includes the entire Directory of IC Manufacturers' Data Pages plus a powerful Inquiry Generation and Tracking System.

- You can find the exact IC you need in seconds...
- Compare specs on your screen...
- Print the search results directly to your computer or printer!

## PLUS...

- You can access over 1,100 manufacturer's data sheets and send them to your laser printer.

Published annually in the Spring

CD-ROM PLUS runs on any ISO9660 CD-ROM reader and any IBM AT or better PC (or 100% compatible).

No complex software involved. Start your reader and play CD-ROM PLUS. Once you experience the simplicity and speed of CD-ROM PLUS, you'll never work without it again!

## JOIN THE CD-ROM BANDWAGON.

*a* Delivered capacity when discharged at normal temperatures (20°C) at normal discharge rates.

*b* Based on fuel consumption only.

*c* Weight of air not considered in computation of watt hours.

*d* Water-activated

*e* Automatically activated; high rate discharge; 2- to 10-min rate.

*f* Fused salt; heat-activated; high rate discharge; 2- to 10-min rate.

*g* Four-minute discharge rate.

*h*  $\beta$ -alumina electrolyte, 300°C operation.

*i* Fused salt; 350°C operation.

*j* Solid RbAg<sub>4</sub>I<sub>5</sub> electrolyte.

*k* Several different cathode materials used.

*l* Fuel consumption is based on source of H<sub>2</sub>.

*m* Based on methanol battery-fuel supply in situ.

## MINIGLOSSARY CAPACITORS

**Anode:** One of two plates or conductors. In polarized capacitors, the anode should be connected to the positive conductor in the circuit.

**Capacitive Reactance:** The opposition (in ohms) of capacitance to the flow of alternating current, equal to the reciprocal of the product of the angular frequency ( $2\pi$  times frequency in Hertz) of the current times the capacitance in farads.

**Cathode:** One of two plates or conductors. In electrostatic capacitors the cathode is metallic. In electrolytic capacitors the cathode is a liquid, gel or other conductive material which is in intimate contact with a metallic cathodic connection.

**Dielectric Constant:** The ratio of the capacitance of a capacitor with some material other than air between the capacitor plates to the capacitance of the same capacitor with air between the plates. For example, the dielectric constants of air, Teflon®, polystyrene and ruby mica are 1, 2.1, 2.6 and 5.4, respectively.

**Electrolytic:** A capacitor with one metallic conductor (generally the anode) and with a liquid or semiconductor cathode. Nonpolarized electrolytic capacitors generally have two equal anodes as well as the liquid cathode. These anodes operate alternately as anode and cathodic connection as alternating current is applied.

**Electrostatic:** One of two general classes of capacitors in which two or more discrete metallic conductors are present and separated by an insulating dielectric material. Examples include: mica, ceramic, film, and paper types.

**Farad:** The basic unit of measure in capacitors. A capacitor charged to one volt with a charge of one coulomb (one ampere flowing for one second) has a capacitance of one farad. Capacitors are generally rated at portions of a farad (microfarads or picofarads).

1 farad (F) = 1,000,000 microfarads ( $\mu$ F) 1 microfarad ( $\mu$ F) = 1,000,000 picofarads (pF)

**Impedance:** All capacitors exhibit impedance. It is a function of capacitor type and internal construction. This can be particularly important in certain applications such as filters for switching power supplies. Capacitors used in these applications often have special multiple tab construction to shorten current paths and to reduce internal resistance.

**Leakage Current:** Expressed as dcl for electrolytic capacitors, a measure of the intrinsic losses in a charged capacitor. Generally speaking, the lower the dcl, the higher quality the capacitor.

**Power Factor:** A measure of the overall efficiency of a capacitor. Power factor ratings take all internal losses into consideration in a complex formula. This parameter of certain capacitors is often very important in AC applications such as motor-start and/or motor-run capacitors

**Rated Voltage:** The rated working voltage of a capacitor. Generally expressed in DC Volts (Vdcw). This is the voltage at which a capacitor may be safely operated at 25°C continuously within its overall parameters.

**Ripple Current:** The total amount of alternating and direct current that may be applied to an

electrolytic capacitor under stated conditions. In general, the higher the ripple current applied, the shorter the operating life of the capacitor will be. Application of significantly higher than rated ripple currents can shorten the capacitor life dramatically and may even cause catastrophic failure (explosion).

**Surge Voltage:** The momentary surge voltage which may be applied for a stated length of time without doing permanent damage to the unit.

**Temperature:** Capacitors are generally rated at 25°C at sea level under specific humidity conditions. Operating temperature ranges are also given, along with derating (reliability) curves for operation at temperatures other than 25°C.

**Temperature Coefficient:** Expressed as TC in ppm (parts per million) or in percent (%) from the norm of 25°C. This is seldom a straight line and may vary widely for certain types. Most capacitors have positive TC in that the capacitance increases as temperature increases. Some types, however, have negative TC in that the capacitance decreases as temperature increases.

# MINIGLOSSARY

## BASIC CAPACITOR FORMULAS

### I. Capacitance (farads)

$$\text{English: } C = \frac{.224 \text{ K A}}{t_D}$$

$$\text{Metric: } C = \frac{.0884 \text{ K A}}{t_D}$$

### II. Energy stored in capacitors (Joules, watt-sec)

$$E = \frac{1}{2} CV^2$$

### III. Linear charge of a capacitor (Amperes)

$$I = C \frac{dV}{dt}$$

### IV. Total Impedance of a capacitor (ohms)

$$Z = \sqrt{R_s^2 + (X_c - X_L)^2}$$

Where  $R_s$  = ESR

### V. Capacitive Reactance (ohms)

$$X_c = \frac{1}{2 \pi f C}$$

### VI. Inductive Reactance (ohms)

$$X_L = 2 \pi f L$$

### VII. Phase Angles:

Ideal Capacitors: Current leads voltage  $90^\circ$

Ideal Inductors: Current lags voltage  $90^\circ$

Ideal Resistors: Current in phase with voltage

### VIII. Dissipation Factor

$$DF = \tan \delta \text{ (loss angle)} = \frac{ESR}{X_c} = \frac{ESR}{(2 \pi f C) (ESR)}$$

### IX. Power Factor

PF =  $\sin \delta$  (loss angle) =  $\cos \phi$  (phase angle)

PF = DF (when less than 10%)

### X. Quality Factor (dimensionless)

$$Q = \cotan \delta \text{ (loss angle)} = \frac{1}{DF}$$

### XI. Equivalent Series Resistance (ohms)

$$ESR = (DF) (X_c) = (DF) \left( \frac{1}{2 \pi f C} \right)$$

### XII. Power Loss (watts)

$$\text{Power loss} = (2 \pi f C V^2) (DF)$$

### XIII. KVA (Kilowatts)

$$KVA = 2 \pi f C V^2 \times 10^{-3}$$

### XIV. Temperature Characteristic (ppm/ $^\circ\text{C}$ )

$$TC = \frac{C_t - C_{25}}{C_{25} (T_t - 25)} \times 10^6$$

### XV. Cap Drift (%)

$$C.D. = \frac{C_1 - C_2}{C_1} \times 100$$

### XVI. Reliability of Ceramic Capacitors

$$\frac{L_o}{L_t} = \left( \frac{V_t}{V_o} \right)^x \left( \frac{T_t}{T_o} \right)^y$$

### XVII. Capacitors in Series (current the same)

$$\text{Any number: } \frac{1}{C_T} = \frac{1}{C_1} + \frac{1}{C_2} + \dots + \frac{1}{C_N}$$

$$\text{Two: } C_T = \frac{C_1 C_2}{C_1 + C_2}$$

### XVIII. Capacitors in Parallel (voltage the same)

$$C_T = C_1 + C_2 + \dots + C_N$$

### XIX. Aging Rate

$$A.R. = \% \Delta C / \text{decade of time}$$

### XX. Decibels

$$db = 20 \log \frac{V_1}{V_2}$$

### Metric prefixes:

|       |              |
|-------|--------------|
| Pico  | X $10^{-12}$ |
| Nano  | X $10^{-9}$  |
| Micro | X $10^{-6}$  |
| Milli | X $10^{-3}$  |
| Deci  | X $10^{-1}$  |
| Deca  | X 10         |
| Kilo  | X $10^3$     |
| Mega  | X $10^6$     |
| Giga  | X $10^9$     |
| Tera  | X $10^{12}$  |

### Symbols:

|          |                             |
|----------|-----------------------------|
| K        | = Dielectric Constant       |
| A        | = Area of electrode overlap |
| $t_D$    | = Dielectric thickness      |
| V        | = Voltage (volts)           |
| t        | = time (hours)              |
| $R_s$    | = Series Resistance (ohms)  |
| f        | = frequency (Hertz)         |
| L        | = Inductance (henries)      |
| $\delta$ | = Loss angle                |

|        |                                              |
|--------|----------------------------------------------|
| $\phi$ | = Phase angle                                |
| x+y    | = Exponent effect of voltage and temperature |
| $L_o$  | = Operating life (hours)                     |
| $L_t$  | = Test life (hours)                          |
| $V_t$  | = Test voltage (volts)                       |
| $V_o$  | = Operating voltage (volts)                  |
| $T_t$  | = Test temperature ( $^\circ\text{C}$ )      |
| $T_o$  | = Operating temperature ( $^\circ\text{C}$ ) |

## MINIGLOSSARY CONNECTORS

Connector terminology is often quite confusing. This confusion starts with the very names of connectors. The name of a connector may derive from its shape, application, type of conductor or even method of termination.

**Shape**—Circular, cylindrical, and rectangular.

**Electrical application**—High voltage, RF, microwave, input/output, etc.

**Mechanical application**—Printed circuit, rack & panel, cable, etc.

**Conductor type**—Coaxial, flat cable, ribbon cable, flex circuit, etc.

**Termination method**—Wirewrap, soldercup, solderless, etc.

Hardware such as clamps, hoods, and adapters are frequently used to convert cable connectors to rack and panel types. This adds to the name confusion. A very common telephone connector, for example (the "C" type) got its name from the model number of the original maker.

**Contact:** The part(s) of the connector that actually provides circuit continuity between its two sections—the parts which are normally mated. The back end of the connector should properly be called the *termination*. This is the point where the wires or PC board is attached to the connector.

**Contact alignments:** Often called *contact float*. Describes the amount of allowable contact movement within the connector body. Permits self-alignment.

**Male vs. female:** In the U.S. this describes the contact construction. In Europe this term is more often used to describe the outer shell mating action which may be the reverse of the contacts.

**Closed entry:** A female contact which prevents entry of a male contact larger than a specific size.

**Open entry:** A female contact designed for a specific size of male contact but which will allow entry of larger male contacts by spring action.

**Hermaphrodite:** Contacts or connector bodies which are the same configuration. Male/female designations do not apply. Bodies usually have some mechanical means for maintaining polarity.

**Hermetic seal:** Glass-to-metal seals at terminations. Often used improperly to describe vacuum-tight seals.

**Waterproof seal:** May or may not be truly *waterproof*. May prevent easy entrance of casual water by means of a rubber or other boot.

**Printed circuit connector:** Connectors which are used in conjunction with printed circuit boards. There are two distinctly different styles.

**Edgeboard.** May be called *edge* or *card*. The printed circuit (PC) board edge enters the connector.

**Two-piece:** One part of the connecting pair is physically attached to the PC board itself. The other part is attached to something else such as a cable or a motherboard.

**Readout:** Describes the arrangement at the terminating edge of a PC board.

May be single or double. A double read-out PC board has termination strips on each side not usually interconnected.

**Ribbon connectors:** A type of connector which allows flat "ribbon" cable to be attached to a round or rectangular connector but also used interchangeably for flat connectors to flat cable.

**Ribbon contact connector:** Describes the contacts in a rectangular connector which have a self-wiping mating action. Not the same as ribbon connector.

**Solderless terminal:** Any style of termination which does not require solder for a permanent connection. See *crimp* and *insulation displacement*.

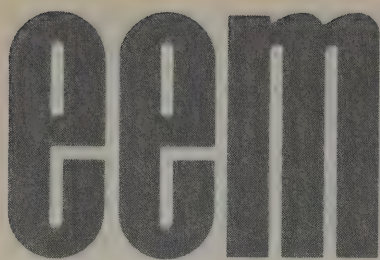

**Crimp termination:** A stripped wire is inserted into a barrel or trough which is then crimped to the conductor with a suitable tool.

**Insulation displacement:** Unstripped insulated wire is fitted into a channel containing metal teeth which are forced through the insulation to make contact with the conductor.

**Service rating:** The maximum rated voltage and/or current which may be applied continuously. May be called *working voltage*. Can be confused with the term used to describe how many times a connector may be mated and separated.

**Withstanding voltage:** Also called *test voltage*. The voltage a connector must withstand for one minute without breakdown. Applied between connectors and between connectors and shell and any grounding devices of the connector.

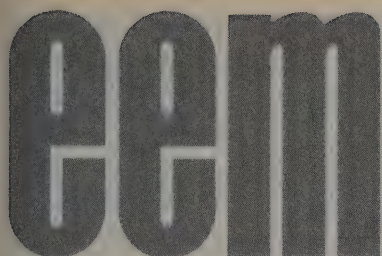

# MAXIMUM CURRENT CAPACITY— CONDUCTORS

## MINIGLOSSARY ENCAPSULATION

### MATERIALS/HANDLING

**Catalyst:** A substance which changes the *rate* of chemical reaction. Very small quantities can cause fast change.

**Conformal coating** Sprayed or dipped. A thin conformal jacket which protects an assembly from moisture or other degrading environments.

**Curing agent:** See catalyst.

**Hardener:** See catalyst.

**Hermetic:** A permanent gas-tight seal.

**RTV:** Room Temperature Vulcanizing. Associated with silicone rubber sealants which vulcanize at room temperature.

**Thermoplastic:** Plastic materials which can be made to flow *repeatedly* with the application of heat.

**Thermosetting:** Plastics which once cured cannot be made to flow again.

**Thixotropy:** The property of a coating compound which has low viscosity when agitated, but which thickens when the agitation ceases.

**Viscosity:** Measured in units of *poise* or *centipoise*. The property of a liquid which resists internal flow. Low viscosity equates with thin and vice-versa.

### PROCESSING

**Casting:** Parts or assemblies are placed in a mold. Encapsulating material is added and cured. Part is then removed from the mold.

**Dip coating:** Part or assembly is dipped into the encapsulating material. Final thickness is determined by number of dips, viscosity, rate of withdrawal, and temperature.

**Embedding:** Wherein an encapsulant substantially fills all voids in and about an assembly.

**Impregnation:** A process of encapsulation involving evacuating all air and then allowing the encapsulating material to flow in and fill all voids.

**Molding:** Similar to casting except this process usually implies multicavity molds and costly machines.

**Potting:** Wherein the part or assembly is immersed in an encapsulating material contained in a shell which becomes a permanent outer surface after curing.

### DIELECTRIC

**Arc resistance:** An encapsulant's resistance to the formation of a conductive path or track. Measured in time.

**Breakdown voltage:** The voltage at which an encapsulant fails electrically.

**Capacitance:** The property of conductors and dielectrics which allows the storage of an electrical charge when the voltage is applied.

**Corona:** A luminous discharge of electricity due to air ionization when a cer-

tain voltage is reached. Can be internal or external. The formation of ozone can cause rapid deterioration of certain materials.

**Dielectric:** Insulator (Nonconductor.)

**Dielectric constant:** The property of a material that determines its ability to store electrostatic energy.

**Dielectric strength:** The ratio of dielectric breakdown to the thickness of insulating material.

**Dissipation factor:** The ratio of a dielectric material's energy losses.

**Flashover:** Point at which an electric discharge occurs around an edge or across a surface. Can result in a carbon track and permanent degradation.

**Insulation resistance:** (IR) An insulating material's total DC leakage.

**Surface resistivity:** The resistance of the surface of an insulating material to the flow of direct current.

**Voltage endurance:** Sometimes called corona resistance. The ability of a material to withstand the application of sustained high voltage.

**Volume resistivity:** The resistance of a material to direct current flow as a measure of volume. Expressed as ohm-centimeters.

## MINIGLOSSARY

### OPTO SEMICONDUCTORS

**Avalanche Photodiode:** A photodiode that takes advantage of avalanche multiplication of photocurrent. It is particularly suited to low noise and/or high speed applications.

**Contrast:** A noticeable difference in color, brightness, or other characteristics in a side-by-side comparison.

**Chrominance Contrast:** The color contrast between two adjacent surfaces of identical area, shape, texture, and luminance. The human eye is more sensitive to differences in color than it is to differences in brightness.

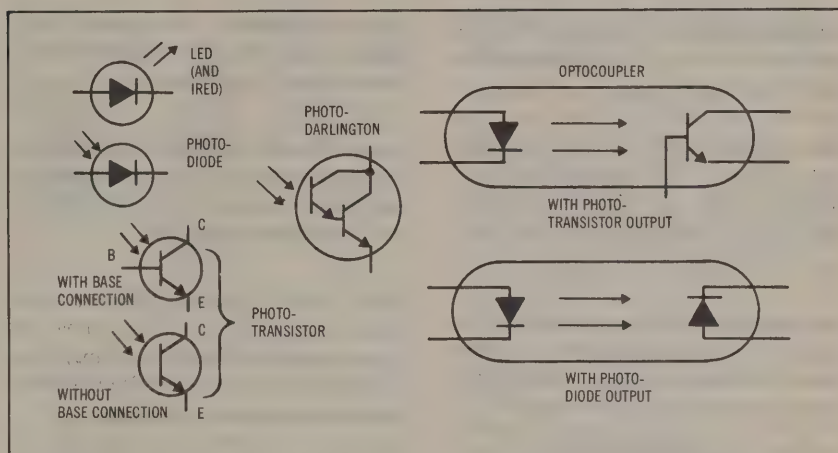

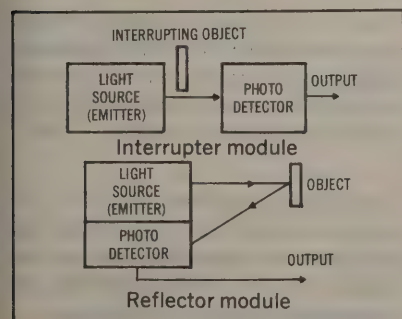

**Current Transfer Ratio:** The ratio of an optocoupler's output current to input current at a specified bias.

**Dark Current:** The leakage current of a photodetector with no incident light.

**Dominant Wavelength:** The wavelength that is a quantitative measure of apparent color of light as perceived by the human eye.

**Infrared Radiation:** The electromagnetic wavelength region between approximately 0.75 and 100 micrometers longer than the wavelength of visible light.

**Interrupter (module):** A device that produces an electrical output signal when an object breaks the light (visible or invisible) between a light source and a photodetector.

**IRED:** An infrared-emitting diode. See light-emitting diode.

**Light Current:** The current that flows through a photodetector when it is exposed to radiant energy.

**Light-Emitting Diode (LED):** A semiconductor diode that emits incoherent light at its PN junction when forward biased. The light can be in the visible or invisible (infrared) wavelength region.

**Luminance Contrast:** The observed brightness of a light-emitting element compared to the brightness of the "surround," an integral part of the device and inseparable from it.

**Optocoupler:** A device that transmits electrical signals, without electrical connection, between a light source (input) and the receiver (output). The input is generally an LED; the output might be a photodiode, phototransistor, a photo-Darlington, etc. Sometimes referred to as optoisolator.

**Peak Wavelength:** The wavelength at the peak of the radiated spectrum of an emitter.

**Photo-Darlington:** A light-sensitive Darlington-connected transistor pair. The photo-Darlington has a very high sensitivity to illumination or radiation.

**Photodetector:** A device that provides an electrical output signal when subjected to radiation in the visible, infrared, or ultraviolet regions of the electromagnetic spectrum. Photodiodes, phototransistors, and photo-Darlington are the most common type of photodetectors.

**Photodiode:** A junction diode that is responsive to radiant energy. Photodiodes have a high degree of linearity between the input radiation and the output current, and faster switching speeds than phototransistors.

**Photothyristor:** A thyristor whose switching action is controlled by light applied to the thyristor gate.

**Phototransistor:** A light-sensitive transistor that delivers an electrical output proportional to the light intensity at its input. The low-level photocurrent that is generated is amplified by the current gain of the transistor. The base region (or gate in a FET) may or may not be brought out as an external terminal.

**Point Source:** A source with a maximum dimension less than one-tenth the distance between sources and detector.

**Reflector (module):** A device containing a light source and a photodetector that detects any object that reflects light produced by the source back to the detector.

**Ambient reference:** Refers to the temperature of the still air surrounding the power supply.

**Case reference:** One of the specs that make up the nominal rating. The temperature of the case with the temperature of the surrounding still air at a stated temperature (usually 25°C).

**Crowbar circuit:** Protects the load. A protective circuit that applies a short circuit across the output immediately upon overload. (See overvoltage).

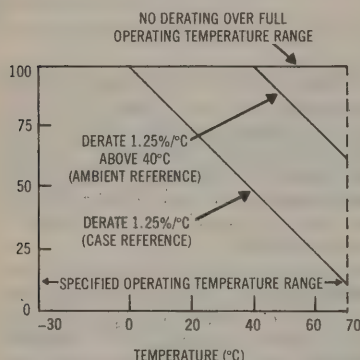

Fig. 1. Power output derating can be referred to ambient or case.

**Derating:** The degree output is reduced as temperature increases. Usually referenced to ambient case temperature and shown on a graph.

**Efficiency:** Ratio of the output power to the required input power. Usually expressed as a percentage given nominal environmental temperature.

**EMI/RFI:** Interference electronic circuitry caused by energy from electromagnetic or radio frequency power supplies.

**Foldback:** Built-in protective circuits that automatically reduce the output voltage and/or current to very low levels in the event of an overload.

**Holdover (Holdup):** The interval that rated output will continue after input ceases. Usually milliseconds.

**Input reflected current:** The peak-to-peak alternating current generated by switching transients in DC/DC converters. Should not exceed 1%.

**Inrush current limiting:** Built-in circuits that monitor high currents through the rectifiers to the capacitors at turn ON. Circuit is usually inhibited as capacitors attain full charge.

**Nominal rating:** The spec value of the supply at stated conditions of input, output, and temperature.

**Overshoot:** A transient voltage change occurring during turn ON or OFF or during an abrupt load change.

**Overvoltage (Overload) protection:** Built-in circuits that protect the load or the supply by shutting it down or providing foldback.

**Recovery:** The time interval between the termination of an overload and restoration to normal operations.

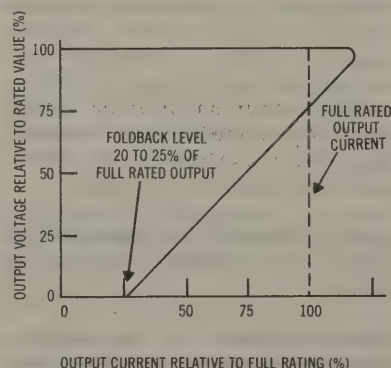

Fig. 2. Current foldback limiting self-resets with removal of fault.

**Response:** The time interval between a stated step change in input voltage or load current and return of output to normal operating conditions.

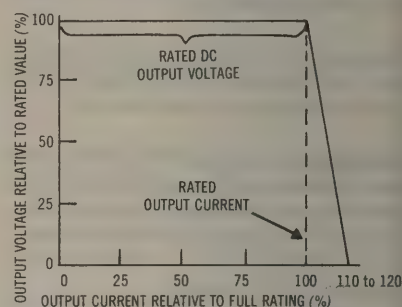

Fig. 3. Current limiting restrictions output current to a valve somewhat greater than full rated output; it resets when fault is removed.

**Sensing:** Regulation techniques that monitor output voltage and/or current. *Local sensing* refers to the output terminals. *Remote sensing* allows a feedback from the load circuit to the power supply.

**Soft start:** Allows the supply to start from zero current and/or voltage over a stated period of time during start up to prevent voltage overshoots and current imbalances.

**Switchers:** Power supplies using switching techniques to achieve high efficiency regulation. These techniques can have attendant EMI/RFI problems.

**Tracking:** The maintaining of fixed ratios between multiple outlets despite variations in line, load or temperature. Particularly important in supplies with symmetrical (+)(-) outputs.

**Transient protection:** Circuitry designed to protect the supply from high amplitude line transients. Generally expressed in terms of peak voltage and maximum transient time duration.

## MINIGLOSSARY ELECTROMECHANICAL RELAYS

### RELAYS

**Hybrid:** Isolated input and output either with a solid-state input and an electromechanical output or vice versa. Typically a reed switch is used to trigger a solid-state output or a solid-state amplifier is used to trigger an electromechanical relay.

**Differential:** Have multiple windings to function when voltage, current and/or power difference reaches a specific level or value.

**Close-differential:** The dropout value is specified close to the pickup value.

**Frequency sensitive:** Operates at a set frequency or within specific frequency bands. A resonant reed, for example.

**Hermetically sealed:** Totally sealed by glass-to-metal or metal-to-metal seals to ensure very low rates of gas leakage over long time periods.

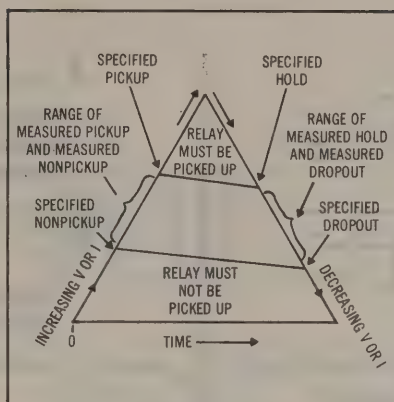

**Encapsulated:** Imbedded in a suitable potting compound.

**Sealed:** Enclosed in a relatively airtight cover. (Not the same as hermetically sealed.)

**Covered:** Unsealed metal or plastic enclosure or housing.

### CONTACTS

**Dry circuit:** contacts that carry current but do not open or close during ener-

gizing of the load circuit. Often wrongly used in reference to low level contacts.

**Low Level:** Contacts controlling relatively low voltages and low currents. Generally below 5 Vdc and 10mA.

### OPERATING CHARACTERISTICS

**Measured dropout:** The value at which all contacts restore to their unoperated position as current or voltage decreases.

**Specified dropout:** The value at or above which all contacts *must* restore to their unoperated position as voltage or current is decreased.

**Specified hold:** The value that *must* be reached before any contact change occurs as voltage or current is decreased on an operated relay.

**Specified nonpickup:** The value that *must* be reached before any contact change occurs as voltage or current decreases on an unoperated relay.

**Measured pickup:** The value at which all contacts function as voltage or current increases on an unoperated relay.

**Specified pickup:** The value at or below which all contacts *must* function as voltage or current increases on an unoperated relay.

**Sensitivity:** Specified pickup expressed in watts.

**Normal bridging:** The make-before-break action between adjacent contacts on relays designed for this purpose.

**Abnormal bridging:** The undesired closing of contacts caused by a metal bridge or protrusion developed by arcing.

**Magnetic freezing:** Sticking of the armature to the core as a result of residual magnetism.

### TIME

**Actuation:** The interval from coil energization or de-energization to the functioning of a specified contact.

**Initial actuation:** The interval from coil energization or de-energization to the *first* closing or opening of a previously open or closed contact.

**Final actuation:** Sum of initial actuation and bounce intervals following an actuation.

**Contact bounce:** The interval from close or opening of a contact to the end of the bounce of "chatter."

**Chatter:** See bounce.

**Operate:** Normally taken as the interval between energization and the opening or closing of the last contact to function not including bounce.

**Release:** Normally taken as the interval between de-energization and the opening or closing of the last contact to function excluding bounce.

**Transfer:** The interval between opening a closed contact and closing an open contact of a break-before-make relay.

## RESISTOR COLOR CODES

### EIA/MIL Resistor Color Codes

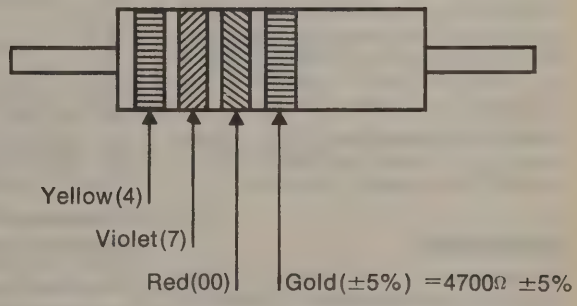

Color code for general-purpose industrial resistors

Color code for general-purpose wirewound resistors

| Color    | Significant digit | Multiplier | Tolerance |
|----------|-------------------|------------|-----------|
| Black    | 0                 | 1          | —         |
| Brown    | 1                 | 10         | ± 1%      |
| Red      | 2                 | 100        | ± 2%      |
| Orange   | 3                 | 1000       | ± 3%      |
| Yellow   | 4                 | 10,000     | ± 4%      |
| Green    | 5                 | 100,000    | —         |
| Blue     | 6                 | 1,000,000  | —         |
| Violet   | 7                 | 10,000,000 | —         |
| Gray     | 8                 | —          | —         |
| White    | 9                 | —          | —         |
| Gold     | —                 | 0.1        | ± 5%      |
| Silver   | —                 | 0.01       | ± 10%     |
| No color | —                 | —          | ± 20%     |

Example:

#### SPECIFICATIONS

**Excitation:** The input voltage and frequency.

**Transformation Ratio:** The ratio of the output voltage, at maximum coupling, to the input voltage.

**Phase Shift:** The lead or lag of the output voltage with respect to the input voltage. For most synchros and resolvers, the phase shift can be approximated by the angle whose tangent is the ratio of the primary winding's DC resistance to its reactive component.

**Impedance:** Specified as  $R + jX$ , where  $R$  is the AC resistive component and  $X$  is the reactive component. Important impedances are: (a)  $Z_{po}$  (or  $Z_{ro}$  for rotor primary units), which is the impedance of the primary winding with the secondary open; (b)  $Z_{so}$ , which is the impedance of the secondary winding with the primary open; and (c)  $Z_{sn}$ , which is the impedance of the secondary with the primary shorted (essentially when driven by a low impedance).

**Null Voltage:** The voltage remaining when the unit is at electrical zero or in the minimum coupling position.

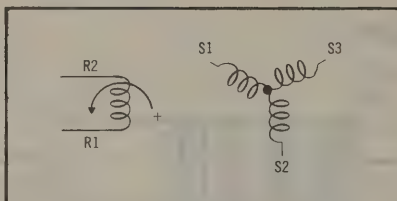

**Accuracy:** The error of the position of the rotor with respect to the electrical angle. It is defined as the output voltage driven by the "speed" (pole pairs) of the unit, referenced to the starting point of the calibration (usually the electrical zero position). Error is commonly expressed in minutes of arc (1/60 of a degree) or in seconds of arc.

**Loads:** For a transmitting unit, the impedance that the output voltage signal faces. This can be a receiver, a differential with its load, a control transformer, an A/D converter, etc.

**Operation Temperature:** The ambient temperature range over which the unit performs its primary function.

#### FUNCTIONS

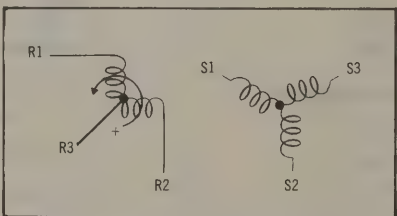

**Transmitter:** A unit with a Y-connected stator that outputs a signal proportional to the position of its single-phase excited rotor. High power units, called "torque transmitters," are used to drive one or more receivers. Low power transmitters are used to drive control transformers.

**Receiver:** A unit with a three-phase stator excited by the input, usually from a torque transmitter, and a single-phase rotor that follows the resulting stator field. Usually used to drive a position pointer.

**Control Transformer:** A unit with a three-phase stator excited by the input from a transmitter and a single-phase rotor mechanically driven to the null position by an external motor or other device.

**Differential:** A unit with a three-phase stator and a three-phase rotor. It is usually connected between a transmitter, which excites its stator, and a receiver or control transformer. It can be used to "dial in" correction factors for the synchro chain.

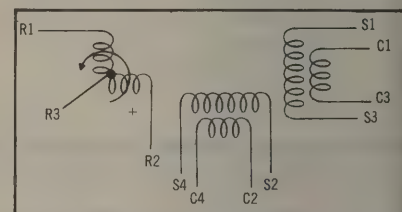

**Transolver:** A unit with a three-phase stator and a two-phase rotor that can be used either as a control transmitter (with one rotor phase excited and the other shorted), or as a control transformer with the signal obtained from one phase of the rotor—making sure the other phase is equally loaded to prevent unbalances.

**Differential Resolver:** A unit with a two-phase stator and a three-phase rotor that is used as a transolver with the advantage that when connected as a control transformer, the signal does not travel through slip rings.

**Resolver:** A unit with a two-phase rotor and a two-phase stator that is used to create or receive SIN-COS signals such as vector resolutions for

solving inertial platform coordinate transformations, unknowns of right triangles, etc. Resolvers can also be used as transmitting, differential, or receiving elements by proper choice of impedances. It is also possible to use resolvers as phase shifters where, in one mode, one rotor phase is excited and the two stator windings are feeding an appropriate RC network and indicating a phase shift, referred to the input, that corresponds to the rotor position.

**Compensated Resolver:** A unit with a "2x2" phase stator and a two-phase rotor used as a resolver with the added benefit of feedback windings in parallel with the stator windings that increase the useful accuracy over a wide range of environmental operating conditions.

**Linear Transformer:** A unit with a single-phase stator and single-phase rotor designed to provide a linear output voltage that is directly proportional to the rotor input angle. It operates over a range of less than  $\pm 90^\circ$ , and is analogous to a potentiometer providing infinite resolution, but without contact between the elements. It can be used only with AC voltages.

**Brushless Synchro:** Available in two types—hairspring and bobbin. Hairspring synchros use spiral wound conductor springs to pick off the rotor signal, and are generally limited to a  $\pm 165^\circ$  rotation. Most have mechanical stops to prevent damage due to over-rotation. Bobbin synchros pick off the rotor signal with rotary transformers inside the unit, allowing the rotor unlimited motion.

**Pancake Unit:** A name derived from the physical dimensions of the unit, which has a diameter that exceeds axial length. Sizes range from under 1" to 20" or more. The unit is frequently used as a gimbal pickoff element and is designed to fit a particular application envelope. It can be supplied as a rotor and stator only.

**PACITEC®**

Division of LaFrance Corp.

# Electronic Enclosures

From the recognized leader in packing technology.

PacTec enclosures are recognized around the world as the premier line of high quality, plastic enclosures. With PacTec enclosures, it's easier — and far less expensive than you might think — to create a customized enclosure for your product.

## Here's what makes PacTec enclosures so valuable:

- **Over 200 standard models.** Available from stock throughout the U.S. and around the world.
- **Wide range of attractive, functional designs and sizes.** From handheld and unique remote control units...to full size instrument and keyboard enclosures, you'll find the style and size you need for your product.
- **Unique ergonomic designs and variations.** PacTec enclosures provide contemporary styling and high quality at reasonable cost.
- **Custom modifications at low cost.** PacTec's innovative insert tooling technology makes high-value modifications available at surprisingly low cost.
- **Prototyping kits** contain all components necessary to create enclosures for prototyping or short production runs.
- **Standard membrane switches.** Here's an economical way to obtain and integrate high-quality, rugged switches at a very reasonable cost. See page C-1068.
- **Wide variety of options and accessories.** From handles, tilt stands, and belt clips to battery compartments (9-volt & 4AA), display bezels, vents, and much more, you'll find what you need to create your special design.

## The PacTec Design Team

With years of experience in electronics packaging, Design Team engineers have assisted hundreds of customers meet their exact packaging needs with uniquely designed and modified enclosures. The Design Team is always available to discuss your special needs: they'll assist you in every step of the design process... from creating initial and final layouts, detailed drawings, and parts lists to suggesting innovative component mounting and assembly methods, final finishing steps, and much more. All in a matter of days! All they need to get started is a simple sketch, description of your concept, and suggested parts list. They'll take it from there!

FOR DETAILED INFORMATION, SEE PAGES C-1062 THRU C-1068.

## ENCLOSURES THAT PROTECT AND LOOK GOOD TOO!

Altech/Spelsberg enclosures provide needed protection in a functional and creative way while enhancing the value of your product with their appealing designs. Innovative housing for electrical/electronic/pneumatic components; terminal blocks and assemblies; meters, switches, sensors; and DIN rail mount circuit breakers and devices. Choose from our wide selection of sizes and styles.

- Dustproof and Watertight
- Non-Corroding, Chemical and Impact Resistant
- International Approvals
- Fully Gasketed with Polyurethane Seals
- Precision Molded Polystyrene, Polycarbonate, or Glass Reinforced Polycarbonate
- Available with Transparent or Gray Covers
- NEMA 4X
- Smooth or Knockout Sidewalls
- Selection of Cover Heights and Styles
- Special Colors Upon Request
- Easily Customized
- Complete Line of Accessories Available

Altech's Family of Nonmetallic Enclosures

### HP Economy Junction Boxes

Semi-rigid Polypropylene

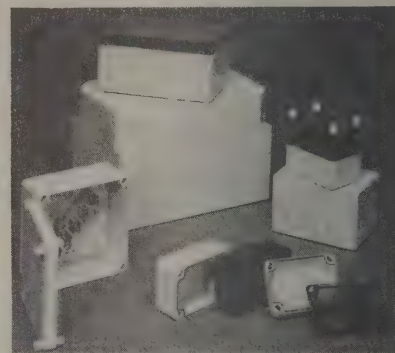

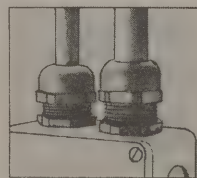

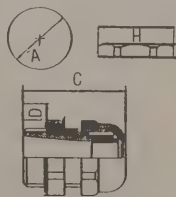

with universal entry seals NEMA 12/12 IP54

| Type   | Dimensions (in.) |
|--------|------------------|
| HP 70  | 2.95 sq x 1.66   |
| HP 80  | 3.35 sq x 1.66   |
| HP 90  | 3.55 sq x 1.77   |
| HP 100 | 4.45 sq x 2.29   |

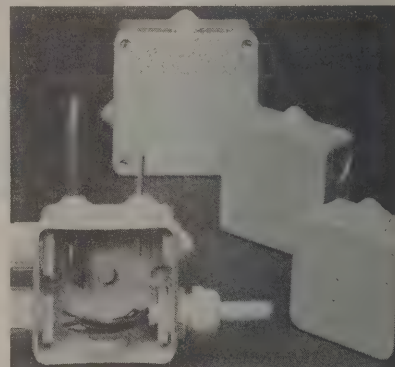

### Connector Assemblies

Includes connector, ring seal and locknut. Material: polyamide, glass-filled reinforced. Liquid-tight, strain-relief connector assemblies for use with enclosures.

Phone (908) 806-9400 • Fax (908) 806-9490

## NONMETALLIC ENCLOSURES DIN RAIL MOUNT

Altech's contemporary nonmetallic enclosures are designed to help you package your devices for the world market. Compact in size, they are ideal for housing electrical, electronic, electromechanical devices such as electronic transducers and converters, process controllers, monitoring devices, printed circuit boards and more! Quick and easy front wiring with 4 to 144 ready-to-wire terminals. Snap onto standard DIN rail or panel mount.

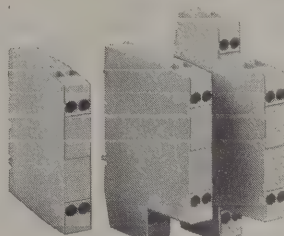

- Complete With Terminals
- Several Terminal-to-Board Connection Options
- Integral PC Board Guides
- Beryllium Copper Contacts

- Up to 25A, 300V; 18-12 AWG
- UL94V0 Materials
- Wide Range of Sizes, Designs
- Easily Customized, Imprinted
- International Acceptance

### K70

Cost effective kits have snap on covers for easy insertion and removal of PC boards. Integral PC board guides. Pressure plate terminals, fixed and pluggable terminal-to-board connections.

- 6 to 32 Terminals
- Housing Material: Polycarbonate
- Cover Material: ABS
- Standard Color: Gray
- Up to 25A (Pluggable to 10A)
- Terminal Covers Optional

### KO4070

Compact, cost effective, snap together kits. Removable cage clamp terminals with dual solder pins are machine solderable. Horizontal and vertical PC board positions. Funnel shaped wire entries.

- 4 to 16 Cage Clamp Terminals
- Material: Polyamide
- Standard Color: Gray
- Up to 16A
- Extended Length Pins Available

### K04700

A wide range of sizes and cover designs. Pressure plate or cage clamp terminals, fixed and pluggable terminal-to-board connections. Pluggable connection helps to eliminate wiring mistakes.

- Housing Material: Polycarbonate
- Cover Material: Glass Filled Polycarbonate
- Std. Color: Black Housing; Tan Cover
- Up to 25A (Pluggable to 10A)
- Enclosures with Removable Cover Panels Available

### KU4000

Versatile enclosures provide ample internal space for wiring and electronic components. Kits consist of snap-in double level terminals, cover and base, with integral PC board guides. Machine solderable straight or right angle pins, pressure plate terminals. Fit standard 45mm DIN cutout in larger enclosures like Altech's EK Series.

- 8 to 84 Terminals
- Material: Polycarbonate
- Standard Color: Gray
- Up to 10A

## MINIGLOSSARY CONNECTORS

**Connector terminology** is often quite confusing. This confusion starts with the very names of connectors. The name of a connector may derive from its shape, application, type of conductor or even method of termination.

**Shape**—Circular, cylindrical, and rectangular.

**Electrical application**—High voltage, RF, microwave, input/output, etc.

**Mechanical application**—Printed circuit, rack & panel, cable, etc.

**Conductor type**—Coaxial, flat cable, ribbon cable, flex circuit, etc.

**Termination method**—Wirewrap, soldercup, solderless, etc.

Hardware such as clamps, hoods, and adapters are frequently used to convert cable connectors to rack and panel types. This adds to the name confusion. A very common telephone connector, for example (the "C" type) got its name from the model number of the original maker.

**Contact:** The part(s) of the connector that actually provides circuit continuity between its two sections—the parts which are normally mated. The back end of the connector should properly be called the *termination*. This is the point where the wires or PC board is attached to the connector.

**Contact alignments:** Often called *contact float*. Describes the amount of allowable contact movement within the connector body. Permits self-alignment.

**Male vs. female:** In the U.S. this describes the contact construction. In Europe this term is more often used to describe the outer shell mating action which may be the reverse of the contacts.

**Closed entry:** A female contact which prevents entry of a male contact larger than a specific size.

**Open entry:** A female contact designed for a specific size of male contact but which will allow entry of larger male contacts by spring action.

**Hermaphrodite:** Contacts or connector bodies which are the same configuration. Male/female designations do not apply. Bodies usually have some mechanical means for maintaining polarity.

**Hermetic seal:** Glass-to-metal seals at terminations. Often used improperly to describe vacuum-tight seals.

**Waterproof seal:** May or may not be truly *waterproof*. May prevent easy entrance of casual water by means of a rubber or other boot.

**Printed circuit connector:** Connectors which are used in conjunction with printed circuit boards. There are two distinctly different styles.

**Edgeboard.** May be called *edge* or *card*. The printed circuit (PC) board edge enters the connector.

**Two-piece:** One part of the connecting pair is physically attached to the PC board itself. The other part is attached to something else such as a cable or a motherboard.

**Readout:** Describes the arrangement at the terminating edge of a PC board.

May be single or double. A double readout PC board has termination strips on each side not usually interconnected.

**Ribbon connectors:** A type of connector which allows flat "ribbon" cable to be attached to a round or rectangular connector but also used interchangeably for flat connectors to flat cable.

**Ribbon contact connector:** Describes the contacts in a rectangular connector which have a self-wiping mating action. Not the same as ribbon connector.

**Solderless terminal:** Any style of termination which does not require solder for a permanent connection. See *crimp* and *insulation displacement*.

**Crimp termination:** A stripped wire is inserted into a barrel or trough which is then crimped to the conductor with a suitable tool.

**Insulation displacement:** Unstripped insulated wire is fitted into a channel containing metal teeth which are forced through the insulation to make contact with the conductor.

**Service rating:** The maximum rated voltage and/or current which may be applied continuously. May be called *working voltage*. Can be confused with the term used to describe how many times a connector may be mated and separated.

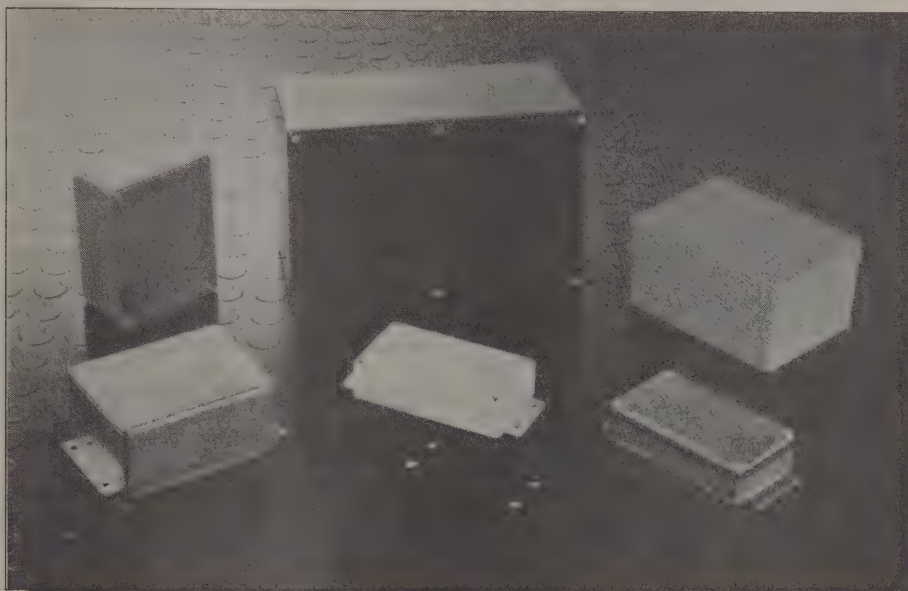

**Withstanding voltage:** Also called *test voltage*. The voltage a connector must withstand for one minute without breakdown. Applied between connectors and between connectors and shell and any grounding devices of the connector.

# AlumaPak

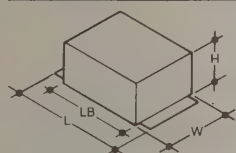

## ALUMINUM DIECAST ENCLOSURES

Three attractive styles of high-quality aluminum diecast boxes with close fitting lids are now available in our AlumaPak line. These lightweight enclosures provide excellent screening against EMI/RFI and are therefore ideal housings for electronic components and circuits. Integral PCB guides are incorporated in some of the styles.

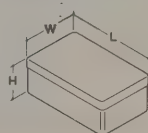

Flanged and general purpose enclosures can be supplied in three finishes: A) Plain, to accept most finishes with a minimum amount of preparation; B) Stove enamel grey texture; C) Nylon coated. The nylon coated boxes can be drilled or machined without affecting the finish. Colors available: grey, blue, yellow, brown, black. Enclosures with gasket available with plain finish only.

Largo, Florida

# MODULAR

**A** MCO's Modular Enclosure Systems have set a standard in electronic enclosures for over 50 years.

Built to meet your changing needs and most demanding applications, our modular enclosures are distinguished

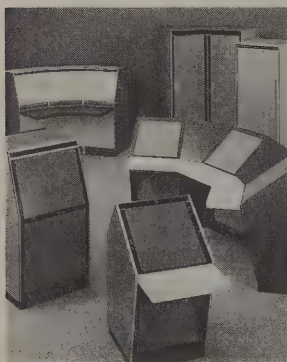

by remarkable design and execution.

The AMCO Style and Design System features:

- Structurally integrated styling to enable you to coordinate type, color, and configuration of all non-structural cabinet components.
- A rainbow of colors. AMCO's standard color palette has 19 distinct choices—from russet to pearl! Vinyl inlays are available in woodgrains or black textured leather.
- Configuration flexibility. AMCO offers vertical, sloped front, and low silhouette enclosure configurations.

## commercial & shielded enclosures

### Quality Construction.

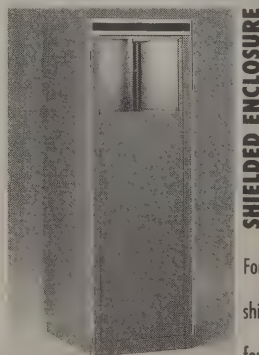

AMCO gives a choice of structural frame design—the FX or F Series frames.

High strength characteristics make the FX Series frame ideal for virtually any commercial or OEM need, in addition to many mil-spec applications. The compact design of the

F-Series frame makes it ideal for series applications where space is limited.

### Call today for Catalog 800A!

122 pages of the enclosures which have set the standard in electrical and electronic protection. This is a must for the file of any design or electronic engineer. Price list and easy-order guide accompany this important catalog.

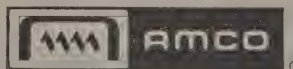

SHIELDED ENCLOSURE

For information on AMCO shielded enclosures, ask for Catalogs 650 and 204.

w i t h i n **5** d a y s

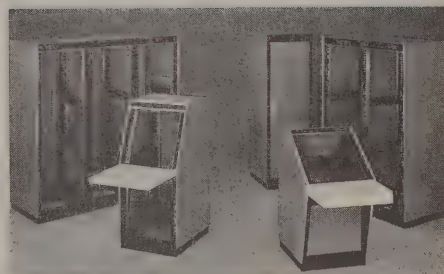

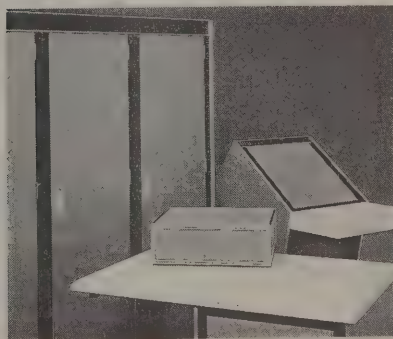

**W**hatever your urgent needs—from consoles, computer desks, and desktop cabinets to hardware, accessories, or cooling devices—AMCO can ship from stock within 5 days. In your choice of 19 colors from black to cranberry!

- 19" or 24" Panel Width Vertical or Sloped Consoles in Two-Tone Textured Black Frames & Cowlings with Panels and Doors in Your Choice of AMCO Colors.
- 19" or 24" Panel Width Desks, Desktop Cabinets, Blowers, Fans, and Accessories.
- Available in Plain, Square, or Radius styling.

### Call and ask for Catalog 500B

Forty-four problem solving pages of the industry's finest stock electronic enclosures awaits you. In an industry where changes—and unexpected demands—accelerate daily, you can't afford to be without this resource!

### "Quality is no accident"

For over 50 years, AMCO Engineering has meant quality in electronic enclosures. Our stock products proudly reflect that reputation—as does our ability to get them to you in 5 working days! Give us a call today.

## consoles unparalleled for performance

**O**ur unique modular design concept allows you to design a single console or room encompassing system with the same style and efficiency.

- Base units are vertical, sloped front, or low silhouette.
- Instrument and monitor cabinets come in a wide range of styles and sizes.
- Available in 19 AMCO standard colors from gold to gunmetal!
- Monitoring consoles come in an array of configurations with virtually unlimited design options. Writing surfaces are provided in single or multiple bay widths. Multiple style edges available.

# MONITORING

### Ask for Catalog 450!

24 pages include technical drawings, dimensional charts, and part numbers for system components. Use Catalog 450 in conjunction with AMCO General Product Line Catalog 800A.

### 50 Years of Excellence

For over half-a-century, AMCO Engineering has been building electronic enclosure systems for the world's most exacting applications. Our broadcast and security consoles uphold this tradition beautifully.

**CALL AMCO 1-800-833-3156**

In Illinois call 708-671-6670 or FAX: 708-671-9469

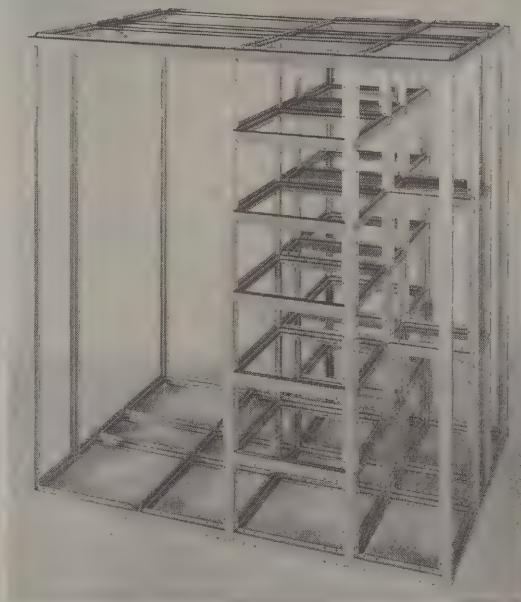

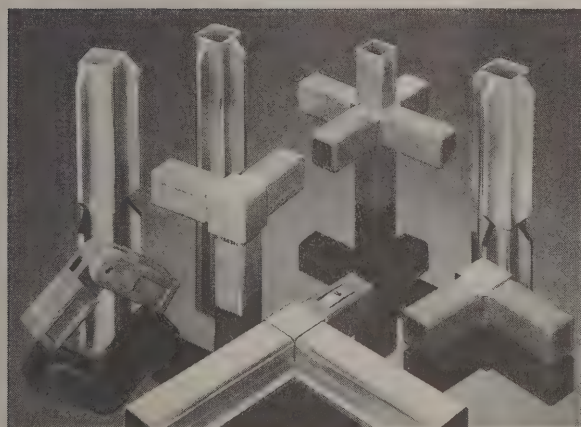

## aluminum framing for tough applications

**S**imple. Strong. Remarkably versatile. With AMCO's heavy-duty aluminum framing system, all you need is a mallet, a few wrenches, and a little design imagination for tough enclosures built specifically to your needs.

- Easy to assemble, the AMCO aluminum framing system makes specialized and non-standard enclosures a snap to design.
- Our patented corner locking method actually exceeds welding!
- Field tested in applications like NASA installations and missile launch systems.

# HEAVY-DUTY

### You Decide the Configuration

You can build enclosures from ten inches to twenty feet in any 90° plane. Use non-locking or locking clips for prototyping or permanent assemblies. To add extra strength, add bolted corner gussets.

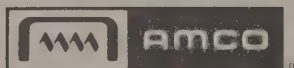

### Call today for Catalog 203!

8 pages of simple solutions to complex enclosure problems. Construction methods

detailed, as are tubing and casting specifications. Detailed diagrams of extrusions for flush mounting flat or formed panels, recessing flat panels, and mounting accessory channels. With AMCO-engineered aluminum framing, quality is no accident!

# GREAT VARIETY OF RACK-MOUNT CHASSIS

## from STANDARD ENCLOSURES

Series 10 have steel top, bottom and side covers all 0.045" thick and grided for excellent heat dissipation, aluminum front (0.125", anodized) and back (0.06" painted) covers that facilitate making of holes.

Note: Our Series 11 (Gray color) has been combined with Series 10. To order a gray enclosure, just add the -G suffix. For example, 10-19082-G (old model #11-19082) is gray and 10-19082-B is black, everything else the same.

Series 12 are all aluminum with 0.06" thick panels and anodized standard finish. An additional second front panel for mounting meters or switches is included for improving the flexibility and strength of the chassis.

Note: Our Series 13 (Clear Anodize) has been combined with Series 12. To order a clear anodized enclosure, just add the -C suffix. For example, 12-19122-C (old model #13-19122) and 12-19122-B is the same enclosure except in black.

Series 14 are all aluminum with standard alodine finish, EMI/RFI shielded and are available in many sizes with 0.09" material. Optional custom hole punching, anodization, color painting, and silk screening. Series 14 is constructed for heavy duty use.

Series 15 are specially made rack-mount cases for PC, XT and AT computers. Stock models include front and rear slotted panels with 1 to 3 disk drive spaces. Custom modifications are available for reasonable prices. High quality UL listed power supply and 2nd fan are optional. Other chassis for disk drives and monitors can be altered to meet your specifications.

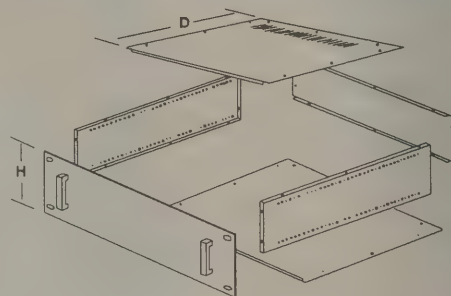

Our Series 16 are custom rack mount chassis that offer our customers the most flexible manufacturing available in the industry. We can manufacture any size enclosure with no minimum quantity. We provide unlimited options including computerized hole punching with pin point accuracy. Please call for more details about our new line of enclosures.

Other accessories include: Support rails/plates, 2nd front panels for meters or switches, aluminum blank panels with sizes from 1U to 7U high and all types of finishes. Vent panels are also available from stock.

Call for free catalog, quantity discount or other products. Specs. and prices are subject to change without prior notice.

# ATLEE CARD GUIDES

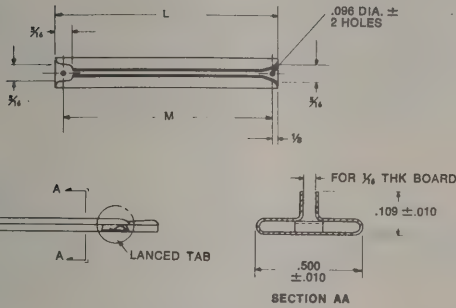

## FEATURES

- High retention of printed circuit board under severe shock and vibration.
- Easily installed by welding or riveting.
- Quick and simple board insertion and withdrawal.
- Rigidly mounted printed-circuit board in racks and other types of assemblies.

**MATERIAL:** \*Stainless Steel available MIL-S-5059  
\*beryllium copper, .010 thick, alloy 25, per QQ-C-533a, condition 1/4 hard.

**PLATING:** .0003 thick cadmium per QQ-P-416, type II, class 2, among others.

## Standard or Modified — Cabtron has the enclosures to make *your* designs work.

Cabtron's electronic enclosures are designed for maximum efficiency—whether used for automatic test equipment, communications, military, security, video, medical, industrial, or other applications. Our large selection of standard sizes, coupled with distinctive styling and a fully integrated, modular parts system, offer you the ultimate design flexibility required in today's market.

Cabtron also offers one of the largest selections of accessories in the industry, while attractive trim packages help you finish your enclosures in style. In addition, our skilled technicians will match any color, punch any size hole, or assemble any cabinet configuration to meet your specifications.

perience in electronic enclosures to work for you. For the name of your local representative and your FREE Firstline catalog, contact Cabtron at:

### Standard Features

- 12, 14, or 16 gauge steel frame.
- 11 gauge corner gussets for added strength on vertical rack and console models.
- Horizontal cowlings, vertical frame channel, horizontal top channel, and bottom caster plates all seam welded together for extra strength and rigidity.
- 11 gauge mounting angles have tapped holes on EIA patterns.
- Removable bottom panel for computer floor access.
- Front and rear grills with cleanable air filters engineered to accept exclusive Cabtron blower system.
- Frame provided with knock-outs for easy mounting of casters.
- Casters purchased at time of order installed at no additional charge.
- Free hardware kit includes four 10-32 panel screws for every 8 3/4" of front panel space and joining hardware for multi-bay configurations.
- Choose from 10 standard textured finishes. Combinations of standard colors available at no additional cost.

## Compare our range of products

### CARD CAGES

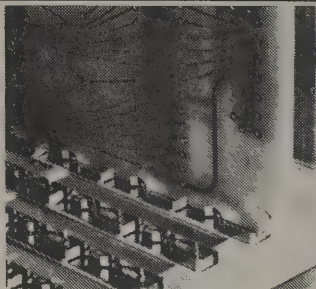

Custom designed and fabricated to meet customer requirements.  
Also, Eurocages-VMEbus & MULTIBUS II compatible.

### CARD GUIDES

Metal louver and nylon snap-in.

NEW Conductive Series C120  
Guide for maximum ESD protection.

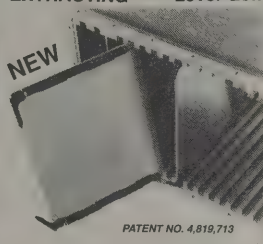

### CARD RETAINERS

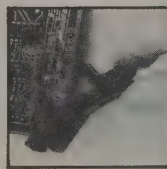

Excellent thermal and electrical conductivity,  
plus protection against shock and vibration.

### CARD-LOKS

Series LE260  
"EXTRACTING" Lever-Lok

NEW

Series 107-70  
Positive Locking  
PC Inserter-Extractor

Patent No.  
4,975,073

### CARD INSERTERS & EXTRACTORS

For easy insertion and extraction of cards.

- Available in colors for coding
- Generous area for hot stamp marking.
- U.L. Approved
- Available with pre-started assembly pins.

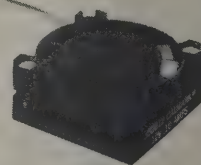

### SERIES 350 - COOLING ASSEMBLY (MICROPROCESSOR)

Series 350 Cooling Assembly designed to provide critically needed cooling to state-of-the-art Microprocessor chips such as the Intel 486.

#### Features:

- Maintains greatly reduced case temperatures.
- Low profile.
- Low noise level.
- Low power draw.

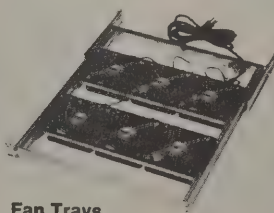

NEW

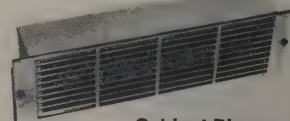

Special termination options available on request.

### ELECTRONIC COOLING PRODUCTS

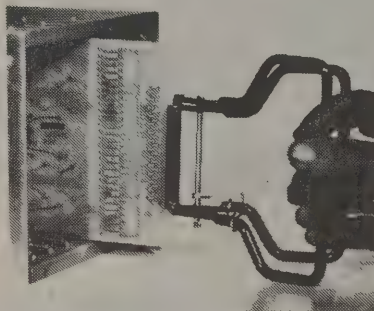

Fan Tray Assemblies offer standard mounting with multiple and adjustable fan locations. Cabinet Blowers for cooling of electronic rack equipment. For Special Applications Calmark will design an airmover to meet specific requirements.

Fan Trays

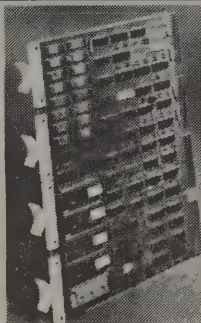

Cabinet Blowers

### CARD PULLERS

For easy PC card extraction.

### PCB HANDLING TRAYS

Trays for safe and efficient handling, transport, and storage of PC boards during all stages of production. Available with static resistant or conductive material.

# *When it comes to your enclosures, this is one of our most valuable design tools.*

At CMP, we put a lot of time and thought into the design of our standard enclosures. We wanted to make them as structurally sound, aesthetically pleasing and useful as possible. We even created a modular parts system that makes it easy to specify your enclosure from stock.

Still, we realize that no matter how well our standard enclosures are designed, they can't be all things to all people. That's why we *listen* when you tell us what you need. And we *act* on what you tell us.

We'll modify any of our enclosures to give you exactly what you need. Whether it's punching an extra hole in an unusual location, matching a custom color, changing a width, height or depth or even adding a special component. No one knows what you

need better than you do. And no one can help you achieve it better than we can.

Don't settle for enclosures that almost do the job. Get exactly what you need from the professionals at CMP. We're there to lend a hand — and an ear.

For the name of your local representative and a FREE design guide, contact CMP at:

**1-708-244-3230**  
**FAX: 1-708-662-5292**

All our enclosures feature:

- 14 gauge steel frame
- 11 gauge corner gussets
- Horizontal and vertical members seam welded
- 11 gauge adjustable mounting angles
- Wide variety of sizes and configurations from stock

## LEADER IN PROVIDING INNOVATIVE SOLUTIONS FOR ALL YOUR PACKAGING REQUIREMENTS

ECS COMPOSITES, creator of shock mounted Transportable Enclosures for 19-inch electronics, has for 38 years been the world's leading manufacturer of reusable commercial and MIL-SPEC transport containers.

In addition to thousands of standard sizes and custom case designs available, ECS engineering teams provide expert EMI/RFI, shock, and vibration advice and unsurpassed packaging design assistance.

ECS offers compression molded composite thermoformed and rotationally molded products, fabricates and molds custom cushions, is SPC and MIL-I-45208 certified and provides competitive pricing with on time deliveries.

Write, call or Fax for immediate attention to your needs.

## LEADERSHIP IN PC BOARD RETAINER TECHNOLOGY

**EG&G Birtcher** is a manufacturer of high quality custom and standard products for the electronics industry. We are the leading manufacturer of precision retentive and locking card guides and custom sheet metal racks, chassis and enclosures. We fabricate custom extruded aluminum heat sinks and thermally conductive MIL-grade enclosures.

### QUALITY ASSURANCE

The EG&G Birtcher quality assurance program is in compliance with MIL-I-45208A and MIL-STD-45662. Inspection personnel are trained in Statistical Process Control (SPC). Expertly trained personnel inspect all phases of work to maintain EG&G Birtcher's high quality standards. Receiving, in-process and final inspection are all part of our rigorous quality assurance program.

### CUSTOM 6U VME SUBRACK

EG&G Birtcher's custom rugged VME and Eurocard subracks offer superior structural rigidity through welded construction. The subracks meet documented VME Product Specifications per the VMEbus Manual, Revisions C.1. Euro-subracks meet specifications per IEC 297-3/3A and DIN 41494, Parts 1 and 5.

### SHEET METAL CAPABILITIES

Available to all EG&G Birtcher customers are the combined resources of the Birtcher facilities and broad spectrum of technical and manufacturing knowledge.

Our fully equipped 60,000 square-foot plant with its top-of-the-line equipment enables us to fill almost any customer requirement including design, shearing, piercing, bending, milling, welding, chemical finishing and painting, silk screening and assembly of hardware.

### CUSTOM FABRICATION POWER SUPPLY CHASSIS

This custom power supply chassis is fabricated from cold rolled steel and perforated sheet metal, complete with formed metal guides, weld studs, self clinching fasteners, grommets, spring clips, hinges and a zinc-plated finish. The chassis is manufactured at a rate of 400 per week utilizing sophisticated numerically controlled punch presses and forming machinery plus welding, stamping, machining and plating.

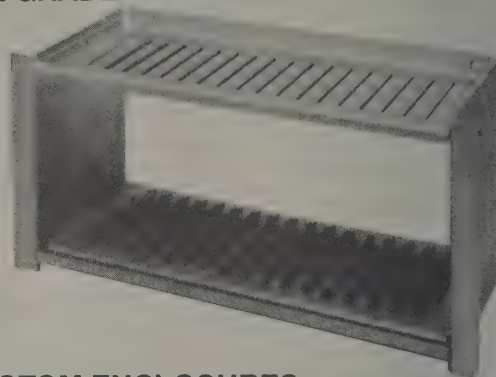

## LEADERSHIP IN DESIGN SOLUTIONS TO YOUR PCB SHOCK, VIBRATION AND THERMAL PROBLEMS

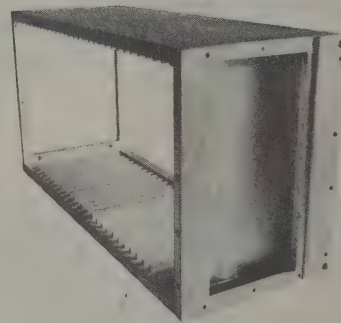

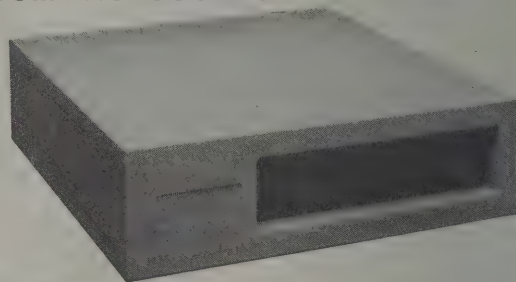

EG&G BIRTCHER 4505 NORTH ARDEN DRIVE • P.O. BOX 5268, EL MONTE, CALIFORNIA 91734-1268 • (818) 442-2572 • FAX (818) 442-8127

- Electronic Packaging Products
- Custom Metal Fabrication
- Printed Circuit Board Hardware

### MIL-GRADE CARD CAGES

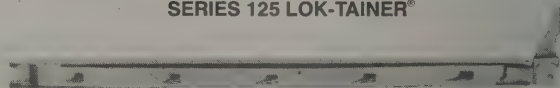

### CUSTOM ENCLOSURES

This custom milled and brazed aluminum chassis with five-piece, self-aligning Wedge-Lok™ retainers is an example of the type of Hi-Rel products produced by EG&G Birtcher.

### LEVER-ACTUATED HIGH PERFORMANCE SERIES 125 LOK-TAINER®

#### LEVER-ACTUATED SERIES 125 LOK-TAINER®

PATENT PENDING

RIGHT HAND MODEL SHOWN

#### FEATURES

- No Tools Required To Lock Or Unlock PC Board
- Unique Cam Detent Prevents Unlocking During Shock and Vibration
- Visual Locking Indicator With Failsafe Design
- Constant Pressure Insures Uniform Heat Transfer

- Field Repairable
- Low Thermal Resistance (< 2° C/Watt/In)

#### APPLICATIONS

- Shipboard-Airborne-Space
- Designed To Meet Requirements Of MIL-STD-901 And MIL-STD-810
- SEM-D&E
- 1/4, 1/2, 3/4, And Full ATR Modules
- Line Replaceable Modules (LRM)

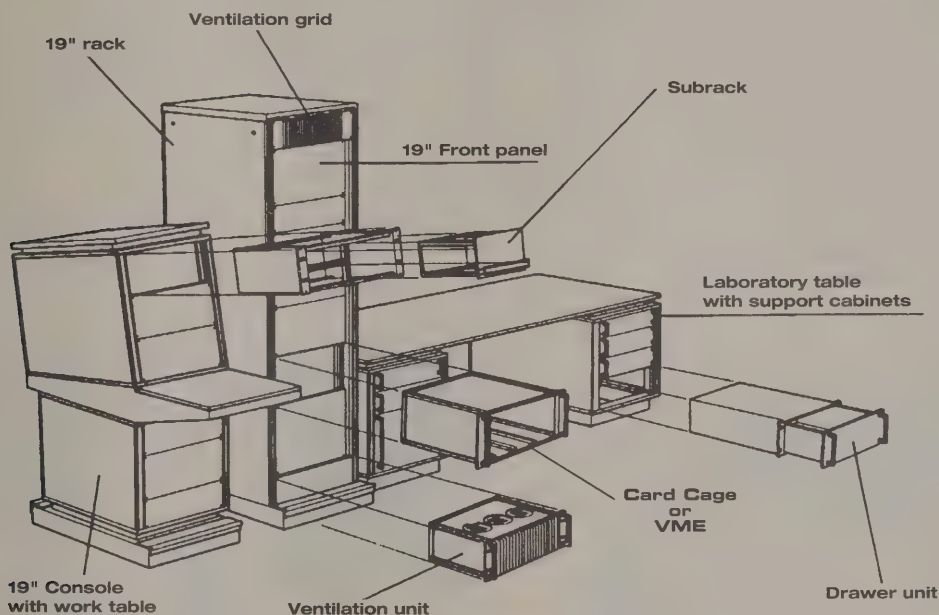

**ELECTRONIC PACKAGING SYSTEMS****CONSOLES, RACKS, AND ENCLOSURES

201 35th Street, Marion, Iowa 52302 ■ Ph: 319-377-3423 ■ FAX: 319-377-3674

Cabinets ■ Racks ■ Rack Frames ■ Cases ■ Consoles ■ Lab Trolleys ■ Monitor  
Carriers ■ Lab Tables ■ Chassis Systems ■ Ventilation Units ■ Air Conditioning Unit  
■ Computer Furniture ■ Telescoping Slides ■ Subracks

**Features**

- Quality Assurance for Commercial & Military Specs
- Delivery - On time!
- Equipment Delivered "Ready to Use" - No Assembly Required
- EMI/RFI Shielded Products
- Engineered for Form, Fit & Function
- Custom Designs for Cabinets and Work Stations

- Complete Line of Accessories Featuring; Power Strips, Fans & Blowers, Casters, Buss Bars, Shelves and Handles
- Colors Available (generally at no extra charge)
- Flexible Design - Allows for Application Growth without Additional Purchases
- Rack Mounted Keyboards

**EPS produces solutions  
to real world applications.**

Our products have served well in response to real world applications in a variety of commercial, industrial and military environments. Our product offering and our custom modifications are a measure of the importance we place on understanding our customer's needs. Our work ethic is well supported by our design, engineering and sales team who demonstrate a commitment to customer satisfaction and a knack for problem solving.

**Application Assistance**

It is easy to talk to our design engineers who understand our products and your applications. We will make drawings, recommendations, find accessories, make modifications —whatever is necessary to make sure you succeed. And, our assistance extends beyond the sale. Your satisfaction is paramount-call on us anytime.

## Benchtop/Rackmount

### VME System: Rear Exhaust

- **Excellent EMI/RFI suppression specs**
- **Even cooling, rear exhaust**
- **Removable, washable air filters**
- **Cooling: Three, 106 CFM D.C. fans**

### Standard Configurations:

**410-616-212-0500** - 6U X 160MM cards, 21-slot J1/J2 VME backplane., 500 watt power supply. 19"W X 15.75" H X 21.5"D

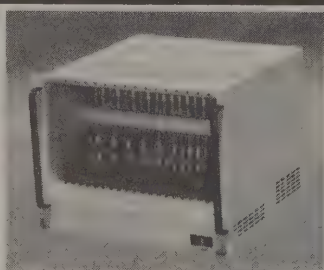

**410-940-213-0750** - 9U X 400MM cards, 21-slot, J1/J2 VME backplane & 21-slot, J3 uncommitted backplane, 750 watt power supply. 19"W X 26.50" H X 26.5" D

### Options:

**Backplane:** 2 to 21-slot, J1/J2, high performance  
J3 2 to 21-slot uncommitted, configurable

**Power Supply:** 400 to 750 Watt

Peripheral Bays, Hinged front panels, Cutout rear I/O Panel

Series  
500

## Rackmount/Desktop VME System.

### Double Entry, Direct Cooling

- **Accepts cards front and/or rear**
- **Direct cooling via fan tray**
- **Minimum profile**

### Standard Configurations:

**510-616-212-0500** - Accepts 6U X 160MM cards, 21-slot J1/J2 VME backplane., 500 watt power supply. 19"W X 14" H X 21" D

### Options:

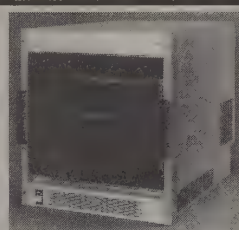

**Additional Sizes:** 6U & 9U heights, cards 160MM to 400MM

**Backplane:** 2 to 21-slot, J1/J2, high performance. J3 in 9U models, 2 to 21-slot uncommitted, S-bus configurable

**Power Supply:** 400 watt to 1000 watt. Dual supply configurable

Peripheral bays, hinged front panels, custom rear I/O panel.

Rear Entry subrack for cards or transition modules

Series  
600

## Rackmount/Desktop VXI

### System, Rear Exhaust

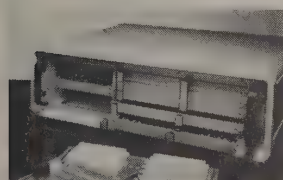

- **For "C" & "D" size modules**
- **Plenum directed rear exhaust, variable speed D.C. fans**
- **Voltage monitor panel with LED's and audio for all voltages**
- **+5V backup batteries & separate power supply**
- **Removable, washable air filters**
- **Excellent EMI/RFI suppression specs**
- **Plenum directed air assures cool operation**

### Standard Configurations:

**610-634-132-1200** - For "C" size modules, 13-slot VXI backplane, 1200 watt power supply. 19" W X 15.75" H X 26.50" D

**610-934-133-1200** - For "D" size modules, 13-slot VXI backplane, 1200 watt power supply. 19"W X 21.0" H X 26.50" D.

**630-634-052-0350** - 5-slot "C" size VXI backplane in tower/desktop configuration; 350 watt VXI power supply, variable speed fans, mounts 2 peripheral bays, positive air pressure

Series  
700

## VME System, Removable

### Subrack, Rackmount/Desktop

- **Accepts vertical or horizontal 6U X 160MM VME cards**
- **Subrack removes completely from painted enclosure**
- **Option: Rear entry cards or transition modules**
- **Mounting for 3 half - height 5.25" or 3.5" drives**

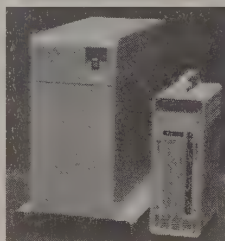

### Standard Configurations:

**710-616-052-0250** - Accepts 6U X 160MM VME cards, horizontally mounted with side-to-side air flow; 5-slot J1/J2 VME backplane; 250 watt power supply. Light gray painted enclosure with easily removable 3U subrack. 20"W X 6.4"H X 19.5"D

**720-616-122-0400** - Accepts 6U X 160MM VME cards, vertically mounted with bottom mounted fan tray for direct cooling; three, 60CFM d.c. fans; 12-slot, J1/J2 VME backplane, peripheral bay mounting for 3 half-height 5.25" or 3.5" drives; 400 watt power supply, 7U height; 20"W X 13.75" H X 19.5" D

### Options:

Can accept rear mounted cards or transition modules. Power supply options from 400 to 1000 watt available. Hinged panels, custom rear I/O panels.

Series  
800

## VME System Towers:

### Portable And Workstation

- **5 and 7-slot Portable towers**
- **Fully accessible subrack slides out completely from separable case**
- **Workstation tower for 9U X 400MM cards fully enclosed, on casters**
- **Positive air pressure from 1 to 6, 60 CFM fans**

### Standard Configurations:

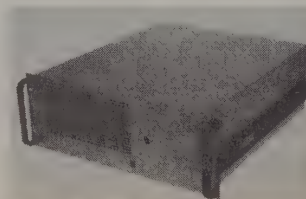

**810-616-052-0250** - Portable, accepts 6U X 160MM cards, 5-slot J1/J2 VME backplane, 250 watt power supply, accepts three, 3.5" drives. 7.0"W X 15.5" H X 13.5" D

**810-616-072-0250** - Portable, accepts 6U X 160MM cards, 7-slot J1/J2 VME backplane, 250 watt power supply. 8.6"W X 15.50" H X 14.5" D

**820-940-122-0750** - Workstation, accepts 9U X 400MM cards; 12-slot VME J1/J2 backplane, 750 watt power supply.

11.7"W X 26.5" H X 27.0" D

**Consult factory for available options**

Series  
1000

## PC Industrial Rack Systems:

### ISA & EISA

- **19" rack mountable 7" height, passive backplane**
- **Hinged, lockable door covers, drives, and power switch**
- **Designed for low MTTR (mean time to repair)**
- **Positive air flow, removable, washable air filters**

### Standard Configurations:

**1010-072-14-0300** - 14-slot passive ISA backplane, 300 watt power supply with internal fan and convenience A.C. outlets, accepts three, half-height (5.25") or 3.5" drives

**1020-072-14-0300** - 14-slot passive EISA backplane, 300 watt power supply with internal fan and convenience A.C. outlets; accepts three, half-height (5.25") or 3.5" drives

### Options:

8 or 12-slot ISA backplanes available Mounting for two internal 3.5" drives

Rack mounting chassis slides

# ESF Electro-Space Fabricators, Inc.

## Free Value Analysis of Your Card Enclosure

Improved card rack design begins with in-depth value analysis. And that's a free service of the Electro-Space design group ... aimed at delivering greater strength and better tolerances at lower unit cost. Our packaging techniques place no limitations on size, card spacing, special holes and hardware, connector or backplane mounting.

If your rack requirements are 50 or 100, 500 or 5000, why not draw upon our expertise? Our present customers have done so and enjoyed significant savings, both in unit cost and on their production lines. Send us your sketches, prints or sample rack at no obligation. Or call and ask for one of our qualified design engineers.

The Engineer's Design Manual is a compilation of the latest technology and most commonly asked questions concerning card enclosure design. Send for your free copy today.

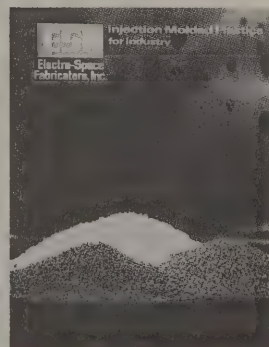

## Custom Design Service

- Complete computer-aided design and manufacturing for customized needs
- Latest design technologies
- Quick turnaround on drawings
- Advanced CAD/CAM system shortens lead times in design, speeds up manufacturing schedules
- NC programming
- Efficient file exchange system
- Results in greater structural integrity at lower unit costs

## Plastic Injection Molding

ESF's high-tech, high performance injection-molding machines are computer-controlled for fast-cycle molding capabilities and close dimensional tolerances necessary for the highest part-to-part reproducibility. Our plastic technology extends into machining, ultrasonic welding and hardware insertion, EMI/RFI shielding, painting, hot stamping and silkscreening.

### • Statistical Process Control

Quality programs can be implemented to your specific requirements

### • UL approved.

## EURO Packaging Systems

**Electro-Space Fabricators, the nation's leading card enclosure manufacturer, offers improved EURO Sub-Racks and Packaging Systems — which can cost 30% less.**

- **Customized designs ...** to help you develop the most economical system for your needs, and to save you valuable time and money.
- **Rugged, reliable sub-racks ...** stylized aluminum components for demanding environments, either assembled or unassembled.
- **Faster turnaround time ...** because all parts are made in-house. Customized designs do not slow the manufacturing process.
- **A large inventory to choose from ...** standard EURO sub-racks with accessories for 3U, 6U, 9U and 12U sizes are ready for "Just in Time" shipment.
- **An easy and efficient ordering system ...** six easy steps on our order form help you determine card depths, backplate insulator needs, mounting bar and card guide styles, card positions and assembly requirements.

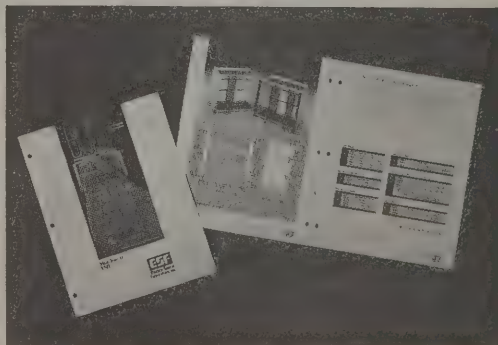

Call or write for our free "Six easy steps" manual.

### Specifications

ESF's standard Eurocard racks are made of rugged aluminum extrusions for vibration resistance. The following materials and finishes meet the highest specifications requirements for electronic equipment:

| Aluminum Extrusions |                     | Finish        |                                              |
|---------------------|---------------------|---------------|----------------------------------------------|
| Sub-Rack Rails      | 6105 T5             | Aluminum      | Clear Iridite MIL-C-5541C                    |
| Mounting Ears       | 6061 T6             | Steel         | Zinc Plate ASTM B-633-85                     |
| Slide Plates        | 5052 H32            | Plastic Parts | Type II (Yellow) Class SC-1                  |
| Front Panels        | 5052 H32 or 6061 T6 |               | Flame-Retardant Material UL94V-0             |
|                     |                     | Hardware      | Stainless Steel (unless otherwise specified) |

## Eurocard Accessories

### Front Panels

- Fully customized panels, complete for immediate use.
- Rapid turnaround and competitive pricing.
- Add special cut-outs, holes and hardware as needed.
- Specify desired finish — anodize, iridite or paint.
- Silkscreened — single or multi-colored.
- Material — .100 aluminum, 5052-H32, 6061-T6 or customer specified.

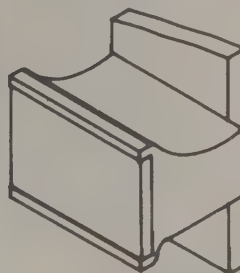

### 764 Ejector Knob 774 Panel Knob

764 Ejector Knob

- Assures easy extraction of plug-in unit.
- Available in .755 width.
- Anodized ID plate snaps into slot in knob and can be custom-marked as required.
- Black flame-retardant nylon 6/6 (UL94V-2).
- Sold in kits with all support brackets and assembly hardware.

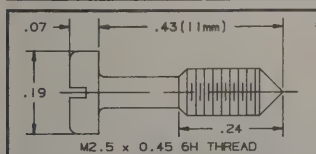

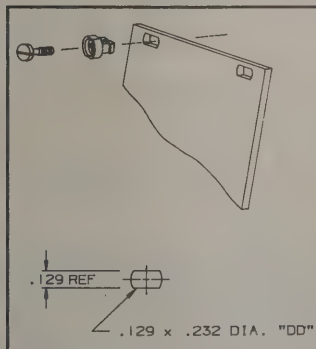

774 Panel Knob

- Available in .755 and 1.550 width.
- Anodized ID plate snaps into slot in knob and can be custom-marked as required.
- Black flame-retardant nylon 6/6 (UL94V-2).
- Sold in kits with all support brackets and assembly hardware.

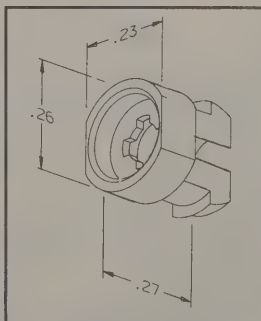

### 700 Collar Screw

- M2.5 x 11mm
- Polished 302 stainless steel ensures non-stripping of threads.
- Used for fastening front panels to EURO sub-racks.
- Works in combination with ESF's 725 plastic.

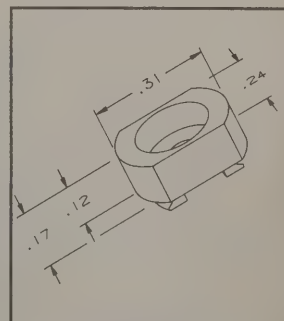

### 725 Plastic Sleeve 750 Metal Sleeve

- Used with 700 panel screw for fastening front panels to EURO sub-rack horizontal rails.
- Metal sleeve is pressed into prepunched holes in panel for positive grounding to chassis.
- Plastic sleeve snaps into prepunched holes in front panel.
- Captivate 2.5mm screw.
- Metal sleeve finish — nickel-plated.
- Plastic sleeve material — tan ABS (UL94V-0); self-extinguishing.

725 Plastic Sleeve

750 Metal Sleeve

These symbols appear on many electrical/electronic components distributed in the world market. They indicate that a country's standard-setting agency has approved the design of the component and/or a testing agency has approved the performance of the component in meeting the standard. This page lists only those countries that have a *symbol* to represent their authority.

# Your electronics deserve an ELMA case!

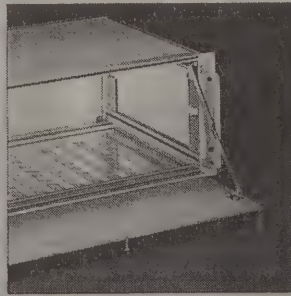

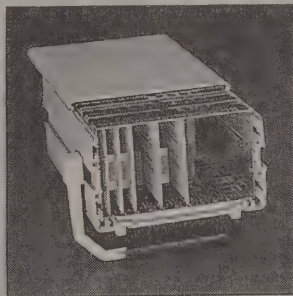

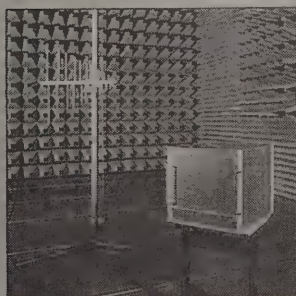

What enclosure? Which cabinet? What sub-rack? Which shelf? What type of protection? Which accessories? What colour? Which...?

Your questions call for expert answers. And if you involve us in your projects in good time, your end product will come onto the market on time

and expertly "packaged". Your electronics deserve an ELMA case. An aluminium case direct from the manufacturer!

Ask for the new ELMASET catalogue!

## Custom or Standard Modular Enclosures

### Desk Top Case, Model 32 Easy Assembly and Maintenance

Two sectional supports running full depth carry all inserts. These special supports permit versatile mounting with only simple assembly gear. The actual enclosure, which consists of front and rear frames and a top and base plate, has no supporting function. These parts are mounted on the mentioned supports using only four screws after the components have been inserted, wired-up and functional tests carried out. Therefore, no damage can be done to the cover plates during assembly. The cover plates are of scratch-resistant Sinaplast and are available in neutral umbra-brown. Unfinished aluminum plates for customer painting can also be furnished.

| Heights:                       | Widths:                 | Depths:                          |

### Portable Detached Keyboard Unit Model 32

#### Features:

- Optimal flexibility
- Easy removal of keyboard from case
- Designed for numerous applications
- Sturdy construction for rugged field service use
- Accepts mountings per DIN 41494
- Mounting kits for 9" CRT monitors available
- Standard or custom front panel design
- Accepts standard PC, PC-XT, PC-AT keyboards

### Type 32 Modular Tower

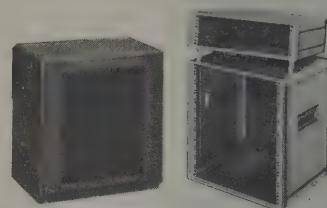

**Application:** The construction of these towers is identical to that of the basic model 32. The special feet that are attached to the depth section allow the case to be used in the vertical tower position. The tower handle makes it convenient for portable application.

These towers have the heights of 8.4", 12.6" and 17" which makes them easily portable like an attache case. Typical applications include VMEbus (3-12 slots), VXI, MULTibus II, etc.

| Heights:            | Widths:                                  | Depths:                          |

### Cabinates Model 47, 48 and Type 38 - 19" Enclosure

The Enclosure accommodates 19" subtracks, card cages as well as accepts 19" Plug-in units designed according to DIN 41494. It can be used as a table top model or as a stand-alone cabinet. Various models and colors available.

|                                                                                                                  |

| <b>Widths:</b> 19"                                                                                               |

**Accessories:** Telescoping rails, castors, bases, leveling feet, lifting eyes, grounding sets, slide/glide rails, coupling sets, drawers, pull-out trays, top covers with fan, slide-in fan trays, sealing kits, etc.

### 19-Inch Universal Enclosure, Model 14

**Application:** Model 14 Enclosures feature extrusion construction with scratch resistant top and bottom cover plates. They are available in rack-mount and desktop configurations from 1.75" (1u) to 21" (12u) in height and from 9" to 26" deep. These enclosures can be used to house any electronic components as well as VME Systems. Accepts card sizes of 3u, 6u, 9u, 4.4", 4.5", 9.65" and card depths of up to 400 mm.

### Ruggedized Case Model 33

This all aluminum instrument case consists of U-shaped extrusion which defines the width and height of the case. As the whole case is an extrusion, this compact case is highly stable and rugged. Mounting grooves in the bottom and on the sides allow parts to be mounted directly, without any extra hardware. The sealed aluminum construction guarantees good screening, shielding and meets class IP54/NEMA standards.

# Modular System Enclosures

ELMA Electronic Inc.

A Member Of The Sulzer Group, 44350 Grimmer Blvd.  
Fremont, CA 94538 • (510) 656-3400, Fax: 510-656-3783

**Consistent High Quality For Over 30 Years**

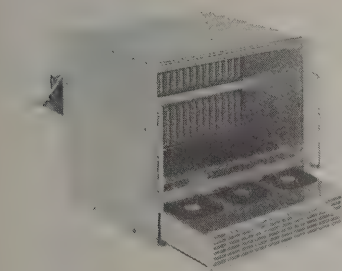

ELMA offers both standard and custom solutions for a wide variety of bus standards including VME, VXI, SUNbus, Multibus II, PC and many more. In addition, ELMA system enclosures are designed to meet most of the international standards including UL, CSA, TUV, FCC, VDE, and IEC. ELMA's

**For complete information  
write or call for our 450 page  
free hardbound catalog today!**

unique modular approach satisfies a wide range of applications with off-the-shelf parts, eliminating expensive and time consuming custom work. ELMA covers your requirements, starting from individual components up to fully wired and tested 'ready-to-run' systems.

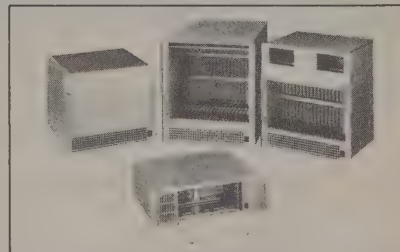

## SYSTEM 12

ELMA System 12 enclosures are fully shielded and designed to be in compliance with UL, FCC and other International standards. Products include both rackmount and desktop enclosures in sizes from 2U to 15U. A full range of depths and slot capacity are available. Designed to accept VME, VXI, Multibus II, SUN and PCbus boards.

Shown at the left is a 21 slot, 9U system which features a removable fan tray and hinged power supply for easy access. A 1U clearance on top accommodates any cable requirements.

- Designed for rackmount and desktop use
- Available in 5, 7, 12, 15, 18, and 21 slot versions
- Fully shielded with enhanced front and back shielding kits

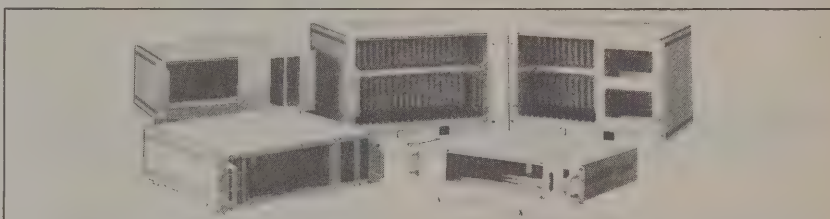

- Designed to meet military and industrial standards and UL, CSA, FCC & TUV requirements
- Available in standard and custom designs
- Excellent air flow system

## SYSTEM 14

System 14 (Universal) enclosures feature extrusion construction with scratch-resistant top and bottom cover plates. They are available in rack-mount and desktop configurations from 1U to 12U in height and from 9 to 26" deep. Boards can easily be recessed in this model. Designed to accept VME, VXI, Multibus II, SUN and PCbus boards.

Suitable for desktop or rack mount applications, the system is completely wired and tested with P1 and P2 backplanes. Includes switching power supply.

- Rackmount and desktop configuration
- Available in 3, 5, 7, 9, 12, and 21 slot versions
- Rugged extruded aluminum enclosure

- Optional, scratch-resistant top and bottom cover plates
- Recessed front for clean appearance
- Horizontal or vertical board orientation

## SYSTEM 32

The Type 32 ELMA system enclosures are designed for desktop, portable or tower use. This lightweight all-aluminum construction comes in 2U, 3U, 4U, 6U and 13U heights/widths (1U=1.75"). Depths are from 10 inches to 26 inches. Cover panels are scratch-resistant vinyl clad with a choice of several colors. This system can accept VME, Multibus II, PCbus and SUN boards up to 12 slots.

- Tower or desktop use
- 3, 5, 7, 9 and 12 slot versions
- Convenient tower handle

- Available in various depths and heights
- Standard or custom design
- Options include hood, handle or chord wrap

# Emcor Enclosures... A Choice for You!

- SELECTION –** Emcor features over 9,000 catalog items from five unique enclosure lines; the broadest assortment of component accessories and stock options in the industry.
- FLEXIBILITY –** Emcor offers unmatched modification and custom fabrication capabilities using the latest CAD/CAM technology to provide enclosures and consoles exactly to your specifications.
- SERVICE –** Emcor provides personal attention to every detail of your enclosure requirement. Qualified technical assistance is available at anytime just for the asking.
- DELIVERY –** Proven experience, efficient manufacturing processes and unmatched attention to detail result in over 99% of all customer orders shipping on schedule.

**EMCOR®**
*See which enclosure meets your needs...*

## INSTANT EMCOR ENCLOSURE STOCKING PROGRAM

Emcor offers the largest and most flexible **ship from stock** program in the industry. With Instant Emcor, you receive enclosures just the way you want them: **fast**, with **unequaled quality**.

### Instant Emcor Program Features

- Shipment in **5 working days** in pre-selected smooth finish colors.
- Shipment in **10 working days** in either a smooth or textured paint finish. Select from 16 contemporary colors.
- Vertical, slope front, low silhouette, turret and instrument style frames.
- Computer support furniture
- Plexiglass window doors
- Packaged blowers and fan trays
- Electrical plug strips and bus bars
- A full complement of **component accessory items** to meet your packaging requirements including steel doors, multi-bay writing tops, closure panels, chassis guides and more...

### Instant Emcor Product Lines

- **ESQ...** our **most popular** enclosure line offering the **widest selection** of stocked frames and components. Many different frame and console configurations are available in both the five and ten day shipment programs. Choose from vertical, slope front, low silhouette and turret frames.
- **10 Series®...** Emcor's **most rugged** enclosure, with fully welded and seamless frame corner construction. Our fastest growing line is available in both our 5 and 10 day shipment programs. Select from vertical and slope front frames.
- **Emcor I...** the **original** Emcor enclosure system, offers 10 day shipment of vertical frames with a stylish radiused appearance.
- **CompuDesk®...** Emcor's quality line of **computer support furniture**, available from our 5 day shipment program. Desks and auxiliary electronic pedestals include provisions for **19" equipment mounting**.

**Today, speed often means success. You can't afford to wait for enclosures. With Instant Emcor, order on a Monday, and we'll assemble and ship by Friday.**

EMCOR PRODUCTS/CRENLO, INC. ROCHESTER, MN 507-289-3371

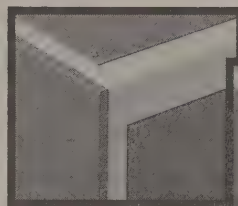

**EMCOR**®

## ESQ and EMCOR I ENCLOSURE SYSTEMS

The **ESQ enclosure system** should be your choice for applications requiring a clean contemporary appearance and an efficient means for housing your electronic equipment.

The **Emcor I enclosure system** should be your choice for applications when a rounded or **soft, radiused**

**appearance** is preferred. Both enclosures provide the benefits of **economy, style** and **quality** along with substantial load capacity, fully welded construction and the proven built-in dependability of Emcor Products.

ESQ

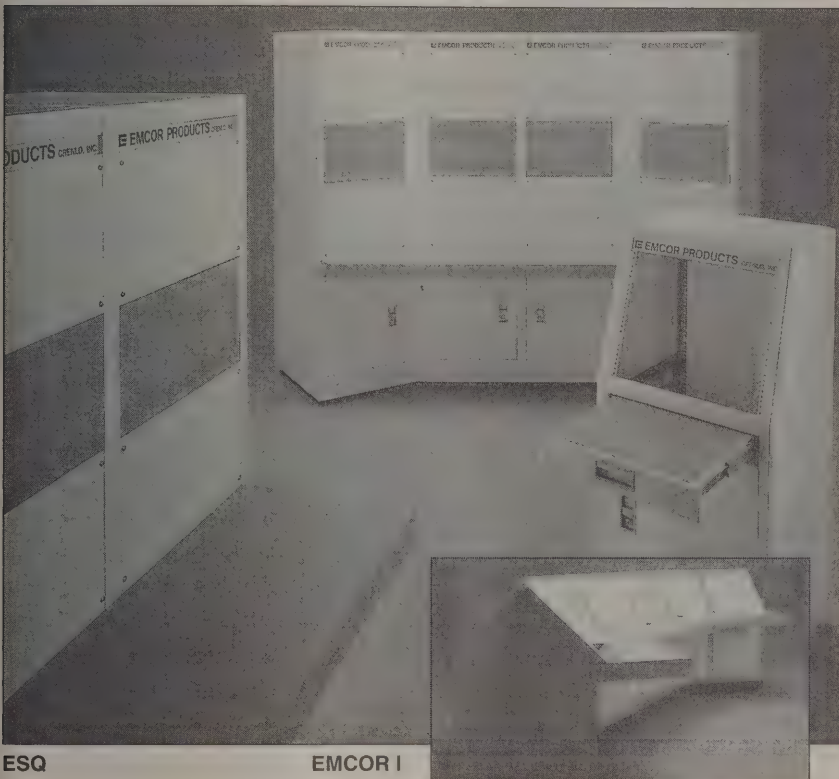

EMCOR I

### ESQ / Emcor I Construction Features

- **Fully modular systems** offering unlimited console configurations and a full complement of accessory options.
- Every frame is **fully welded** using quality **14 and 16 gauge steel** material.
- Quality construction offers up to **800 pounds** of evenly distributed equipment mounting in static load conditions.
- All items utilize high quality alkyd base **baking enamel paint** in a smooth or textured finish.

### ESQ / Emcor I Component Features

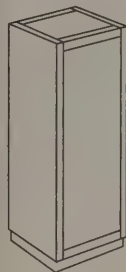

To complete your enclosure system, you can select from an extensive line of **accessory items** such as side panels, steel doors, window doors, closure panels, drawers, shelves, writing tops, fan trays, fan panels, blowers, filter assemblies...and much more.

ESQ

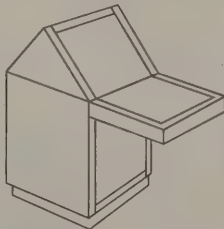

EMCOR I

### ESQ / Emcor I Design Features

Seven ESQ frame styles and eight Emcor I frame styles, available in 19", 24", and 30" panel widths.

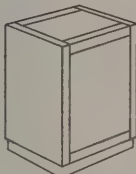

**ESQ / EMCOR I VERTICAL FRAMES**  
7 SIZES: 35" to 78-3/4" USABLE PANEL HEIGHT.  
22", 25-1/2", 30-3/4" IN DEPTH.

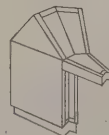

**ESQ / EMCOR I LOW SILHOUETTE FRAMES**  
19-1/4" and 21" SLOPE OPENINGS.  
22", 25-1/2" BASE UNIT DEPTHS.

**ESQ & EMCOR I SLOPE FRONT FRAMES**  
10-1/2", 17-1/2" and 24-1/2" SLOPE OPENINGS.  
22", 25-1/2", 30-3/4" IN DEPTH.

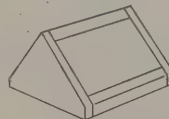

**ESQ / EMCOR I DESK AND COUNTER HEIGHT FRAMES**  
21" and 28" USABLE PANEL HEIGHT.  
18-1/2", 22", 25-1/2", 30-3/4" IN DEPTH.

**ESQ WEDGE FRAMES:**  
30°, 45°, 60°  
FOR USE WITH VERTICAL, SLOPE FRONT, LOW SILHOUETTE, DESK & COUNTER HEIGHT FRAMES.

**EMCOR I WEDGE FRAMES**  
30°, 45°, 60°, 90°  
FOR USE WITH VERTICAL, SLOPE FRONT, LOW SILHOUETTE, DESK & COUNTER HEIGHT FRAMES.

**ESQ / EMCOR I TURRET FRAMES:** 19°, 35°, 55°  
10-1/2", 14", 17-1/2" and 21" SLOPE OPENINGS.

**ESQ / EMCOR I WORK WRITING TOP FRAMES**  
15", 18-1/2", 22", 25-1/2" WRITING TOP DEPTHS.

**EMCOR I INSTRUMENT FRAMES**  
8-3/4" to 21" USABLE PANEL HEIGHT.  
16-5/16" IN DEPTH.

**EMCOR**®

## 10 SERIES® ENCLOSURE SYSTEM

The **10 Series**® enclosure system is your choice for applications requiring **exceptional strength** and weight load capacities while providing contemporary styling at a **reasonable cost**.

### 10 Series Construction Features

- 10 Series frames are constructed from high quality **14 gauge** cold rolled steel that is **multi-formed** into a 1-3/4" wide frame channel. All corner joint seams are **fully welded** for strength and metal finished for a **clean appearance**.
- **11 gauge** corner gussets are welded in the bottom of all 10 Series floor standing frames. Designed to add **rigidity** to the frame structure, these gussets also provide for floor tie down or caster and leveler mounting without the use of an optional pontoon base.
- 10 Series fully welded heavy-duty construction offers up to **3,500 pounds** of evenly distributed equipment mounting in static load conditions.
- All 10 Series floor standing frames are equipped with two pairs of plated **multi-formed** 14 gauge **adjustable** panel mounting angles and an applicable hardware kit.

- All 10 Series parts are painted with a high quality alkyd base **baking enamel paint** in a smooth or textured finish.

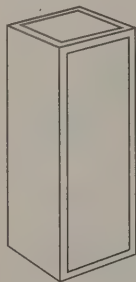

### 10 Series Component Features

To complete your 10 Series enclosure system, you can select from a comprehensive line of **accessory items** such as side panels, steel doors, window doors, lift kits, closure panels, drawers, shelves, writing tops, fan trays,... and much more.

### 10 Series Design Features

Five frame styles, available in 19" and 24" panel widths.

#### 10 SERIES VERTICAL FRAMES

8 SIZES: 35" to 78-3/4"  
USABLE PANEL HEIGHT.  
26-5/16", 31-9/16", 36-7/8"  
IN DEPTH.

#### 10 SERIES DESK & COUNTER HEIGHT FRAMES

26-1/4" and 33-1/4" USABLE PANEL HEIGHT.  
26-5/16", 31-9/16", 36-7/8" IN DEPTH.

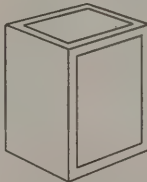

10 SERIES TURRET  
FRAMES: 45°, 90°  
MULTI-SLOPE DESIGNS.

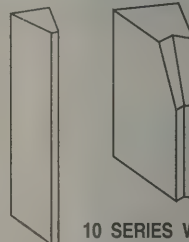

#### 10 SERIES SLOPE FRONT FRAMES

17-1/2" and 21" SLOPE  
OPENINGS.  
26-5/16", 31-9/16"  
IN DEPTH.

10 SERIES WEDGE  
FRAMES: 30°, 45°  
FOR USE WITH VERTICAL,  
SLOPE FRONT, DESK &  
COUNTER HEIGHT FRAMES.

## COMPUDESK® WORKSTATION SYSTEM

**CompuDesk**® is a comprehensive line of high quality heavy-duty terminal work stations and single unit assemblies. The basic desk unit is configured by selecting **modular** pedestal options and accessory items to accommodate your system's function. Also available in the Instant Emcor Program, our most popular CompuDesk units and accessory items are **stocked** to meet your immediate work station needs.

### CompuDesk Construction Features

- All CompuDesk components are constructed of **14 and 16 gauge** high quality steel.
- Options include **19" rack mountable** electronic pedestals as well as utility storage drawer styles.
- Three distinctive **desk top styles** - plain, accent edge or inlay to match your particular interior decor.

**EMCOR®**

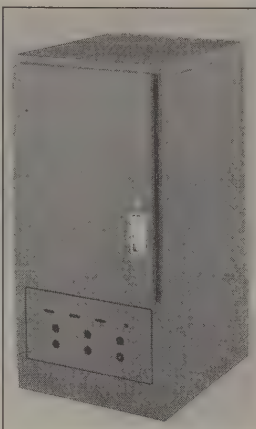

# EMISSION CONTROL SHIELDED ENCLOSURES

## FCC STYLE

Emcor's complete line of **modular** EMI/RFI FCC level **shielded enclosures** and accessories is a perfect combination of quality and styling. **Tested to MIL-STD 285** at a certified test facility, this Emcors shielded enclosure line provides **44DB attenuation at 800 MHZ.**

### Construction Features

- Fully welded **14 gauge** steel **multi-formed 1-3/4"** wide frame channel. All corner joint seams are welded and metal finished.
- Heavy duty construction offers up to **3,500 pounds** of evenly distributed static loaded equipment mounting.
- Frames, doors and all bolt-on components are **fully zinc plated** for electrical conductivity.
- Rigid door design with a **multi-point latching** system.
- A highly conductive, galvanically compatible **wire mesh gasket** is used on all bolt-on items.

## MILITARY/TEMPEST STYLE

Emcor's complete line of EMI/RFI shielded Military/Tempest Style enclosures offers the flexibility of a **modular** enclosure system along with **superior shielding** performance not available from other manufacturers. **Tested to MIL-STD 285** at a certified test facility, this Emcors shielded enclosure line provides **84DB attenuation at 1GHZ** and has been **tested up through 10 GHZ.**

### Construction Features

- Superior strength - with **12 gauge** steel, **fully welded** and metal finished for strength and a clean appearance.
- Heavy-duty construction - offers up to **4,000 pounds** of evenly distributed static loaded equipment mounting.
- **Fully nickel plated** - for superior conductivity and hardness.
- **Patented door design.**
- **Beryllium copper** spring-finger gasketing.

### FCC Emission Control Design Features

Two frame styles, available in 19" and 24" panel widths.

#### FCC VERTICAL FRAMES

10 SIZES: 26-1/4" to 78-3/4" USABLE PANEL HEIGHT. 26-5/16", 31-9/16" IN DEPTH.

#### FCC SLOPE FRONT FRAMES

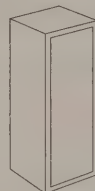

17-1/2" AND 21" SLOPE OPENINGS 26-5/16", 31-9/16" IN DEPTH.

### Military/Tempest Style Design Features

Available in 19" and 24" panel widths.

#### MILITARY/TEMPEST VERTICAL FRAMES

6 SIZES: 26 1/4" to 78-3/4" USABLE PANEL HEIGHT. 28-5/16", 33 9/16", 38-7/8" IN DEPTH.

## MODIFICATION AND CUSTOM DESIGN

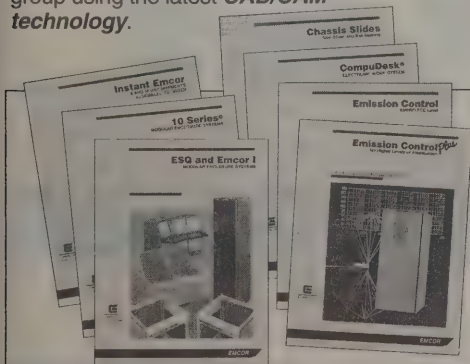

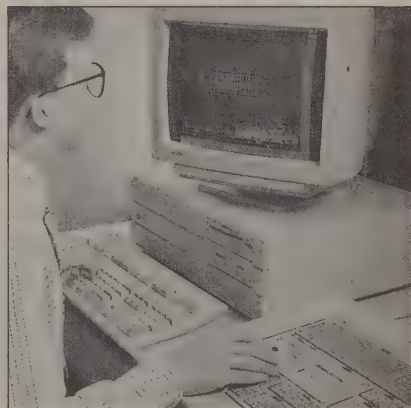

No one is better suited to provide enclosures and consoles **exactly to your specifications** than Emcors. From holes, cutouts and knockouts to special configurations, sizes and shapes - Emcors will solve your unique electronic enclosure needs.

Emcor's **full service design** capability starts with a factory sales staff and field representatives who understand your enclosure needs. Then you'll benefit from our experienced design engineering group using the latest **CAD/CAM technology.**

Emcor has a group of **skilled metal fabrication craftsmen** dedicated to custom work. Lower volume requirements are handled in one of two specialty shops; higher volume requirements are run through our modern **600,000 square foot** production facilities.

**Get exactly what you want from Emcors.**

Emcor engineers utilize multiple **CAD/CAM workstations** in support of product design needs, as well as in the production of NC tapes for our tape controlled punch presses.

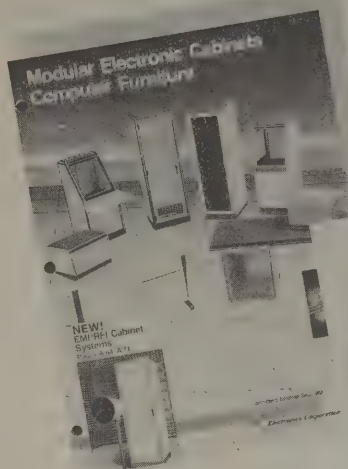

### Call or FAX Emcors for more information

Complete, full color catalogs are available for each of our product lines. Call **1-507-289-3371** or FAX **1-507-287-3405** for **free** copies of the catalogs you need:

- Instant Emcors
- ESQ/Emcors I
- 10 Series
- CompuDesk
- FCC Emission Control
- Military/Tempest Style

## Standard, Modified or Custom Electronic Cabinets . . .

*Equipto Electronics  
meets the challenge*

Equipto Electronics' wide variety of cabinet lines, with their numerous sizes and features, meet a wide array of requirements. This means you can receive proven quality and versatility without the expense of custom designed systems . . . and, many of our products are available in "5 Day Express" service.

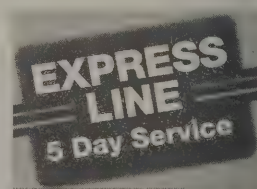

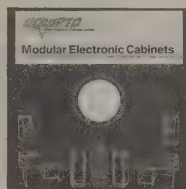

However, if modifications or custom design is required, our experienced engineers will personally consult with you. They'll furnish reproducible drawings showing inside clearances, panel areas, overall heights and widths, and other required information. Provided at no charge, this service can take the entire design load off your shoulders.

The cabinets, desks and computer furniture we manufacture are shown and briefly described here. For complete details, or our printed and electronic catalogs, call today (708) 897-4691.

## Heavy Duty Modular Electronic Cabinets

The "top of our line." Total quality. Very rugged ... probably the strongest cabinet available anywhere. Can be gasketed against dust or moisture. Double-ledge, double-plane corners give sway proof stability; sag proof doors. Rugged EIA mounting angles and support channels can be moved or removed to accommodate equipment changes. Custom modifications are available.

The Heavy Duty line is also available in two designs with shielding to suppress EMI/RFI and a model that is seismic hardened and successfully tested through Zone 4, the most severe test.

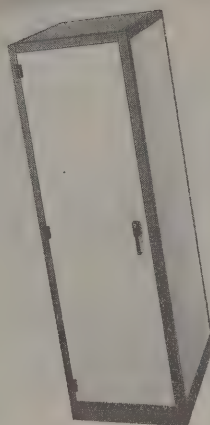

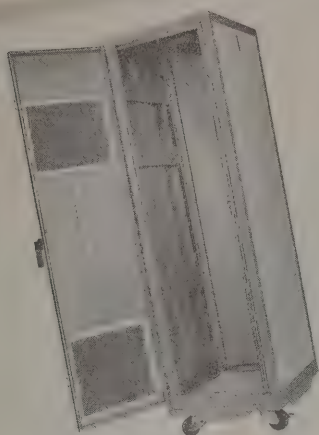

CAB-NET™ is our electronic catalog. Try it now! See back cover for details.

Committed to Excellence Since 1960

**EQUIPTO**  
Electronics Corporation

351 Woodlawn Avenue Aurora, Illinois 60506-9988 Telephone (708) 897-4691 Fax [708] 897-5314

## Heavy Duty EMI/RFI High Reliability Stainless Steel Modular Electronic Cabinets

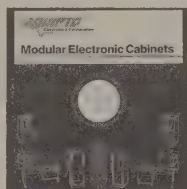

Our unique stainless steel cabinet design, with the application of gasketing material, provides the most advanced electronics cabinets available for suppression of radio frequency interference (EMI/RFI).

These High Reliability cabinets overcome the problems inherent in other shielding systems, where galvanic reaction between dissimilar metals used causes rapid deterioration of shielding effectiveness.

Equipto Electronics' EMI/RFI design eliminates the need for special hardware that restricts access to the cabinet interior. Cabinets are offered with modularity and custom modifications.

## Heavy Duty FCC/VDE Level Shielded Modular Cabinets

A rugged, modular EMI/RFI cabinet that provides high attenuation at low cost. Meets FCC/VDE or other EMI requirements making it ideal for a variety of commercial and industrial requirements. Built to the specifications and with the features of Equipto Electronics' "top of the line" Heavy Duty cabinets. Easily holds over 3,000 pounds of equipment. The top choice for strength, versatility and reliability, plus cost efficiency in EMI/RFI shielding.

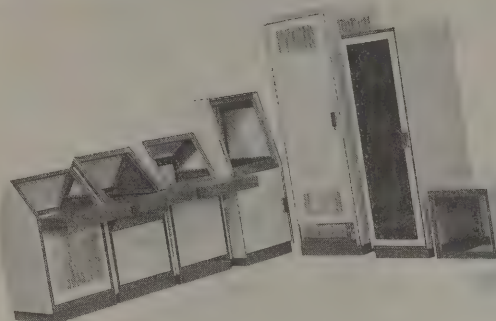

CAB-NET™ is our electronic catalog. Try it now! See back cover for details.

Committed to Excellence Since 1960

Electronics Corporation®

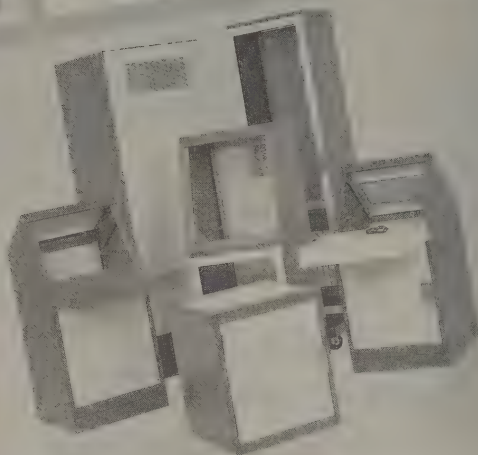

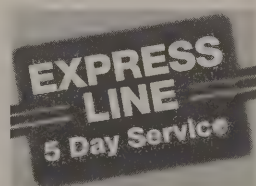

351 Woodlawn Avenue Aurora, Illinois 60506-9988 Telephone (708) 897-4691 Fax (708) 897-5314

## Challenger Commercial Duty Modular Electronic Cabinets

Designed to be functional — priced to be competitive! Challenger takes on all other cabinets for modularity, versatility, function and economy. The Challenger line offers big size selection, modular design, all welded construction, EIA panel mounting angles that can be recessed, and mar-proof mounting screws. With no charge for special colors and custom modifications, Challenger is your best buy.

## Solid System Economical Modular Electronic Cabinets

Our most economical vertical racks and sloped front consoles. Features a "solid" non-removable side panel, wide variety of sizes and configurations plus a complete accessory selection, including blowers and fans. Versatile with custom modifications available.

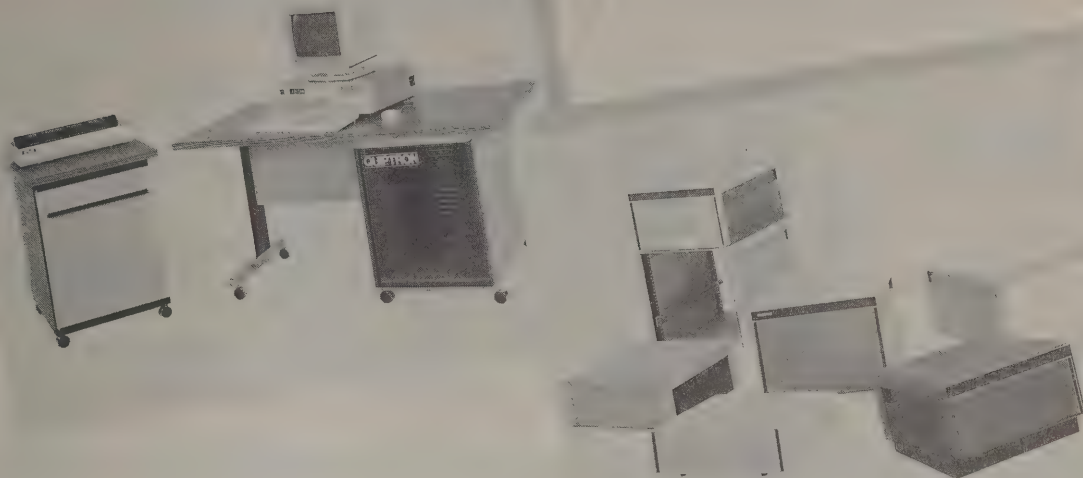

CAB-NET™ is our electronic catalog. Try it now! See back cover for details.

## Quiptron® Modular Electronic Work Stations

Quiptron brings the advantages of modular design to increase a data processing department's productivity. Products include modular work stations, CRT stands, printer stands, storage drawer compartments, pedestal compartments, work stations with electronic compartments, angular work stations and a wide array of accessories. Electronic compartments feature adjustable mounting angles with EIA hole spacing. Custom modifications are available.

## Economical Instrument Cabinets

Available in all-aluminum or all-steel construction, these economical instrument and equipment cabinets are available in 60 standard sizes, two widths, three depths, 10 heights and unlimited "custom-made" sizes in 12 standard colors or your custom colors. The clean, contemporary styling is modular with standard EIA mounting angles. Features the same quality and strength which made Equipto Electronics the industry pacesetter for electronic cabinets and desks.

## "TECH-BOX" DIMENSIONAL CHARACTERISTICS

## ADVANTAGES "TECH-BOX" EXTRUDED ENCLOSURES

- Cut to any desired length
- Circuit card slides into slots
- Panels included – custom configuration
- Variety of finishes & fasteners
- No extrusion tooling/die charges
- Integral RFI/EMI shielding
- Attractive & lightweight
- Grooves for rubber feet
- Detents for applying label
- Ship from stock

## WE ALSO OFFER CUSTOM SHAPE PROFILES TO YOUR OWN SPECIFICATIONS

| Standard Rectangle | Cover & Base | Matched Angles | Open Ended |
|--------------------|--------------|----------------|------------|
|                    |              |                |            |

# ANGLE-TECH<sup>®</sup> by Flexible Furniture

Manufacturers of Quality Angle Steel Furniture

## Compare these Angle-Tech<sup>®</sup> features before you make your final decision:

**1** All metal is high-quality furniture grade cold rolled steel, free of defects and in U.S. gauges.

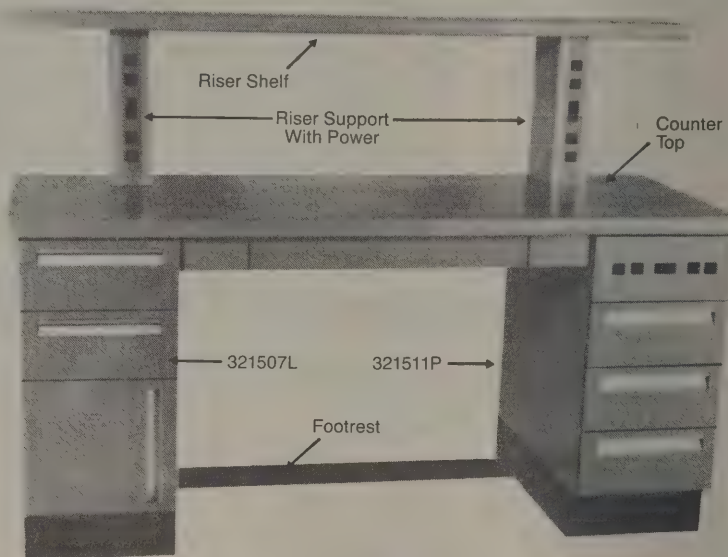

**2** All components are produced on precision tooling, jigs and fixtures to provide consistent high quality product with uniform dimensions and clearances.

**3** Angle-Tech<sup>®</sup> Electronic Workbenches offer the quality, durability, beauty, and functional efficiency you desire to bring pride to the tech area.

**4** Angle-Tech<sup>®</sup> combines quality materials, creative engineering, experienced manufacturing personnel, and factory trained sales and design force for an unbeatable end result.

**5** Drawer suspension is comprised of two-member ball bearing slides, allowing 80% clear access to the drawer body. File drawers project beyond the pedestal for maximum access to contents. All drawers and doors have bumpers for quiet operation. All pulls recessed for safety and convenience.

**6** Fabricated steel parts and assemblies are pre-treated in a five-stage spray cleaner and bonderizing unit, heat dried, then fully immersed in an electrodeposition water-based epoxy resin paint and baked to obtain a uniform base coat. A finished coat of baked-on electro-static applied alkyd base enamel paint in standard Angle-Tech<sup>®</sup> colors or special colors is applied to exterior surfaces. Standard underbase color is black.

**The AT8AM**  
Angle-Tech Electronic Workbench

## The AT8AM Angle-Tech Electronic Workbench - One of a Multitude of Configurations Available

*Whether your need is for a single workstation or a complete multi-room facility, we are capable of meeting your needs. Our staff is unsurpassed in its ability to answer your questions and assist you with a layout and design to meet your specific needs. To find out more about our quality product and dedication to service, please call or write to receive our catalog and specifications.*

Gemini specializes in custom designed cases for industry. We have the capability to design a case specifically for your product and follow through from prototypes to production. If you are currently purchasing a standard case from another manufacturer, we may be able to duplicate that case at a lower cost. We welcome the opportunity to quote your case requirements and to work with you on design.

## REUSABLE SHIPPING CONTAINERS Engineered Protection

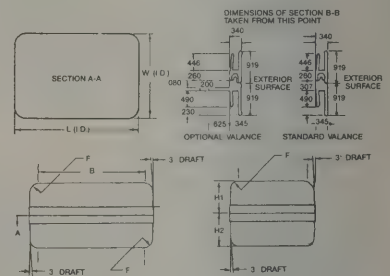

| MODEL       | INSIDE DIMENSIONS |

Gemini's standard line of **HEAVY DUTY TRANSIT CASES** are constructed from high density polyethylene, and extremely tough and resilient material ideally suited to the abuses transit cases are subjected to. The heavy wall (.100" nominal) shells and heavy duty 1.838" wide #6063 T52 aluminum valance combine to form a container capable of transporting delicate portable instruments under the most adverse conditions. Available with recessed wheels and folding handle.

Gemini's standard line of **HEAVY DUTY CARRYING CASES** are constructed from rugged A.B.S. and feature a heavy wall aluminum valance to provide an extremely rugged case with contemporary lines for transporting delicate portable instruments under the most demanding conditions.

## Standard Features Include:

- .100" to .150" nominal wall black A.B.S. shells
- variable case depth
- heavy wall 1.838" wide #6063 T52 aluminum valance with dust seal
- choice of handle, latch, hinge and bumpers

# Complete electronic packaging solutions from General Devices

## Chassis Trak® Telescoping Slides

**Solid bearing** — rugged, economical, durable

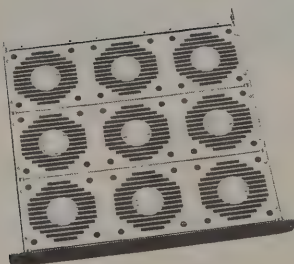

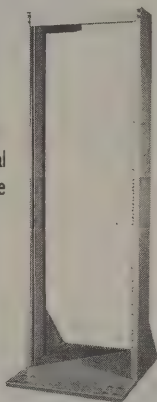

**Roller bearing** — rollers at stress points to handle extreme loads

**Ball bearing** — precise, smooth travel ideal for delicate instrumentation, now featuring the **Green Button™** release for safe, "ouchless" operation

**Bottom mount** — heavy load-bearing capability with ease of extension

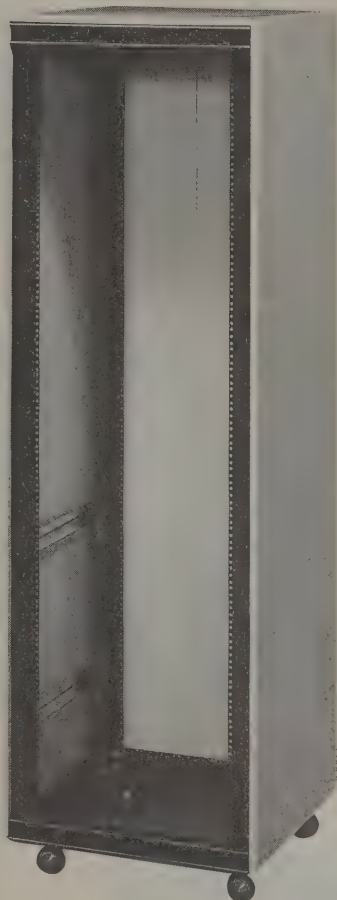

## Knock-down Cabinets and Racks

Broadcast and commercial cabinets and racks that are kept in stock and shipped knocked down, ready for assembly

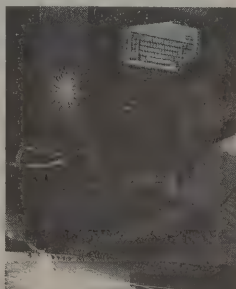

## Hardware and Accessories

- Cooling modules
- Card frames and chassis
- Handles and pulls
- Retractable and stationary shelves
- Storage drawers
- Cabinet panels
- Cable carriers and guides

## Custom Fabrication and Assembly Services

including cutting, stamping, forming, welding and finishing for prototype or high-volume quantities

## Vent Rak® Cabinets and Enclosures

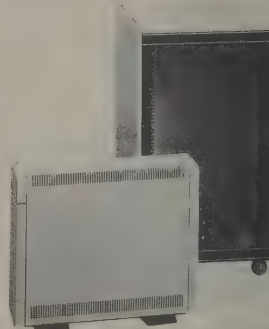

**Techtower™** — compact, desk-side cabinet, aesthetically pleasing; accessible from all sides

**Commerical cabinets** — strength and versatility combined

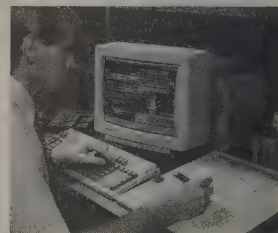

**Military grade cabinets** — reliable cabinets for tough conditions

**EMI/RFI shielded cabinets** — effective shielding against electronic "crosstalk"

**Seismic cabinets** — protect equipment in extreme environments

**Custom Engineering Services** including design solutions for slide- or enclosure-related application specifications

# The Hammond Alternative For Small Cases and Rack Packaging

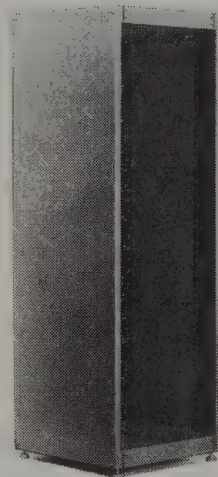

## Electronic Rack Systems

- Quick access side panels
- Standard leveling feet
- Heavy duty construction
- Adjustable bottom panels
- Built-in castor mount
- Attractive ID trim
- Plexiglass door

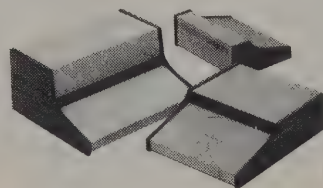

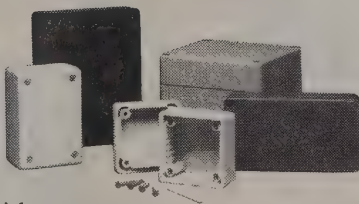

## Console Racks

- 19" or 24" rack mount panel width
- 49" overall height
- 24.5" or 31.5" deep
- Available in a wide range of colors
- Accessories include rack mount desks, front and rear doors and a wide range of universal accessories

## Plastic and Aluminum Diecast Boxes

- Over 50 models to choose from
- ABS plastic cases
- Aluminum diecast cases
- ABS Plastic consoles
- EMI/RFI shielded plastic or metal cases
- Water tight metal cases
- Available in a wide variety of colors and finishes
- Custom punching and screening

## Desktop Cases and Consoles

- Hundreds of models in a wide range of colors and materials
- SCED and SCEH consoles shown here feature real walnut wood sides

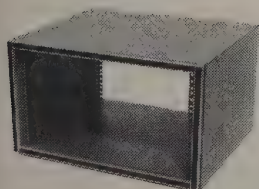

## ABS Plastic Instrument Cases

- Available in 4 colors and multiple sizes
- Flame retardant ABS plastic
- Integral P.C. mounting slots
- Two piece construction

## 19" Panel Mount Rack Cases

- Panel heights 3.25" to 28.0"
- Depths 13.5" and 17.5"
- Available in a wide range of colors
- Many Universal 19" Accessories
- Integral front and rear panel rails use 10-32 clipnuts or panel mounting

2) Specified in TE/HP = Horizontal pitch = 5.08 mm

19" Mountable/Benchtop Enclosure

Modular case with vent slots in bottom cover and rear panel

Standard features

- 2 Side extrusions
- 2 Cross extrusions, front
- 2 Cross extrusions, rear
- 4 Seals
- 2 Adaptors, front
- 2 Adaptors, rear
- 2 Side covers (only in version without handle)
- 2 Handles (only in version with handle)
- 1 Bottom cover with vent slots (sheet steel)
- 1 Top cover (sheet steel)

Temprack and Double Pro rack are also available in EMI/RFI and Nema models.

# SUPER TIME SAVER!

**D**o you work with ICs? Do you have trouble finding the IC you need? Are you sick and tired of sifting through dozens of manufacturers' data books? Do you have trouble comparing one set of specs to another? Are you sick and tired of wasting time?

Do we have good news for you! Get your hands on the latest annual copy of the IC Master. The Master will save you both time and money. Here's how.

The Master lists every single IC you can buy. Better yet, the Master lists ICs by function. You know what you want to do. The Master tells you who makes what for what you want to do.

There's more! The Master lists every known alternate source to every integrated circuit. If somebody makes a substitute for an IC, the Master tells you. And fast!

Want to find a custom or semicustom IC? The Master tells you who the manufacturers are, what their capabilities are, and what design tools you need.

Looking for a distributor or a local sales office? The Master tells you where they are. Got a technical problem? The Master tells you who to call. Can't figure out a part number? The Master tells you how the part number systems work.

There's more! The Master has a section on micro-processor development tools with complete performance parameters. There's another section on programmable logic devices giving you everything from output configuration to PLD development systems.

Want to know if there's an application note available on a given part? The Master tells you!

If your question has anything to do with integrated circuits, you need the IC Master. Subscribe now by calling (516)227-1314. Ask for Marie Botta. Tell Marie you need the Master now.

If you prefer, write to Marie, Hearst Business Communications, 645 Stewart Ave., Garden City, NY 11530. She'll mail you the IC Master subscription form right away.

And, if you tell her you saw it in the 1992/93 EEM, she'll take \$10 off the subscription price!

## Premium Enclosures

**Lansing Enclosures save you time.** Their proven, pretested designs deliver ready-to-use, reliable performance, reducing lead time, prototyping, and production problems. And they're designed for fast, efficient assembly.

**Lansing Enclosures save you money.** Low-volume buyers benefit from our economical, established designs and proven performance; high-volume buyers save even more. Either way, we'll work with you to achieve the most economical solution for your situation — a solution that takes into account both purchase price and related production costs.

**Lansing Enclosures meet your specific requirements.** They're designed to make the addition of your product details fast and economical throughout prototyping and production.

**Lansing Enclosures add value to your product.** The sturdy, carefully engineered designs and quality construction afford maximum protection to your electronics. And best of all, Lansing Enclosures give your product a solid, precision-manufactured look and feel that tells your customers — in a way facts and figures

### MicroPak™

**For small freestanding, rack-mounted, or hand-held instruments.**

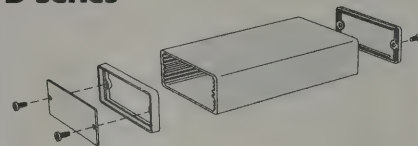

Extruded aluminum bases incorporate an integral circuit board mounting system.

#### C Series

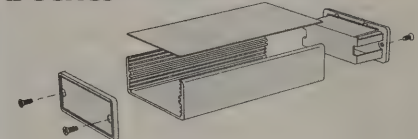

Extruded aluminum base with non-skid feet, vinyl-clad steel cover, plastic bezels, and aluminum end panels.

#### D Series

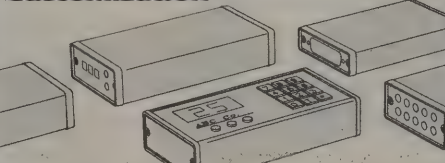

Extruded tubular aluminum body and a variety of end configurations, including battery compartment. Non-skid feet optional.

#### E Series

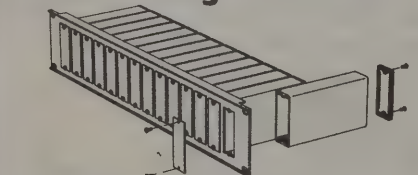

Extruded aluminum base with non-skid feet, slide-in top panel, and a variety of end configurations, including battery compartment.

#### Customization

Call Technical Support to discuss custom machining, finishes, and graphics.

#### Rack-Mounting Accessories

Available in a variety of configurations to hold multiple MicroPak Enclosures in a standard 19" rack.

(All dimensions in inches.)

never can — that yours is a quality instrument. Yet the basic design is simple and unobtrusive — it's your choice of configuration, special fabrications, finish, and graphics that determines your product's "personality."

**We get your Lansing Enclosures to you fast.** We keep a range of standard enclosure sizes in stock for immediate shipment, and our personal attention ensures quick delivery of even customized enclosures.

**Call toll-free for technical literature and a no-risk offer.** We'll send you full-color brochures as well as technical drawings and data. And because there's no substitute for having an actual enclosure in your hands, we'll also include a risk-free opportunity to obtain one or more GrayBox or MicroPak Enclosures at special prices.

Quick-Ship Program

# Now, your style and color shipped in 3 to 10 days.

## Introducing New Instant Optima Plus.

**Optima puts it all together.  
Huge selection, fast delivery,  
in just the right colors.**

- Optima EPS quality, design and performance—on time, on budget.
- Rugged, aluminum frame designs
- EMI/RFI shielded configurations
- Electronic desk systems
- EIA standard 19" instrument cases.
- Multi-application case system—Optima Instrumate.

**Reduce leadtimes  
and inventory problems.**

- Shipped direct from our factory to your assembly line, sometimes 24–48 hours from receipt of your order.
- Normal delivery only 3 days for our popular colors—and only 10 days for any of 11 standard colors.
- Power and cooling accessories, or other components for customizing your system are in stock
- Don't compromise quality for fast delivery—just call Instant Optima Plus.

**Call for your free catalog today!  
at (404) 496-4025 or  
Fax (404) 496-4041**

Vertical Cabinets

## Get the options you want with the professional look you need.

**You'll get a wide selection of design options, plus features you expect in a quality cabinet.**

Optima Quality Design Features:

- Exclusive extruded aluminum (alloy 6063-T5) frame designs make your system look more professional
- Side panels are independent of framework for easy assembly and equipment service
- Superior strength-to-weight ratio: design rated at 2,200 lb. static load
- Front and rear panel/chassis mounting rails (14 ga. CRS) with standard EIA spacing; also available as adjustable-recessed or heavy-duty (11 ga. CRS)
- Top panels available solid, ventilated or with exhaust fan provision
- Doors feature multi-point locking system with keylock; in solid, ventilated and acrylic
- Steel bases with caster brackets and leveling provision, also available with cable exit provision
- Proven paint adhesion and corrosion resistance via phosphate pre-treating and durable acrylic coating based on thermo setting, cross-linking resins
- Choose contemporary standard colors in smooth or textured finishes. Custom color-matching available
- Free design consultation and assembly

### Accessories

A broad line of universal options and accessories are available direct from Optima, including:

- Power distribution systems and outlet strips
- Cooling fans, fan packs, blowers, filters and grilles
- Doors, panels, drawers and shelves
- Hardware: handles, lifting eyes, slides, stabilizers, casters, multibay connector kits and more

EMI/RFI Shielded Cabinets

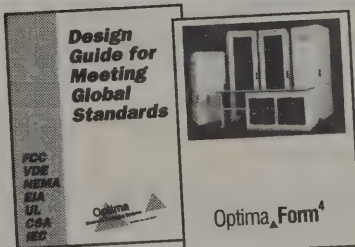

# Your system should look as good as it performs.

## There is a new standard for style and performance: Optima Form<sup>4</sup>.

New Optima Form<sup>4</sup> offers you a high performance, flexible packaging system to meet tough global EMC standards without sacrificing style.

Patented Form<sup>4</sup> features custom-engineered, shielded interfaces and

Call now for your copy of this important Design Guide and Optima Form<sup>4</sup> brochure.

advanced door closure techniques to yield independent RFI test levels in excess of 100dB from 10KHz to 1MHz.

Form<sup>4</sup> also meets UL 508-Type 12 spec, which makes it an effective barrier against dust and moisture. Its extruded aluminum frame is welded to provide a high strength-to-weight ratio.

Both 19" and 24" technology equipment are accommodated. Choose from a wide variety of accessories, sizes and colors.

**For more about Form<sup>4</sup> call  
Optima at (404) 496-4025  
or Fax (404) 496-4041**

## EMI/RFI Shielded Cabinets

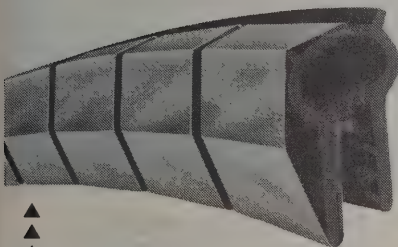

Optima® EPS

# Exceed global EMC standards with Optima's advanced design.

**Get peak attenuation levels in excess of 100dB.**

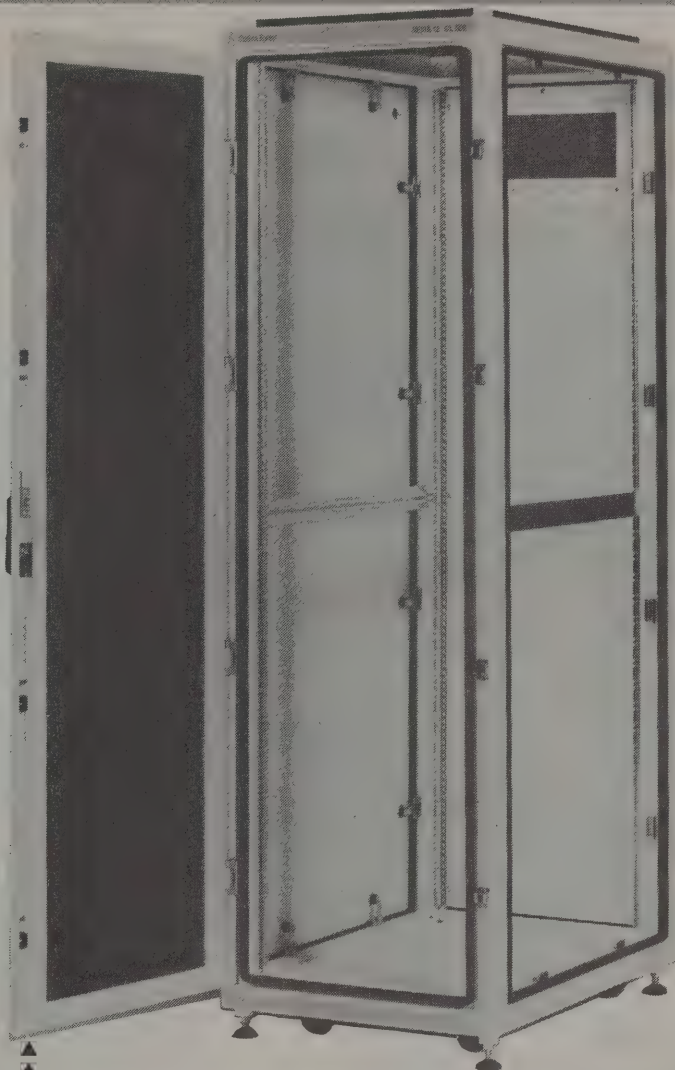

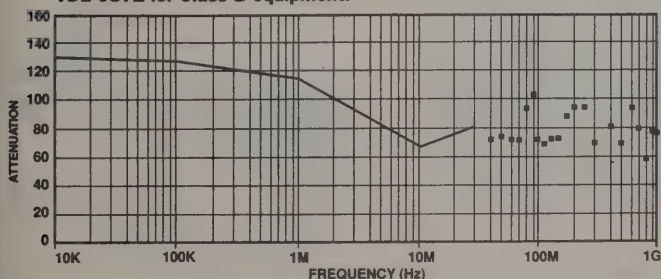

Optima EMC Performance Features:

- Welded interior corner joints provide strength and rigidity – eliminate RFI noise, dust, or moisture leaks.
- Even compression on all doors is assured with steel reinforcement and multi-point locking design
- Dual purpose EMC/UL 508 Type 12 gasketing protects sensitive electronics
- All hinges and locks are external to the continuous perimeter of gasketing
- Ventilated doors provide EMI/RFI protection at top, bottom or both
- Optional quick release sides feature multi-point fasteners distributed for even compression and quick access to cabinet interior

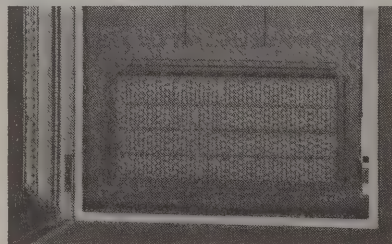

▲  
▲  
▲  
Optima's custom-engineered EMC gasket features independent spring-fingers of Beryllium Copper formed and fitted to the contour of a NEMA spec rubber gasket. Installation or on-site replacement is easy.

**RFI** cabinet attenuation levels for Optima Form® model #701930RF measured in accordance with the F.C.C. Docket Part 15, Subpart J for Class A equipment and VDE 0871 for Class B equipment.

▲  
▲  
▲  
Demanding EMC applications require an enclosure design with the structural integrity to withstand harsh environments, plus the flexibility to meet custom design modifications.

Proven BeCu gasketing is specifically ►►► design for each panel-frame interface to insure a continuous conductive path. Note: all Optima doors are designed to conceal gasketing when viewed from front.

# Solve your VME/VXI bus packaging problems fast, with Optima.

**Call Optima for fast delivery and technical support on your VME/VXI and Multibus II applications.**

From high-vibration environments to low-budget applications—Optima can meet your toughest requirements with AEG Intermas® subracks and complete electronic packaging systems.

You'll get prompt delivery on cost-efficient, off-the-shelf designs—each tailored to your needs and budget.

**Economy Series  
Flexible Series  
Heavy-Duty Series  
Vibration-Proof  
EMI/RFI Shielded**

Choose from five feature-packed subrack designs. Off-the-shelf, they'll meet 90% of your applications — and budgets.

**Call now for AEG Intermas® Design Guides for VME/VXI and Multibus II applications.**

Even custom modifications are available.

Optima also offers VME/VXI and Multibus II backplanes, extender boards, and a complete line of accessories, from ejector front panels to power supplies.

Whether you choose assembled systems or individual components, you'll get the quality and service you expect from Optima — and delivery when you need it!

AEG Intermas® — International Modular Assembly Systems — is exclusively distributed in North America by Optima.

## Why wait? Why inventory? Instant Optima ships in 3 days.

### Standard or EMI/RFI shielded

Get the configuration you want for prototyping or short-run needs:

- pre-assembled and boxed, ready for your electronics
- in popular sizes and colors in-stock
- with accessories for power, cooling and customizing your system

◀◀◀ Vertical cabinets, instrument cases, desks, subrack assemblies and accessories shipped from Instant Optima in 3 days.

Optima's modular construction adapts to your application and equipment mounting requirements. Custom designs also available. ▶▶▶

## For Tempest level and EMC applications.

### Optima Mil-Spec Cabinet System

The performance to meet tough government standards and the flexibility to meet your custom requirements for:

- EMI/RFI shielding
- shock and vibration
- chassis mounting and input/output
- shielded cooling systems
- structural strength and mobility'

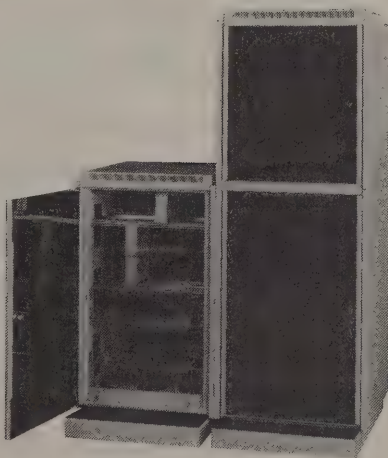

Call Optima for expert defense industry engineering support.

## A custom look without the custom cost.

### Stackable Optima MPS – design flexibility with a unique look

MPS performance features:

- sleek, modular construction with flexible component mounting options
- complete accessories for power, cooling and customizing your system
- EMI/RFI shielding available
- module heights: 13U, 19U, 25U; depths: 20, 24, 30"; widths: 19, 24"

# Electronic Enclosures...

That turn your good idea into a great one.

From Stock

Customized at  
very low cost.

- Over 200 standard enclosures available from stock.
- Inexpensive and easy to customize using PacTec's insert tooling technology.
- Easy to design into, easy to assemble.
- Molded-in mounting bosses, card guides, and board-capturing features reduce assembly time and costs.
- Molded-through color for long life, attractive appearance.
- Low cost options and accessories meet every design need.
- Impact-resistant ABS; flame retardant material meeting UL94V-0 available.

- EMI/RFI shielding available.
- Available in kits and production quantities.
- Standard colors include black, PC bone, gray, tan; custom colors available.

## Feature Highlights:

- Many new, ergonomic, high-style designs added!
- DESIGN TEAM will enhance and customize your design! See the information on our Product Selection Page and the beginning of this section, Page C-1002.

PacTec standard enclosures are stocked around the world.  
Call for the name of your local distributor or for more information.

# Model RC

## Hand Held Remote Control

### Features:

- Sleek, hi-tech, low-profile styling
- Molded through color ensures long life and attractive appearance
- Ergonomically designed for a "friendly," well-balanced feel
- Easy to design into—simple to assemble using four screws (provided)
- Standard colors: black and PC bone
- Insert tooling areas provide for design and function features at a fraction of the cost of custom enclosures
- Built-in ruby infrared lens for IR transmitters
- Battery compartment for two AA batteries...snap fit sliding door and battery clips included

- Designed with two card fixing positions so that PC boards are secured in place when covers are assembled, without the need for extra hardware or assembly steps
- Designed with ample area for connectors, power supply and charger jacks, telephone jacks, wire/cable attachment, and flat ribbon cable openings
- PacTec can provide custom membrane switch and panel overlays, taking single source responsibility for your design

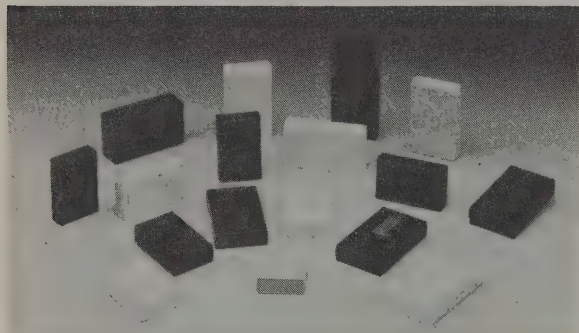

### Typical Applications:

- Remote actuators and controls
- Inventory control systems, bar code scanners
- Telecommunications controls
- Receivers, transmitters
- Alarms and security systems
- Audio and video controls
- IR, RF, and wired-in controls
- Medical remote control panels
- Products downsized through the use of surface mount technology (SMT)

| DIMENSIONS |       |        |       |
|------------|-------|--------|-------|
|            | Width | Length | Depth |
| Model RC   | 2.75" | 6.50"  | .80"  |

All models are available as prototyping kits — add the prefix "K" to the model order number

## JM/HM Series

- The smallest enclosures in the PacTec line, Model HM and JM series are ideal for keypads, pagers, transmitters, computer interfaces, controllers, pocket modems, remote actuators and controls, receivers, transmitters, and more.
- "9VB" denotes an internal 9-volt battery compartment; "L" designates longer length units; "ET" designates extra height.
- All models are available as prototyping kits or as production units. Prototyping kits are individually packaged and include all parts and hardware necessary for assembly. Production units include top and bottom covers, appropriate hardware, packaged in bulk. Panels for HM production units may be ordered separately. All models are available as prototyping kits — add the prefix "K" to the model order number.

| HM/JM SERIES | WIDTH | LENGTH | HEIGHT | BELT CLIP     |
|--------------|-------|--------|--------|---------------|
| JM22         | 2.40  | 2.27   | 1.00   |               |
| JM24         | 2.40  | 3.80   | 1.00   |               |
| HM           | 2.40  | 3.80   | .90    | HM-BC         |
| HM-9VB       | 2.40  | 3.80   | 1.00   | HM-9VB-BC     |
| HML          | 2.75  | 4.60   | .90    | HML-BC        |
| HML-9VB      | 2.75  | 4.60   | 1.00   | HML-9VB-BC    |
| HML-ET       | 2.75  | 4.60   | 1.40   | HML-ET-BC     |
| HML-ET-9VB   | 2.75  | 4.60   | 1.50   | HML-ET-9VB-BC |

Add a "K" prefix to standard model numbers for the prototyping kit version.

## HP/SH Series

- HP and SH handheld enclosures are available in 18 basic models, with a host of variations possible. The SH sloped top enclosure offers an attractive, sleek, ergonomic design. HP and SH enclosures are ideal for keypads, controllers, test equipment, data-entry devices, remote actuators and controls, alarms and security systems, and much more.
- Model HP and SH are base models. HP- "S" designates a sloped display area. "L" designates elongated versions. "LP" designates low profile designs. "XH" designates an expander that increases the overall height .40" or .60", depending on unit. "9VB" and "4AA" designate internal battery compartments for one 9-volt battery or four size AA batteries, respectively.
- All models are available as prototyping kits or as production units. Prototyping kits are individually packaged and include all parts and hardware necessary for assembly. Production units include top and bottom covers, appropriate hardware, packaged in bulk.

| HP SERIES     | WIDTH | LENGTH | HEIGHT    | BELT CLIP         | EXTRA HEIGHT        |

All dimensions are outside dimensions-in inches

• Extra height adds .40"

+ Extra height adds .60"

Add a "K" prefix to standard model numbers for the prototyping kit version.

## CM Series

- The very popular CM Series includes over 40 basic models that can be customized for an extraordinary range of products. These include test equipment, medical electronics, modems and other computer accessories, receivers, transmitters, alarms and security systems, and much more.
- EE Series is the Eurocard format, complete with dual slot card guides, connector panel, and two mounting plates.
- Extra-height expander, designated by "X", adds additional height that ranges from 0.3" to 1.5".
- All models are available as prototyping kits or as production units. Prototyping kits are individually packaged and include all parts and hardware necessary for assembly. Production units include top and bottom covers, appropriate hardware, packaged in bulk. Panels for production units may be ordered separately.

## CF Series

- The CF Designer Series, available in over 35 models, is a popular choice for analytical instrumentation, test equipment, medical instruments, modems and other computer accessories, communications devices, and alarm and security systems.
- "X" designation adds 0.25" extra height.
- All models are available as prototyping kits or as production units. Prototyping kits are individually packaged and include all parts and hardware necessary for assembly. Production units include top and bottom covers, appropriate hardware, packaged in bulk. Panels for production units may be ordered separately.

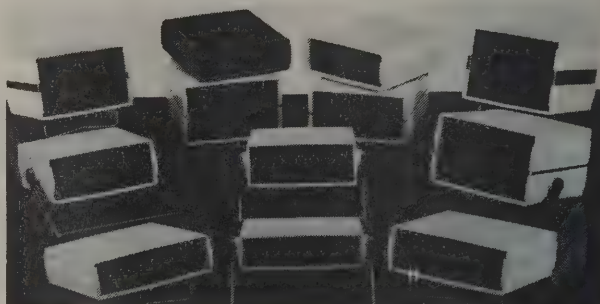

| CF SERIES | WIDTH | LENGTH | HEIGHT | BAIL    | VENTS   | BAIL & VENTS | EXTRA HEIGHT |
|-----------|-------|--------|--------|---------|---------|--------------|--------------|
| CF-125    | 8.36  | 9.11   | 1.65   | CFB-125 | CFV-125 | CFBV-125     | CF-X150 *    |

All dimensions are outside dimensions-in inches \* Extra height adds 0.25"  
Add a "K" prefix to standard model numbers for the prototyping kit version.

## C Series

- The C Series encompasses an exceptionally flexible line of enclosures. A wide assortment of component and board mounting features and customization options are available to suit a limitless number of end products. C Series enclosures are ideal for test instruments, medical and scientific equipment, control systems, computer accessories, alarm and security systems, and many other applications.
- All models are available as prototyping kits or as production units. Prototyping kits are individually packaged and include all parts and hardware necessary for assembly. A special kit, K-C23, can be assembled into six different height units, ranging from 1.68" through 2.93" in increments of .25", and constitutes the kit version of models C-200 through C-325. Production units include top and bottom covers, appropriate hardware, packaged in bulk. Panels for production units may be ordered separately.

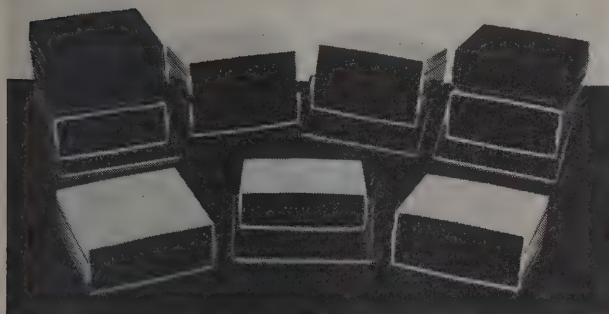

| C SERIES | WIDTH | LENGTH | HEIGHT | BAIL    | HANDLE  | VENTS   | BAIL & VENTS | HANDLE & VENTS |
|----------|-------|--------|--------|---------|---------|---------|--------------|----------------|
| C-200    | 8.50  | 9.25   | 2.44   | CB-200  | CH-200  | CV-200  | CBV-200      | CHV-200        |
| C-225    | 8.50  | 9.25   | 2.69   | CB-225  | CH-225  | CV-225  | CBV-225      | CHV-225        |
| C-250    | 8.50  | 9.25   | 2.94   | CB-250  | CH-250  | CV-250  | CBV-250      | CHV-250        |
| C-275    | 8.50  | 9.25   | 3.19   | CB-275  | CH-275  | CV-275  | CBV-275      | CHV-275        |
| C-300    | 8.50  | 9.25   | 3.44   | CB-300  | CH-300  | CV-300  | CBV-300      | CHV-300        |
| C-325    | 8.50  | 9.25   | 3.69   | CB-325  | CH-325  | CV-325  | CBV-325      | CHV-325        |
| CS-400   | 8.50  | 9.25   | 4.43   | CBS-400 | CHS-400 | CSV-400 | CBSV-400     | CHSV-400       |
| CS-500   | 8.50  | 9.25   | 5.43   | CBS-500 | CHS-500 | CSV-500 | CBSV-500     | CHSV-500       |
| CS-600   | 8.50  | 9.25   | 6.43   | CBS-600 | CHS-600 | CSV-600 | CBSV-600     | CHSV-600       |

Add a "K" prefix to standard model numbers for the prototyping kit version, except as noted above.

## CL Series

- The CL Series encompasses a complete range of extremely useful larger enclosures. A wide assortment of component and board mounting features and customization options are available. CL Series enclosures are ideal for test instruments, medical and scientific

equipment, industrial control systems, computer equipment, communications equipment, alarm and security systems, and many other applications.

- All models are available as prototyping kits or as production units. Prototyping kits are individually packaged and include all parts and hardware necessary for assembly. Two special kits, K-CLLP-34 and K-CL-45, can be assembled into different height units. The K-CLLP-34 ranges from 2.50" through 3.25" in increments of .25", and constitutes the kit version of models CLLP-300 through CLLP-375. The K-CL-45 kit ranges from 3.50" through 4.75" in increments of .25", and constitutes the kit version of models CL-400 through CL-525. Production units include top and bottom covers, appropriate hardware, packaged in bulk. Panels for production units may be ordered separately.
- Extra-height units utilize an expander panel which increases the height of the unit.

| CL SERIES | WIDTH | LENGTH | HEIGHT | BAIL      | HANDLE    | EXTRA HEIGHT |
|-----------|-------|--------|--------|-----------|-----------|--------------|
| CLLP-300  | 12.52 | 11.64  | 3.51   | CLLPB-300 | CLLPH-300 |              |

| CLS-625   | 12.52 | 11.64  | 6.75   | CLBS-625  | CLHS-625  | •            |
| CLS-725   | 12.52 | 11.64  | 7.75   | CLBS-725  | CLHS-725  | •            |
| CLS-825   | 12.52 | 11.64  | 8.75   | CLBS-825  | CLHS-825  | •            |

All dimensions are outside dimensions-in inches \*S" denotes height expander (filler panel)  
Add a "K" prefix to standard model numbers for the prototyping kit version, except as noted above.

## KE KEU DE Series

- KE (Keyboard), KEU (Keyboard/Utility), and DE (Desktop enclosure) units are ideally suited to a wide range of benchtop, desktop, and vertically-mounted devices. Their uses are virtually limitless, and many innovative product designs employ these enclosures — including data entry and card reading equipment, test equipment, control panels, scientific and medical devices, man/machine interfaces, keyboards and displays, communications systems, PA systems, computer accessories, and more.
- All models are available as prototyping kits or as production units. Prototyping kits are individually packaged and include all parts and hardware necessary for assembly. Production units include top and bottom covers, appropriate hardware, packaged in bulk.

| KE/KEU SERIES | WIDTH | LENGTH | HEIGHT* |
|---------------|-------|--------|---------|
| KEU-7         | 7.00  | 5.00   | 3.10    |
| KEU-10        | 10.00 | 8.03   | 4.20    |
| KE-17         | 17.08 | 8.68   | 2.79    |
| KE-20         | 20.08 | 8.68   | 2.79    |

| SYSTEMS | WIDTH | LENGTH | HEIGHT |
|---------|-------|--------|--------|
| DE-620  | 19.63 | 15.50  | 6.65   |
| DE-720  | 19.63 | 20.01  | 7.22   |

All dimensions are outside dimensions-in inches \* Feet height included  
Add a "K" prefix to standard model numbers for the prototyping kit version.

# NEW from PacTec!!

## SWITCH-PAC™

### High-Quality Enclosures and Standard Membrane Switches Available From Stock!

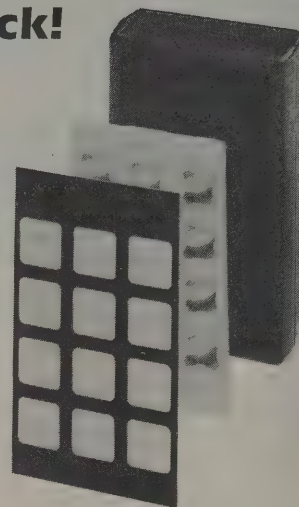

- Economical — no set up costs
- Long life, reliable switch operation
- High quality construction
- Steel dome switches/tactile feel
- 100% tested
- Very simple to assemble
- Switch design and layout coordinates with PacTec standard enclosures
- Custom printed overlays available (in production runs of 250 or more)

#### Ideal for:

- Prototyping & evaluation
- Short-run programs
- Full production runs

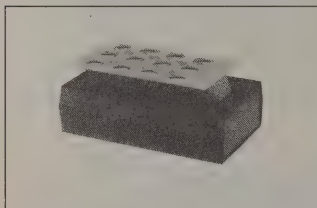

Includes full-size polyester overlays.

Print...screen...type...transfer...or write your own legends.

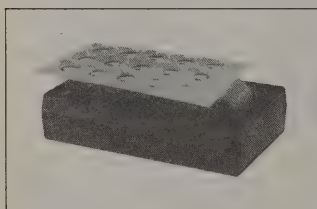

SWITCH-PACs include everything necessary for a complete prototype or small production run: a high quality ABS plastic enclosure with 9-volt battery compartment, standard membrane switch with ribbon cable and connector, blank overlay suitable for printing, screening, typing, or written legends, and user diagram.

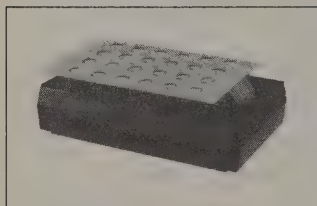

#### Select from three popular sizes and switch configurations:

**3 x 4 Switch**  
**Model SS-T-HM**  
**with Model HM Enclosure**  
12 switch contacts; 1.950" x 3.345"  
overall switch size. See Series HM  
section for enclosure specifications.

**3 x 5 Switch**  
**Model SS-T-HML**  
**with Model HML Enclosure**  
15 switch contacts; 2.300" x 4.140"  
overall switch size. See Series HM  
section for enclosure specifications.

**4 x 6 Switch**  
**Model SS-T-HP**  
**with Model HP Enclosure**  
24 switch contacts; 3.080" x 5.230"  
overall switch size. See Series HP  
section for enclosure specifications.

#### Design Hint:

PacTec Membrane Switches can be modified by deleting any of the keys in the standard configuration. In combination with a new overlay you can achieve the benefits of a custom switch without set up expenses or lead time.

## PRODUCTS

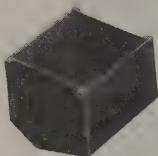

### NEW! TX Series

### Low-Cost, Textured Enclosures

When external appearances are crucial, try our new TX Series enclosures with textured surfaces and rounded corners. Internal ledges make gluing the flush-mount cover neat and simple. Ideal for the enclosure of small assemblies or potting applications. Black or custom colors. ABS plastic with UL Flame Rating of 94-V0.

**5 Sizes:** From 1.5" x 2.0" x 1.0" To 3.0" x 3.0" x 1.5"

**2 Styles:** Plain or with Top Mounting Feet

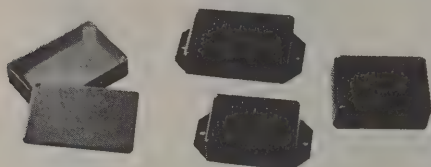

### Encapsulation/Potting

Low-cost boxes with polished surfaces suitable for potting. Covers in all sizes. ABS Plastic with UL Flame Rating of 94-V0

**5 Sizes:** From 1.0" x 1.0" x 0.75" To 3.0" x 3.0" x 1.5"

**1 Style:** Bottom Mounting Feet

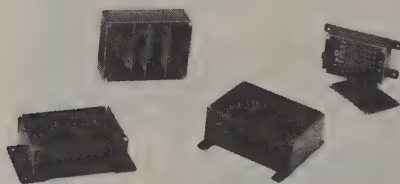

### LP SERIES-Low Profile

For small to medium-sized electronics. Optional internal bosses for mounting PCBs. Contemporary textured finish in light grey, black or custom color. Covers are fastened by screws. ABS Plastic with UL Flame Rating of 94-V0

**5 Sizes:** From 3.25" x 2.375" x 1.0" To 5.5" x 3.75" x 1.25"

**2 Styles:** Plain or Mounting Feet

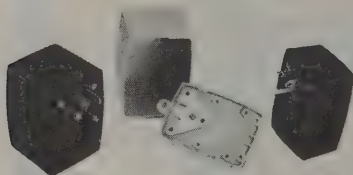

### EP SERIES-General Purpose

Enclosures for small to medium-sized electronics. Internal bosses for PCB mounting. Internal slots for vertical PCBs or potting dividers. High-gloss black or custom colors. Covers are fastened by screws to brass inserts. ABS Plastic with UL Flame Rating of 94-V0

**4 Sizes:** From 4.5" x 3.0" x 1.75" To 7.5" x 4.5" x 2.25"

**2 Styles:** Plain or Mounting Feet

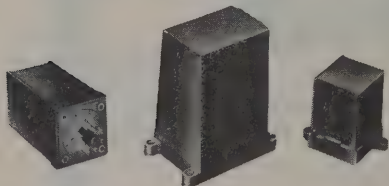

### PI SERIES-Plug-In Modules

Underwriters' Laboratories Recognized Component plugs into standard 120V electrical outlet. Can be potted. Integral hold-down tab for securing module to wall receptacle. Beige, black or custom color. ABS Plastic with UL Flame Rating of 94-V0

**4 Sizes:** 2.0" x 2.0" x 2.0" To 2.0" x 3.0" x 2.5"

**2 Styles:** 2 or 3 Pole

### 15 & 23 SERIES

Enclosures for PCBs or sub-assemblies. Internal slots for PCBs, perfboards, or potting dividers. Several bases to choose from. 23 Series has optional external tracks (single or double) for heat sinks or accessories. Nylon or Polypropylene with UL Flame Rating of 94-V0

**3 Sizes:** From 1.625" x 1.625" x 2.0" To 2.125" x 2.625" x 3.5"

**2 Styles:** Plain or Mounting Feet

**4 Bases:** Plain, 8 Pin, 11 Pin, and 12 Pin

### Special Machining Available!

Short-run custom machining, punching and milling services.  
All products American-made.

# PFT MODULAR NETWORKING FRAMES

Now available from PFT - Modular Networking Frames that are UPS shippable! These all aluminum open frame racks are available in 19" and 24" rack mount widths with standard heights of 78", 70", 61" and 42". Each unit is drilled and tapped with universal EIA hole spacing. Refer to dimensional chart for detailed specifications.

PFT Modular Networking Frames are ideal for mounting electronic and test equipment, patch panels, shelves, data communication and telecommunication products as well as other cabling and rack mount products.

PFT Modular Networking Frames offer an economical alternative to your rack mount needs at a fraction of the cost of a fully enclosed vertical enclosure. These frames are ideal when a fully enclosed cabinet is not required.

All PFT Modular Networking Frames are shipped knocked down for a significant freight savings. Assembly is easily accomplished in a matter of minutes using standard socket or adjustable wrenches. Frames are designed to bolt to the floor for extra stability.

## PFT Special Features:

- ☒ Heavy duty aluminum extrusion construction utilizing 6105-T6 aluminum alloy
- ☒ 10—32 dia. tapped holes on front and rear flanges
- ☒ EIA hole spacing full height of vertical uprights
- ☒ Available in smooth black oven baked or standard mil finish
- ☒ Designed for multi-bay configurations
- ☒ UPS shippable for economical freight costs
- ☒ Designed to accommodate a variety of PFT accessories
- ☒ Pre-threaded holes allow for quick and easy assembly

## Each PFT Modular Networking Frame Consists of:

- ☒ 2 fully tapped vertical uprights
- ☒ 2 mounting bases (front and rear)
- ☒ top angle
- ☒ assembly hardware

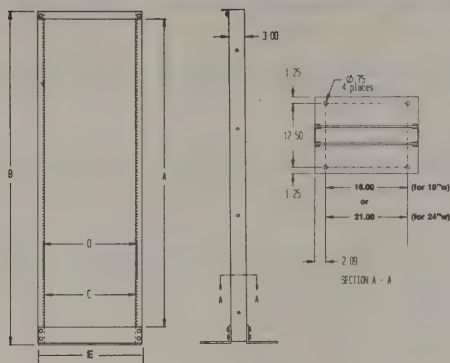

**For current pricing and availability, call your local PFT Distributor or call PFT toll free at 1-800-558-7297.**

ALL DIMENSIONS IN INCHES

## ACCESSORIES

### CANTILEVERED EQUIPMENT SHELVES

- 16 gauge steel
- Rated for 50 lbs. capacity
- Smooth black finish
- 10-32 mounting hardware included

| PART<br>NUMBER | TYPE  | A<br>WIDTH | B<br>DEPTH |
|----------------|-------|------------|------------|
| CS1914SA       | Solid | 19"        | 14"        |
| CS1914PA       | Perf. | 19"        | 14"        |
| CS2414SA       | Solid | 24"        | 14"        |
| CS2414PA       | Perf. | 24"        | 14"        |

### CONVERSION ADAPTER BRACKETS

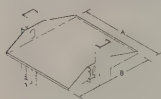

- 14 gauge steel
- Zinc plated
- 10/32 tapped holes
- Hole pattern meets EIA standard

| PART<br>NUMBER | A      | B      | RACK<br>UNITS |
|----------------|--------|--------|---------------|
| AB01           | 1.719" | 3.125" | 1U            |
| AB02           | 3.469" | 3.125" | 2U            |
| AB03           | 5.219" | 3.125" | 3U            |
| AB04           | 6.969" | 3.125" | 4U            |
| AB05           | 8.719" | 3.125" | 5U            |

### CENTER WEIGHT EQUIPMENT SHELVES

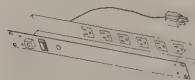

- 16 gauge steel
- Rated for 50 lbs. capacity
- Rated for 75 lbs. capacity with optional mounting brackets (included with each shelf)
- 10-32 Mounting hardware included

| PART<br>NUMBER | TYPE  | A<br>WIDTH | B<br>DEPTH |
|----------------|-------|------------|------------|
| CWS1919SA      | Solid | 19"        | 19"        |
| CWS1919PA      | Perf. | 19"        | 19"        |
| CWS2419SA      | Solid | 24"        | 19"        |
| CWS2419PA      | Perf. | 24"        | 19"        |

### RACK MOUNT POWER STRIP

- Meets UL Standard 1363
- 15A 125V receptacle
- Color - black

- All units include:
  - switch
  - pilot light
  - circuit breaker
  - 15' power cord

| PART<br>NUMBER | NUMBER<br>OF OUTLETS |
|----------------|----------------------|
| PS1906         | 6                    |

### CUP HEAD SCREWS

- 10/32 cup head screws
- Nickel plated or black oxide with nylon washer
- Twenty per kit

| PART<br>NUMBER | SIZE                              |
|----------------|-----------------------------------|
| CHS1032F       | 10/32 x 5/8" long                 |
| CHS1032K       | 10/32 x 1 1/8" long               |
| CHS1032FA      | 10/32 x 5/8" long - black oxide   |
| CHS1032KA      | 10/32 x 1 1/8" long - black oxide |

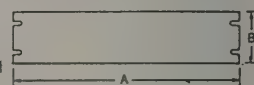

### GROUNDING BAR

- 1/4" thick x 1" tall copper bar
- Six 10-32 tapped grounding holes
- Hardware pack included to allow grounded or isolated mounting
- 19" rack mount (can be used to mount to 24" racks and cabinets utilizing PFT Adapter Brackets)

| PART NUMBER | GB190106 |
|-------------|----------|
|-------------|----------|

### FLAT FILLER PANELS

- .125 thick aluminum
- Textured black finish in stock
- 10-32 Mounting hardware included

### CASTERS

PART NUMBER  
MNFA75L

- 2" diameter
- Matte black plastic caster and cover
- Each caster rated for 75 lbs.
- Each kit includes four locking casters and special mounting hardware

For current pricing and availability, call your local PFT Distributor or call PFT toll free at 1-800-558-7297.

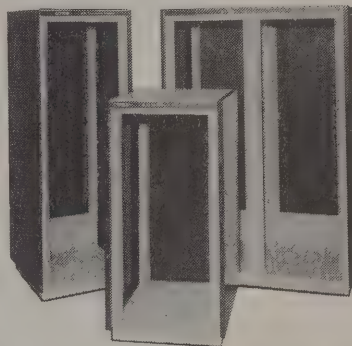

# PFT MODULAR ENCLOSURES

## MODULAR VERTICAL ENCLOSURES

"Tough as welded" with the cost savings and versatility of knock down enclosures.

### FEATURES:

- **Construction** - Heavy duty steel construction ensures durability. Corner Posts - 13 gauge C.R.S. Top and bottom assemblies - 14 gauge C.R.S. All other components - 18 gauge C.R.S. All metal forming, welding and painting is done in PFT manufacturing facilities.
- **Ease of Assembly** - PFT's self-registration design enables quick and routine assembly. One person can assemble these vertical enclosures in minutes. Unique tab and slot engineering ensures all parts accurately self-align.
- **Knock Down Units Reduce Shipping Costs** - PFT Modular Enclosures save up to 66% in shipping costs - savings which are passed on to you.
- **Modular Construction Reduces Parts Replacement Costs** - Never replace an entire enclosure again. All PFT cabinet parts, including frame components, are removable, interchangeable and replaceable.
- **Colors and Finish** - Enclosures are finished with oven-baked, EPA - approved paint. Rear door and side panels have a textured Royal Blue finish. All other components are textured in Ash White. This color combination harmonizes with standard electronics industry products. Other colors are available as modifications.
- **Multi-Bay Add-Ons** - Modular enclosures are designed to bolt together easily and securely to form multi-bay configurations in any quantity. A variety of special multi-bay accessories is available. Turn two pages under **VERTICAL ENCLOSURE ACCESSORIES** for a complete list.
- **Full Line of Accessories** - A full line of accessories to add versatility and to enhance the performance of your vertical enclosures are available. The line includes: plexiglass doors, casters, blower unit, door locks, drawers and more. Turn two pages under the **VERTICAL ENCLOSURE ACCESSORIES** heading for a complete list. Note: 17" wide Mod-u-line with rack side panels fits 19" vertical enclosures.
- **Modifications** - PFT will make in-plant modifications to your specifications.

To use the chart below, identify the size of the cabinet you wish to order with the 6 digits in the left hand column. The first 4 digits are from the top and bottom pack you wish to order and the last 2 digits are from the corner post pack you wish to order.

### UNIQUE CORNER POST DESIGN

CORNER FRAME  
DETAIL

PFT combines two unique design features to provide strength and rigidity previously associated only with more expensive welded units. Interlocking tab and slot construction in the corner joints eliminates torsional movement of the corner posts. Secondly, a heavy gauge mounting plate is welded, slightly recessed, into the top and bottom of each corner post. Thus, when the corner bolt is tightened, the cabinet base (or top) flexes slightly, ensuring that the joint is always preloaded in tension, providing additional rigidity.

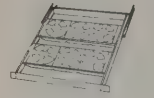

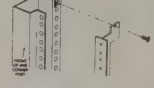

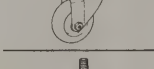

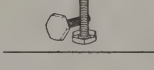

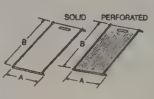

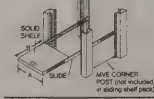

| CODE | COLOR CHART | FED STD #  |
|------|-------------|------------|
| R    | Royal Blue  | 595A-25045 |
| H    | Ash White   | 595A-26622 |

# PFT MODULAR ENCLOSURES

## MODULAR VERTICAL ENCLOSURE ACCESSORIES

### PLEXIDOORS

- Lift-off hinge design
- $\frac{3}{16}$ " thick acrylic plexiglass
- Full length magnetic strip
- Clear (C) or smoked (S) plexiglass
- Locking (L) or non-locking (N) styles

- Mounts on either side of frame
- Panel clearance of .88" is provided; VMR rail series should be used if a bezel or knob exceeding .88" exists on the rack mount equipment

| PART NUMBER   | "A" WIDTH | "B" HEIGHT |
|---------------|-----------|------------|
| PD1942 Series | 20.12"    | 43.63"     |
| PD1961 Series | 20.12"    | 62.88"     |
| PD1970 Series | 20.12"    | 71.63"     |
| PD1977 Series | 20.12"    | 78.63"     |
| PD2442 Series | 25.12"    | 43.63"     |
| PD2461 Series | 25.12"    | 62.88"     |
| PD2470 Series | 25.12"    | 71.63"     |
| PD2477 Series | 25.12"    | 78.63"     |

### SHORT DOOR PACKS

#### SOLID SHORT DOORS

- 18 gauge cold rolled steel
- Lift-off hinge design
- Panel clearance 1.38" provided
- Solid door packs are short doors and include 8.72" access panel

- Door mounts to left corner post only
- Latch, adhesive-backed gasketing,  $\frac{9}{32}$  allen wrench, and all hardware provided in pack
- Textured royal blue finish in stock

| PART NUMBER     | "A" WIDTH | "B" HEIGHT |
|-----------------|-----------|------------|
| MVSD1942 Series | 20.12"    | 34.88"     |

### HOW TO ORDER

Select appropriate PFT model number and specify color combination by adding color suffix, the wrapper color first followed by the insert color. For example, an **MBS-3-4-6** with a **BLACK** wrap-around base and an **OFF-WHITE** insert is ordered as follows: "MBS 3-4-6 BLACK/OFF-WHITE".

### FEATURES:

- **Construction** - Made from aluminum for lightweight strength and ease of handling. Wrap around base is .090" aluminum; sloped or flat front insert is .062" aluminum.
- **Ease of Assembly** - Simple two piece design assembles or disassembles in minutes with just four screws. Allows easy access to your enclosed components. Individual replacement parts also may be ordered.

- **Colors & Finish** - Cabinets are finished with oven-baked, EPA-approved paint. Wrap-around base has a textured finish while front insert is smooth. Standard colors are:

#### Wrap-Around Base

\*Blue  
Charcoal  
Black  
Tan

#### Front Insert

\*Off-White  
Light Grey  
Black  
Tan

- **Note** - Blue and Off-White cabinets in stock for immediate delivery. Call for current availability of other standard color combinations.
- **Modifications** - PFT will make in-plant modifications to your specifications. Popular modifications include: silkscreening, venting, cut-outs, etc. Steel cabinets are also available through a special order.

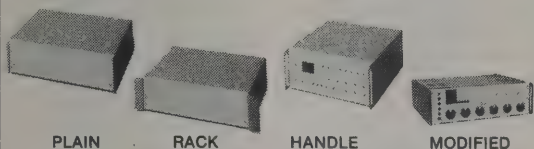

For current pricing and availability, call your local PFT Distributor or call PFT toll free at 1-800-558-7297.

# PFT MODULAR ENCLOSURES

## Mod-u-line® Chassis

Mod-u-line is a line of quality small cabinets, available in standard off-the-shelf sizes. "Value Engineered" to provide the optimum in versatility, strength and economy.

\*Note - This size Mod-u-line with rack side panels is a perfect fit for 19" wide Modular Vertical Enclosures.

### HOW TO ORDER

A complete cabinet is ordered in three segments. 1) Mod-u-line Cabinet Less Sides (MCLS) includes: front, back, top and bottom panels plus interior rails. 2) Side Panels are ordered by style, Side Panel Plain (SPP) Side Panel Rack (SPR), Side Panel Handle (SPH); by size and color. Side panels are symmetrical - there are no righthand or lefthand panels. 3) Optional Chassis Plate (CP) is ordered individually according to table below. For example, a 3<sup>5</sup>/<sub>16</sub>" x 16<sup>1</sup>/<sub>16</sub>" x 11<sup>7</sup>/<sub>16</sub>" cabinet with a BLUE exterior and OFF-WHITE front panel which has BLUE RACK side panels and a 16<sup>1</sup>/<sub>16</sub>" x 11<sup>7</sup>/<sub>16</sub>" chassis plate is ordered as: MCLS 3-17-12 BLUE/OFF-WHITE, plus SPR 3-12 BLUE, CP 17-12.

**STANDARD VENTED TOP AND BOTTOM PANELS ORDERING INSTRUCTION** - A 1" wide ventilation strip comprised of 1/8" holes on 1/4" centers may be ordered on either top (VT) or bottom (VB) panels or on both (VTB), if desired. Example: An MCLS 3-17-12-VTB TAN/WHITE would be vented on both top and bottom panels.

### FEATURES:

- Construction** - Made from aluminum for lightweight strength and ease of handling. Side panels are .125" aluminum. All other components are .062" aluminum. Side panels and chassis plates are ordered separately.
- Ease of Assembly** - Mod-u-line cabinets are designed to assemble in minutes. The top cover is easily removed for complete and immediate access to the inside.
- Replacement Parts** - All components of Mod-u-line may be replaced in seconds with stock panels. This feature reduces damage or redesign costs by eliminating need to repaint or replace the entire unit.
- Colors & Finish** - Cabinets are finished with oven-baked, EPA-approved paint. All exterior parts have a textured finish, except the front panel, which has a smooth finish. Standard colors are:

#### Top, Bottom & Rear Panels

\*Blue  
Charcoal  
Black  
Tan

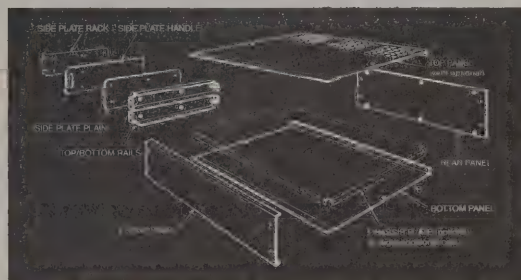

#### Front Panel

\*Off-White  
Light Grey  
Black  
Tan

#### Side Panels

\*Blue  
Charcoal  
Black  
Tan

\*Note - BLUE and OFF-WHITE components in stock for immediate delivery. Call for current availability of other standard color combinations. Chassis plate and interior rails are gold anodized.

A complete line of cabinets that provide unequalled packaging flexibility and aesthetics.

**1. Engineered Cabinet Systems**

Schroff cabinets conform to ANSI/EIA standards, UL/VDE grounding requirements and IEC modularity specifications. Readily modified to your application.

...worldwide-Partners  
to the Electronics Industry

**SCHROFF, INC.**

170 Commerce Drive • Warwick, R.I. 02886

**2. Fully Assembled, In-stock**

All our standard cabinets can be shipped usually within 5 days.

**3. A Complete Range of Accessories**

- swing frames
- fan units
- telescopic slides
- shortened doors
- air conditioners
- mobile bases
- chassis shelves
- ... and more

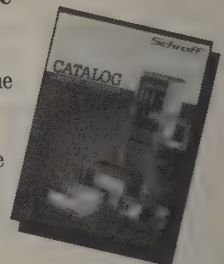

**4. Special NEMA, EMC and Network Cabinets**

Schroff has a wide range of sealed cabinets for industrial use, EMC cabinets for shielding and LAN cabinets specially designed for networking.

**5. Electronic Enclosures Catalog**

The complete line of Schroff cabinets, cases and subracks are featured with accessories.

**For your copy of our easy-to-order catalog,  
call toll-free 1-800-451-8755 or fax us at (401) 738-7988.**

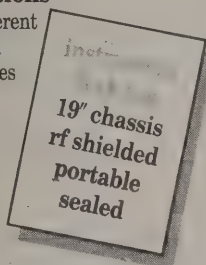

# Schroff

## An Unbeatable Case

A complete range of electronic cases  
unmatched for versatility and appearance.

### 1. A Full Line of Case Configurations

Over 100 different case sizes in a variety of styles for both desk-top and 19" rack-mountable applications. Most cases are readily adaptable to VMEbus and Multibus® II. Mounting dimension to EIA/IEC specifications.

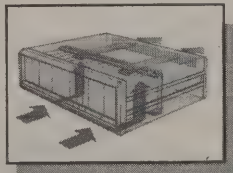

### 2. Immediate In-stock Availability

Standard cases are fully assembled and can be shipped usually within 5 days.

### 3. Designed for Maximum Versatility

Cases feature a self-supporting frame construction as well as excellent EMC shielding and heat dissipation characteristics.

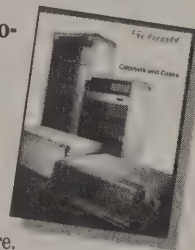

### 4. Full Range of Accessories

- acrylic doors
- tip-up handles
- built-in fans
- front panels
- hinged front doors
- tip-up feet
- ... and much more

### 5. Easy-to-order Catalog

Order your enclosure right over the phone with this new brochure.

Technical drawing of a rectangular building layout. The drawing includes a plan view on the left and a side elevation on the right. The plan view shows a rectangular structure with a dashed line indicating an internal area labeled 'SV'. Dimensions are provided in meters (m) and centimeters (cm). The side elevation shows the building's profile with a central entrance and windows, with dimensions for height and width.

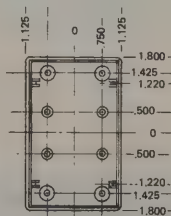

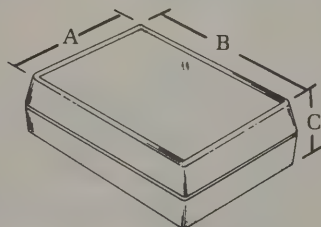

**Plan View Dimensions (Left):**

- Top edge: 2.438, 2.682, 2.438
- Right edge: 3.438, 3.028, 2.720, 2.250
- Bottom edge: 2.250, 2.720, 1.028, 2.438
- Internal dimensions: 2.250, 2.720, 1.028, 2.438
- Internal area: SV

**Side Elevation Dimensions (Right):**

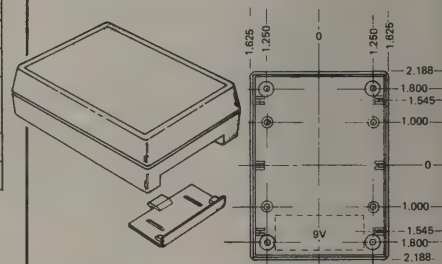

- Top edge: 2.80 d, 3.10, 3.20 d
- Bottom edge: 2.80 d, 3.10, 3.20 d
- Width: 7.90, 1.500

# 1992 IC MASTER CD-ROM PLUS

The entire IC Master on a single Compact Disk is fast, easy to use and very user friendly. CD-ROM PLUS combines all of the Master Selection Guides and all of the Indexes from the printed books with hundreds of additional man-

ufacturers data sheets. It also includes the Directory of IC Manufacturers' Data Pages plus a powerful Inquiry Generation and Tracking System.

- You can find the exact IC you need in seconds...
- Compare specs on your screen...
- Print the search results directly to your computer or printer!

## PLUS...

- You can access over 1,600 manufacturer's data sheets and send them to your laser printer.

CD-ROM PLUS runs on any ISO9660 CD-ROM reader and any IBM AT or better PC (or 100% compatible).

No complex software involved. Start your reader and play CD-ROM PLUS. Once you experience the simplicity and speed of CD-ROM PLUS, you'll never work without it again!

## JOIN THE CD-ROM BANDWAGON.

- For all the details on how to order your IC Master CD-ROM PLUS, call or write:

# SHEET METAL BOXES

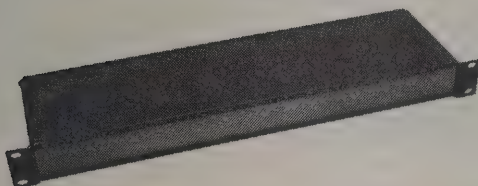

## FOR ENGINEERING PROTOTYPES AND SMALL PRODUCTION RUNS

### Construction Features:

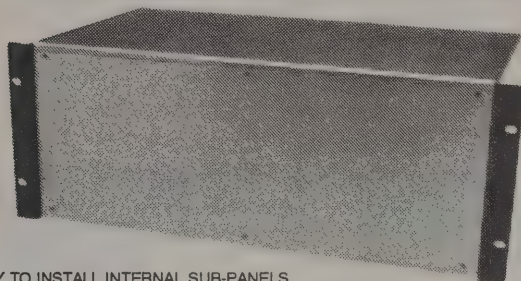

- All boxes shipped flat
- Panels pre-anodized
- Aluminum construction
- Low cost

### Four Types of Boxes Available

- Rack boxes — standard duty
- Rack boxes — heavy duty
- Metal cabinets
- Dual slope cabinets

FRONT AND REAR PANELS .063" CLEAR ALUMINUM  
TOP AND BOTTOM PANELS .063" BLACK ALUMINUM

EASY TO INSTALL INTERNAL SUB-PANELS  
FRONT AND REAR PANELS ARE CLEAR ALUMINUM  
TOP AND BOTTOM PANELS ARE BLACK ALUMINUM  
PANELS ARE .080" ALUMINUM AND ARE FIELD REMOVABLE

### RACK CHASSIS

## DRESS IT WITH A SIMCO HOUSING

The housing for an instrument or product is an integral part of its design, playing a key role in its looks, presentation, value and quality perception. It should compliment and enhance the product in every possible way.

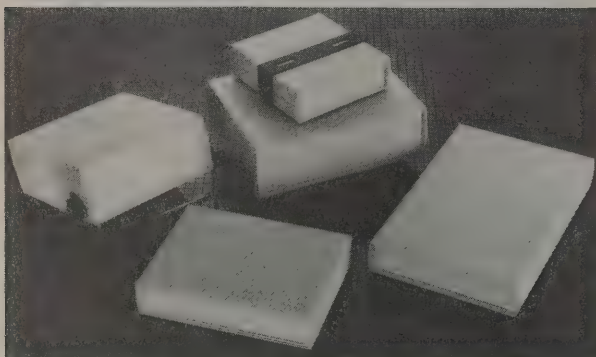

Success of a new or redesigned product depends not only on the purpose, function, and reliability of the product, but on the aesthetics as well. The enclosure that houses a product is its first (visual) introduction. That is why it's important to choose an enclosure that creates and projects the right image for both the product and the company it represents.

The beauty and durability of molded ABS are qualities that are appreciated by today's consumer. SIMCO enclosures are

manufactured using only the finest grades of material and are molded to strict specifications. Our enclosures are rugged, yet attractive. They can be found in many diverse applications, such as test, measurement, instrumentation, medical, communications and consumer markets to name a few.

In addition, SIMCO provides off-the-shelf inventory, short lead times, and on-time delivery. That is why more and more companies are using SIMCO enclosures. The prices are right. The quality is high. These advantages make SIMCO enclosures the smart and most logical choice for all your enclosure needs – from prototype to production.

### THE CHALLENGER SERIES

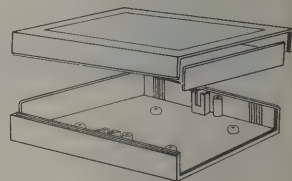

#### Features

- High Impact ABS Material
- Attractive Soft Suede Finish
- Molded-in card guides and mounting bosses
- Complete w/case screws and self adhesive rubber feet
- In-stock availability
- Colors: Black, Beige, Dark Grey and PC Bone Grey

The Challenger Series is ideal for most any portable instrument housing. Five popular sizes are offered in four standard colors, Black, Beige, Dark Grey and PC Bone Grey

#### Available Options

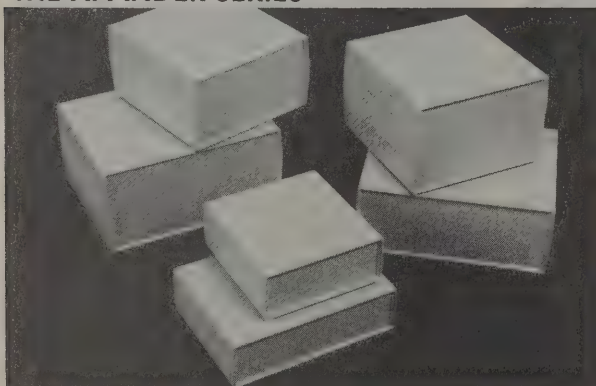

- Custom colors
- Flame retardant material, meets UL approval
- EMI/RFI shielding
- Custom designs
- Tilt stand/carrying handle
- Universal mounting brackets
- Front and rear panels

#### Enclosures

| Model Number | Outside Dimensions (Inches) |
|--------------|-----------------------------|
| 150X5        | 1.53H x 5.08W x 5.30D       |
| 150X75       | 1.53H x 7.06W x 5.30D       |
| 150X69       | 1.55H x 6.33W x 9.62D       |
| 250X6        | 2.52H x 6.12W x 6.32D       |
| 250X86       | 2.52H x 8.10W x 6.32D       |

### THE XPANDER SERIES

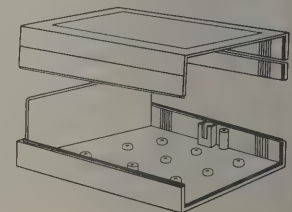

#### Features

- High Impact ABS Material
- Attractive Soft-suede finish
- Molded-in card guides & mounting bosses
- Complete with stainless steel case screws and rubber feet
- In-stock availability
- 4 Standard colors: Black, Beige, Dark Grey, PC Bone Grey

The Xpander Series is created using side xpander panels to increase the height of a standard enclosure. Available in six sizes.

#### Available Options

- Custom colors
- Flame retardant material, meets UL approval
- EMI/RFI shielding
- Custom designs
- Tilt stand/carrying handle
- Universal mounting brackets
- Front and rear panels

## THE DISCOVERY SERIES

### Features

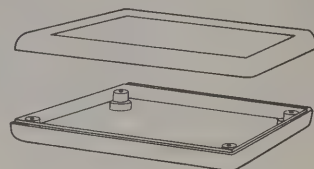

- High Impact ABS Material
- Attractive appearance
- Complete with stainless steel screws and self-adhesive transparent non-skid feet
- In-stock availability
- Easily machined
- Tops and bottoms interchange to create four distinctive styles
- Four standard colors: Black, Beige, Dark Grey, PC Bone Grey

Small hand-held enclosures in four distinctive styles. Choose from a plain utility top or graceful sloped top with or without 9-volt battery compartment

**Compact size 1.15 to 1.40H x 3.75W x 6.30L (inches)**

### Available Options

- Custom colors
- Flame retardant material, meets UL approval
- EMI/RFI shielding
- Low-cost tooling insert to customize tops or bottoms

**36SB** – A sloped top, plain bottom unit with sleek flowing lines. Perfect for products with high visibility.

**36S9VB** – Sloped top unit with molded-in 9 volt battery compartment. Has positive lock removable battery door.

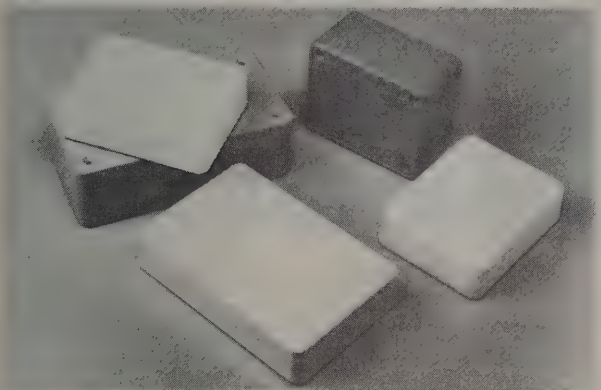

**36TB** – A plain top, plain bottom unit, well suited for general purpose applications.

**36T9VB** – Plain top unit with 9-volt battery compartment.

### Enclosures

| 36TB         | Plain Top, Plain Bottom    |
| 36T9VB       | Plain Top, Battery Bottom  |

## THE NEW SATURN SERIES

The smallest enclosures in the SIMCO line, these mini-boxes offer a practical, economical packaging solution for small electronic devices or circuitry.

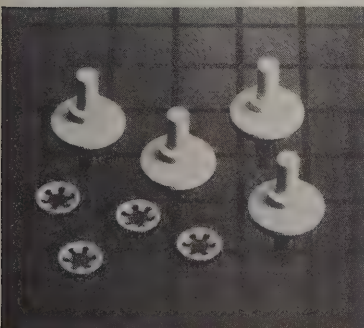

Molded tops and flat bottoms feature a smooth, matte finish and have internal provisions for PC board mounting.

Impact resistant ABS material and flame retardant to meet UL94V-O standards.

They are available in four standard colors: Black, Beige, Dark Grey, and PC Bone Grey.

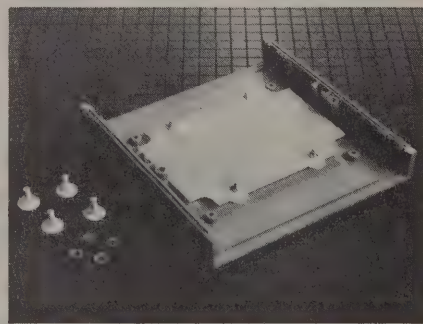

| Model Number | Outside Dimensions (Inches) |
|--------------|-----------------------------|
| 100X23       | 1.00H x 2.49W x 2.99D       |
| 100X25       | 1.00H x 2.50W x 5.00D       |
| 160X23       | 1.60H x 2.49W x 2.99D       |
| 160X25       | 1.60H x 2.50W x 5.00D       |

## UNIVERSAL MOUNTING BOSSSES

PC board mounting boss location need not be a concern with SIMCO's new Universal Mounting Bosses. Designed to bond securely to a ABS enclosure with MEK or other bonding agent, the bosses can be located wherever needed within an enclosure. The PC board is then held in place with easy to use push-on fasteners, or removable spring clips.

## CUSTOM MACHINING & MOLDING

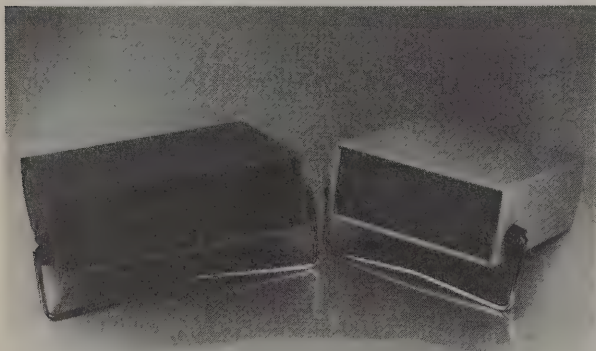

SIMCO enclosures and panels are easily machined or drilled. Do it yourself or let SIMCO quote your custom modifications. Work is done from your prints or to your specifications and with short lead times. Some SIMCO enclosures can be custom molded using our "insert" technique to create openings and assembly requirements where needed.

Front and rear panels can also be custom molded. A special, low-cost panel mold is constructed to your specifications. Silk-screening is also available through SIMCO.

Send us your drawing or print today and let SIMCO quote on your custom requirements.

## TILT STAND/HANDLE KIT

SIMCO's 3 locking position handle kits are attractive, yet functional.

### Features

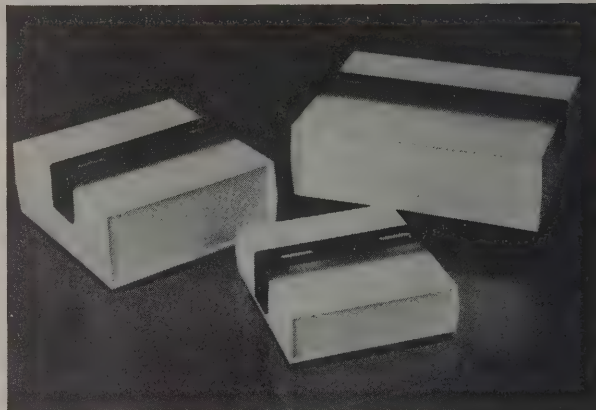

- Heavy-duty chrome plated steel
- Molded ABS side attachment buttons
- Provides easy viewing and accessibility to any benchtop instrument.
- Adds portability and folds out of the way when not in use.
- Easily installed and economically priced.
- Each kit includes mounting screws and over-size rubber feet.
- Low cost . . . Compare our prices.

#### Tilt/Stand Handle Kits

HK-6 - to fit 6" enclosure

HK-86 - to fit 8" enclosure

## MOUNTING BRACKETS

SIMCO's attractive mounting brackets install easily.

### Features

- Durable 16 gauge CRS 1010
- Polane, 2 part epoxy, black textured coating is long-wearing and attractive
- Adjustable height and tilt angle
- Versatile design allows bracket to be installed over or under the enclosure
- Includes 2 neoprene washers and 3/16-24 x 1/2" black machine screws
- Assembles easily. Molded-in nut pockets accept 3/16 nuts, also included
- Off-shelf availability. No costly tooling charges

#### Mounting Brackets

MBK-5 - to fit 5" enclosure

MBK-6 - to fit 6" enclosure

MBK-7 - to fit 7" enclosure

MBK-8 - to fit 8" enclosure

# THE STRONGBOX®

## E-SERIES EXTENSION KITS

E-Series depth Extension kits are user adjustable in 1/2" increments for intermediate and extended chassis depth. Thus any chassis depth from 9 1/2" to 26" is available off-the-shelf.

E-Series kits contain 2 Extension Side Panels and 2 Extension Perforated Covers.

## EXTENSION RANGE

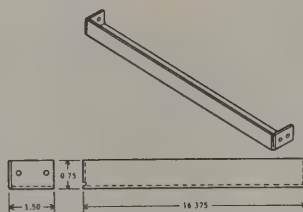

| Kit Number | F      | +E-Series = G   |
|------------|--------|-----------------|
| SB9-       | 9.50"  | 9.50" - 16.50"  |
| SB12-      | 12.00" | 12.00" - 19.00" |
| SB19-      | 19.00" | 19.00" - 26.00" |

## E-SERIES DEPTH EXTENSION KITS

| Extension Kit Number | Mates With |         |         | Price  |
|----------------------|------------|---------|---------|--------|
| E-3                  | SB9-3      | SB12-3  | SB19-3  | 137.00 |
| E-5                  | SB9-5      | SB12-5  | SB19-5  | 140.00 |
| E-7                  | SB9-7      | SB12-7  | SB19-7  | 143.50 |
| E-8                  | SB9-8      | SB12-8  | SB19-8  | 144.70 |
| E-10                 | (NONE)     | SB12-10 | SB19-10 | 159.10 |

Add dash "—SAC" to kit number to get Solid instead of Perforated covers (deduct \$20.00 from kit price). Add dash "—SAC 1" to kit number to get one, each, Solid and Perforated cover (deduct \$10.00 from kit price).

## MA-1.5 MOUNTING ANGLE

The Mounting Angle is used to attach card guides and other interior parts when a full-length, -height, or -width platform is not required or would impede the flow of cooling air. It also adds torsional stiffness to chassis used in extremely demanding environments.

Each heavy-duty MA-1.5 is made of 0.090"-thick, clear-iridized aluminum, and is supplied with captive attachment hardware. It is an "L"-shaped solid which mounts to pre-drilled chassis holes in any of four useful orientations.

Order SB9-, SB12-, and SB19-Series parts from this table. Parts in each column mate with others of the same depth.

| PARTS                   | KIT DEPTH | KIT DASH NUMBER |        |        |        |        |         |         |

# THE STRONGBOX® HEAVY-DUTY RACK-MOUNT CHASSIS

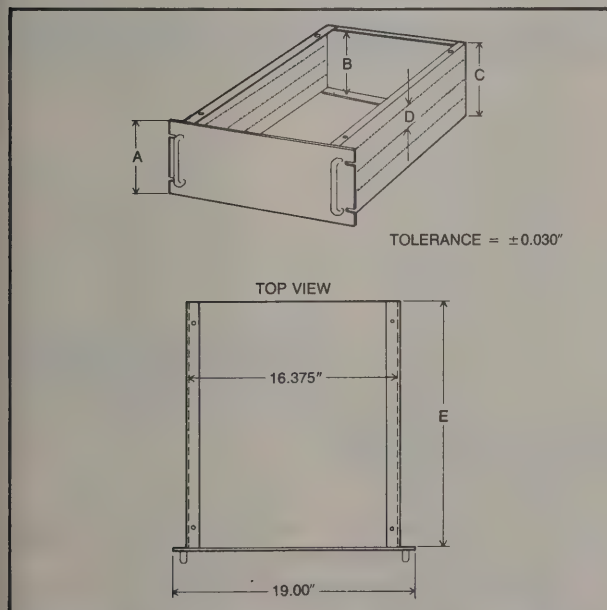

## SB9-, SB12-, SB19-SERIES

Seven EIA Front Panel heights: 1 $\frac{3}{4}$ ", 3 $\frac{1}{2}$ ", 5 $\frac{1}{4}$ ", 7", 8 $\frac{3}{4}$ ", 10 $\frac{1}{4}$ ", and 12 $\frac{1}{2}$ " (1, 3, 5, 7, 8, 10, 12 nominal).

Three-standard depths: 9 $\frac{1}{2}$ " (SB9-Series), 12" (SB12-Series), and 19" (SB19-Series).

Components can be ordered as complete kits or by the part. See kit and parts table. Kits and parts come with all required captive machine hardware. Front, Side, and Mounting Panels are clear iridized. Covers and handles are clear anodized. All surfaces are satin grained.

Each kit (except SB9-1 and SB12-1) contains 1 Front Panel, 2 Handles, 2 Side Panels, 2 Perforated Covers, and 1 Interior Mounting Panel.

## SPECIFICATIONS

### PARTS

FRONT PANEL — 0.125" thick, 19.00" wide. 6061-T6 aluminum. EIA notched.

SIDE PANEL — 0.090" thick, 5052-H32 aluminum. Three rows of holes on  $\frac{1}{2}$ " centers for mounting panels, card cages, etc.

INTERIOR MOUNTING PANEL — 0.090" thick, 16.37" wide. 5052-H32 aluminum. For use as a rear panel or vertical or horizontal mounting panel.

PERFORATED ALUMINUM COVER — 0.063" thick. 16.85" wide. 3003 aluminum. Assembles with four screws and captive stainless steel nuts.

STRONGBOX® HANDLE — Standard aluminum handle.

### ACCESSORIES

BOTTOM MOUNTING PLATE — 0.090" thick, 16.37" wide. 5052-H32 aluminum. For mounting heavy components. Clear iridite finish.

SOLID BEARING SLIDE — .38" thick. Cad plated steel. Adjustable brackets for assembling to EIA tapped-rail.

SOLID ALUMINUM COVER — 0.063" thick, 16.85" wide. 5052-H32 aluminum. Clear anodize finish.

HEAVY COVER PLATE — 0.090" thick, 16.88" wide. 5052-H32 aluminum. For mounting heavy components flush with chassis bottom. Clear iridite finish.

Detailed drawings available on request. Other sizes available; call for quote.

# TDJ Company, Inc. Instrument Enclosures

**Available With or Without  
Handles**

**Easily Assembled**

**Sliding Top and Bottom  
Covers for Maximum  
Accessibility**

**Convenient Side Frame  
Mounting Hole Pattern**

**Will Accept Your Custom  
Removable Front and Rear  
Panels**

**Standard Colors-Black, Blue,  
Brown, Grey and Off-White**

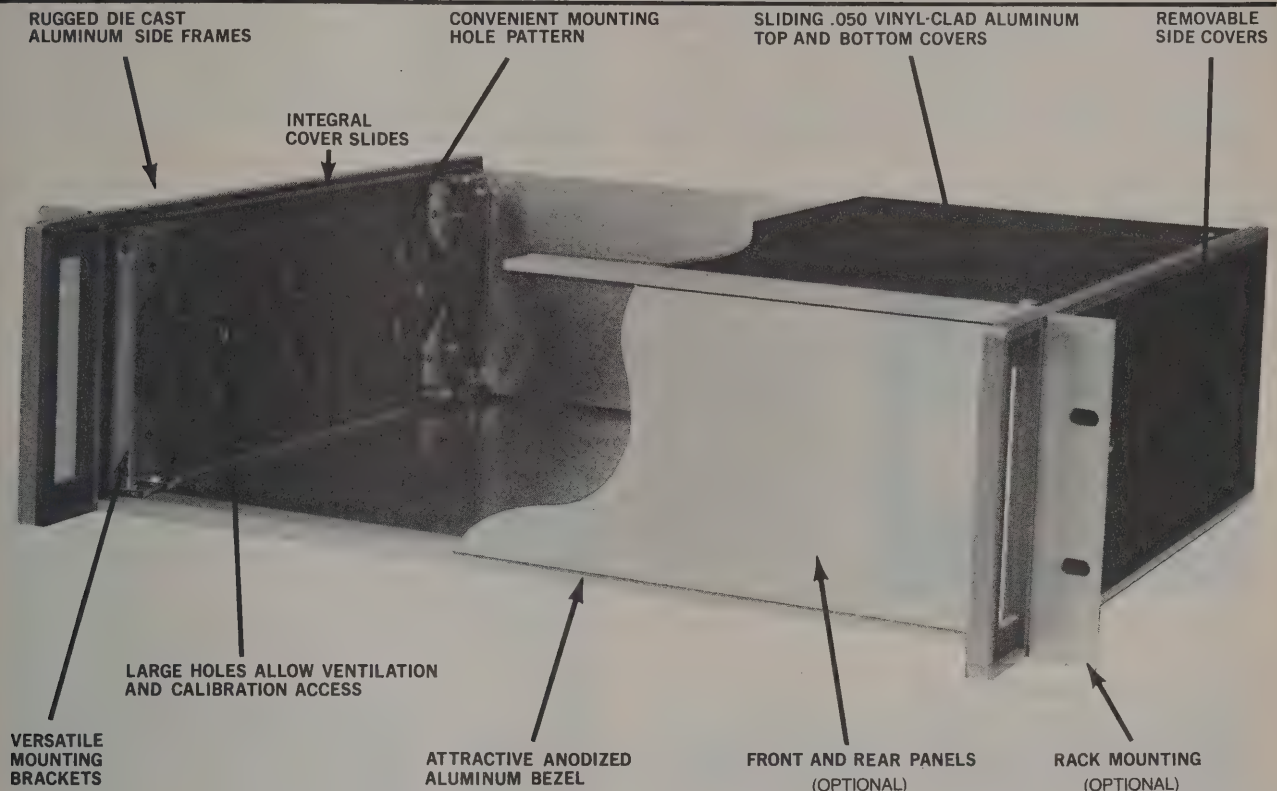

## **Modular Instrument Enclosures**

The BETA-LINE Series of Modular Instrument Enclosures offer the ultimate in quality and versatility and provide an extensive range of standard packaging dimensions. This flexible component approach offers a custom-designed appearance that permits expansion of a product line while maintaining the continuity of a design standard. The rugged die cast aluminum side frames are uniquely engineered to provide strength and durability and the top and bottom as well as the side covers are easily removed for quick internal access. The finished side frames and vinyl clad aluminum covers combine to produce a superbly crafted enclosure. Standard vinyl colors include black, blue, brown, grey and off white. A full complement of optional accessories include instrument bails, rack mounting kits, rack mounting slides and aluminum front or rear panels. A retractable instrument bail is available for bench mounting applications.

## Instrument Enclosures

Model number is determined by outside dimensions of enclosure. Example for Model **B-350-13-1700** is:

3.5 inches High  
13.0 inches Deep  
17.0 inches Wide

Add "H" to Model No. to indicate "With Handle"

| 3.5 Inch Height                                                                                                                                                                                                                      | 5.25 Inch Height                                                                                                                                                                                                                               | 7 Inch Height                                                                                                                                                                    | 8.75 Inch Height                                                                                                                                                  |

## SRK/CRK series

### Seven-eighths-spacing Rack-mounting Kits

Stocked for one-day shipping in your choice of 28 combinations of seven heights and four front-to-back depths, and with  $7/8$ " vertical and  $1/2$ " horizontal hole pattern, this SRK/CRK line of chassis drawers can be assembled in a vast variety of configurations without special hole drilling or punching. Double bends in side

frame flanges & heavy-duty aluminum materials make them extra sturdy. Order today, and they're on their way to you tomorrow! Phone toll-free number below and request your free full-color SRK/CRK catalog, which includes slides, card cages and many other mounting accessories.

### SRK Kits and Parts

A basic SRK kit is ordered by adding dash numbers for any of seven heights and four depths. The kit will consist of one FP Front Panel; two OSH Oval-Section Handles, [clear or black anodized]; two SF-SE Side Frames with Seven-eighths-inch [vert-spacing] hole pattern; two HMP Heavy-duty Mounting Panels [one for use as a rear panel, the other as an internal mounting panel];

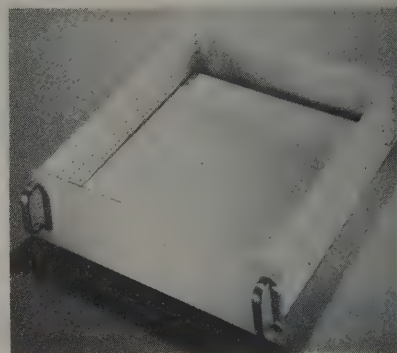

two PANC Perforated Aluminum Non-sliding Covers [top/bottom]; and all assembly hardware. Drop down front panels, card cages, full-bottom plates & thousands of other variations of parts and accessories can be ordered by adding dash numbers; or for even wider varieties & more combinations, order by individual part numbers from our complete inventory.

### CRK Kits and Parts

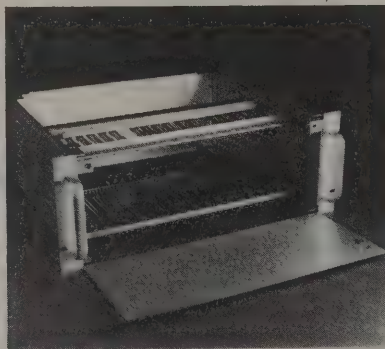

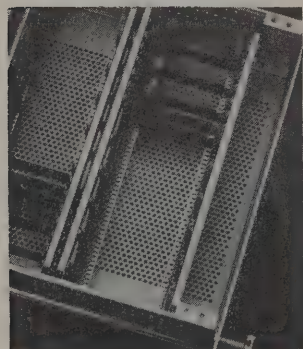

A basic CRK kit consists of one FP Front Panel, which like the SRK line is notched for assembling to tapped rails of rack; two OSH Oval Section Handles, clear anodized; two SF-SE Side Frames with Seven-eighths vert-spaced hole pattern; one HMP Heavy-Duty Mounting Panel [for use as rear panel]; one FBP Full-Bottom Plate for use as a chassis base, and cap-

tive nuts [pre-installed]. All parts except handles and covers are clear-chem-filmed [clear iridized]. All assembly hardware included.

As with the SRK line, thousands of options can be ordered by the use of dash numbers. For example, use kit number CRK-8H-15D to obtain the kit for the assembly shown at right.

### QCC Card Cage Kits and Parts

One of the most popular series of auxiliary parts of the SRK/CRK line are these QCC Quarter-inch Card Cage kits & parts with .25-inch pitch. They include connector rails which will accommodate almost any card connectors & backplanes, guide frames and snap-in card guides in your choice of three guide lengths: 3.15", 4.65" and 6.15". They assemble for front, back, top or bottom loading. Because the assembly method permits much variability, a large selection of card lengths and widths can be accommodated.

## BKCD series BasiKit Chassis Drawer

**We Are Proud to Introduce** the most recent member of the Techmar family of product lines: the BasiKit Chassis Drawer. This new enclosure line is the result of feedback from our customers, who have asked us to design a simpler and more economical packaging system. The BasiKit is just that, and more...it offers the same quality of design and materials, ease of assembly, strength and flexibility as all of our other products. And it is even less expensive, because we designed it to be exactly what it implies: BASIC. These sturdy aluminum kits include the standard EIA-notched, .125" thick horizontal-grained front panel; two side panels available from stock with or without rows of assembly holes, so you can either drill your own right

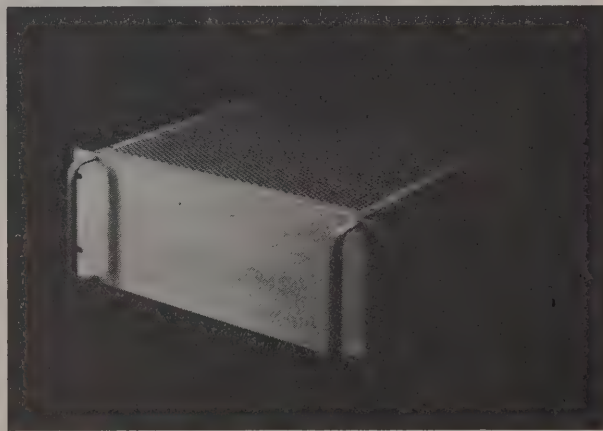

where you want them or utilize our pre-punched hole pattern; a rear panel of .090 thick heavy-duty alu-malloy, with no flanges (for easy machining) and with six mounting holes for assembly to side panels and covers for added stability; top and bottom covers are .063 thick alu-malloy, available from stock with or without an all-over perforated hole pattern—the solid cover is less expensive, and many customers prefer to punch their own slots or holes in the areas where cooling is needed. Extra sturdy .090 CHASSIS BASES (solid alu-malloy bottom plates) also available from stock. Each kit includes two satin-grained oval-section handles, finished in either clear or black anodize; they are cost-effective, functional and attractive. All kits and parts include assembly hardware.

**15 Combinations In Stock for Same or Next Day Shipping:** 3, 5, 7, 8 & 10" nom. heights; 12, 18 & 24" nom. depths.

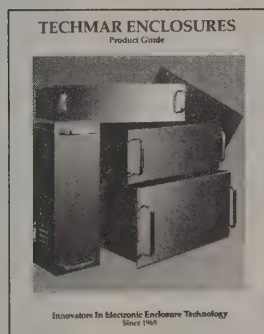

Kit shown above: **BK-7H-18D** with solid side panels (no assy. hole rows), solid top/bottom covers (no perforations), standard EIA front panel, heavy-duty rear panel (no flanges), & clear-anodized oval-section handles.

Kit shown at right: **BK-8H-24D-WHR-2PC** With Hole Rows in side panels, and Two Perforated Covers.

Or you may choose to **ORDER A LA CARTE** BY INDIVIDUAL PART NUMBERS for an even wider range of designs and configurations.

## VCD series

### Variable Chassis Drawer

**V for VARIABLE:** VCDs can be assembled into even more thousands of configurations than any of Techmar's previous widely used enclosure lines.

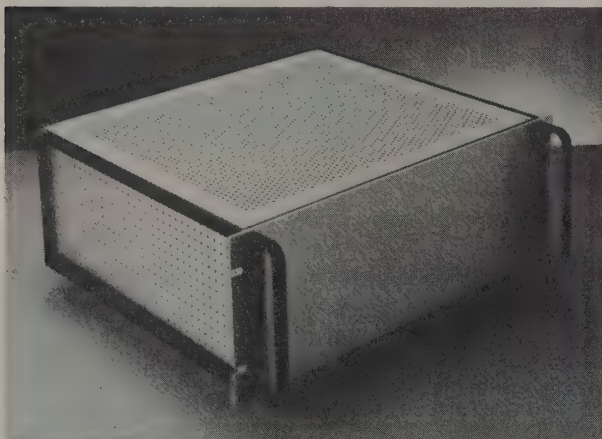

**CD for CHASSIS DRAWERS:** VCDs are for assembly in EIA racks and rack cabinets. Among many new design improvements:

- Assembly-hole pattern is on  $7/16$ " centers both vertically and horizontally,  $1/4$  of the EIA height increment.

**FOR YOUR CONVENIENCE:** This 90-degree symmetry allows you to mount card cages for front, rear, top or bottom loading, without having to drill special holes, while retaining Techmar's long-time previous hole pattern's advantage of regularizing the locatability of internal parts relative to

tops, bottoms & centers of your chassis drawers. And the new hole patterns give you the help of smaller pitches for locating internal parts.

- Your choice of color combinations: all clear (silver), clear/black or all black.
- You can machine your mounting surfaces in the flat before you assemble edge-stiffeners.
- Convertibility between VCD rackmount and VSA stand-alone models for benchtop applications. [see below].
- General purpose card cages, slides and many other mounting accessories available.

## VCD Kits

If you order a standard kit by height, depth and color but no other dash or dot numbers, you will receive the parts & hardware for an assembly which includes a 12-piece frame of extrusions, standard front panel, handles, structural side panels with assembly-hole pattern, top/bottom perforated covers, & outside back panel, all in whatever color combination you specify. By adding a dot SC, you also receive Side Covers to hide the assembly holes and screwheads on the side panels. Some of the thousands of other kit options ready for immediate shipment are shown in our catalog, including the much larger number of configurations that are available to you whether you choose to order as kits or as individual parts.

## VSA series

### Variable StandAlones

This is an exceptionally sturdy and decorative enclosure line for benchtop/desktop instrumentation. Its parts are the same as for a VCD kit of the same height, depth and colors, with the following exceptions: The front panel is normally 17 wide and recessed instead of 19 wide; handles are backed by spacers instead of panel ears; side covers & rubber feet are included; one-third perforated covers are standard unless otherwise specified. And as with the VCD line, you can choose from a large variety of options & accessories, including card cages & other internal mounting parts. Call the number below for free catalog and/or applications assistance.

**Features:** • Complete access to the backplane and power supply outputs • Forced air cooling permits boards to be tested under operating conditions • Front-mounted debounced reset and voltage indicator LEDs • Operates vertically and horizontally • Fully wired or tested

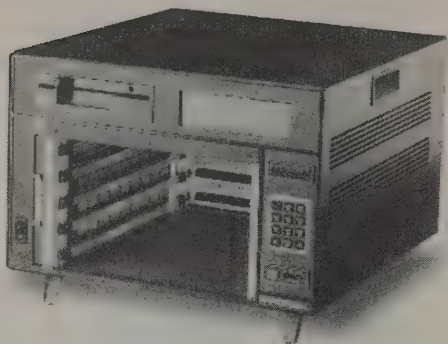

**T-FRAME™ High-Access Test Stand for VME, VXI and Multibus II***T-Frame VXI shown**T-Frame VME shown***United States Patent: Pending**

Available models:

**VXI:** 5 slot, C size with 750 watt power supply**VME:** 12 slot, 6U x 160mm and 9U x 400mm with 500 watt power supply**Multibus II:** 8 slot, 6U x 220mm with 500 watt power supply**Features:**

- Cutaway design eliminates the need for extender boards by offering unrestricted access to all areas of installed modules
- Front-mounted digital meters display the voltage and current to the backplane for each switch-selectable power supply output
- Sliding thermistor mounted above the card cage provides temperature readout above individual cards in the system to front panel display
- Concealed power supply and the use of bus bars allows full access to rear of backplane
- Heavy, skid-resistant base tilts and locks the frame at varying angles to elevate test points and improve viewing angles
- Removable translucent polycarbonate panels protect installed boards and the rear of the backplane
- Double-bolted profiles and heavy .250" aluminum side frames help ensure durability
- Built-in instrumentation and controls increase efficiency
- Null offset switch changes ammeter reading to include or exclude the current drawn by terminating resistor networks
- Airflow analysis is made possible by six fan speed settings: 50, 60, 70, 80, 90, and 100%
- Filtered, positive-pressure cooling is provided by two 82 CFM variable speed fans
- "MicroReset" module provides power-on reset, debounced reset switch, and indicates System Fail and power-on status
- The all-stripline 8 layer VME (10 layer VXI) backplane is individually tested and certified for low cross-talk and EMI emission
- High-current power supply with universal input, .99 power factor correction, power fail, and remote sense on the 5V output delivers 80A of 5V, 20A of +12V, and 20A of -12V (VME) (500 watt maximum combined)

**TRACEWELL****Design, Test and Development Systems****System 26 VMEbus  Multibus II PCAT**

System 26 VXI shown

**Features:**

Versatile package has one-piece top/sides that removes easily and allows complete access to the interior • Plenum-directed cooling works even with cover removed • Drive holders for two 5.25" half-heights, convenient cableway, and "MicroReset" debounced power-on and reset • Unique features include programmable interactive LCD analysis screen with built-in software, and modular power supply with active power factor correction, universal AC, and more.

**26-VME:** 7 slot, 6U x 160mm, 600 watt power supply.

**26-VXI:** 5 slot, C size, 600 watt power supply.

**26-Multibus II:** 8 slot, 6U x 220mm, 300 watt power supply. Accepts live insertion/20MHz enhancement.

**26-PC:** 8 slots for PC bus boards, 250 watt power supply.

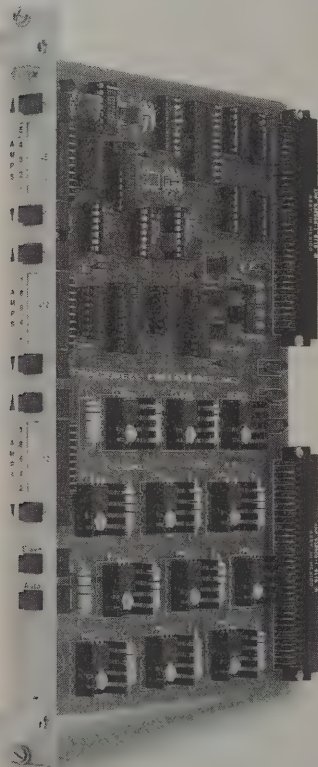

**Variable Current Load Board for VME & Multibus II****T-LOAD****Application:**

T-Load™ allows engineers to simulate and evaluate the operational environment of a VME or Multibus II® system design in a number of areas:

- **Evaluate Temperature** characteristics of the electronic packaging system design
- **Burn-in Cycles** can be automatically sequenced by establishing a master board
- **Measure voltage drops** in the backplane and wiring harnesses under various load conditions
- **Check power supply** specifications at changing loads for hold-up time, regulation, ripple, power factor, and efficiency
- **Simulate load conditions** without using expensive system boards for evaluation
- **Independent current readings** of each load board clearly displayed on LED bar graph

**Features:**

- **Active Load** allows current changes to be made while the system is powered thus eliminating the need to shut down the system to remove the board to make changes.
- **Current settings** are expressed on an LED bar graph and can be automatically sequenced or changed manually one step at a time.
- **Master/Slave Mode** is established by engaging or disengaging the slave buttons on the T-Load™ boards in the system (Only the slot 0 board can be a master) Boards without their slave button engaged remain independent and can be set-up individually.
- **Automatic cycle mode** is created by pressing the "Auto" button on the master board. Individual boards with their slave buttons active will follow the program of the master. The automatic mode can be changed to either a long burn-in cycle or quick demo routine by setting an internal switch on the master board.
- **Reset Capability** by the system reset will bring all boards to zero when activated. Each T-Load™ board has a reset switch for individual reset to zero.
- **Current Load** is set-up on the +5 volt in 1 amp steps (5 amp total) and on the +12 and -12 volt in .2 amp steps (total 1 amp each)

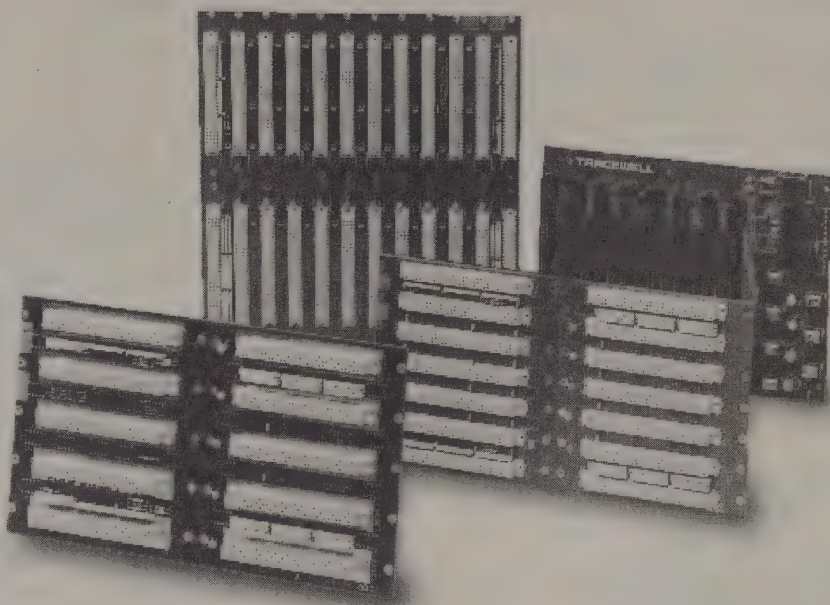

## Backplanes

# TRACEWELL

## VMEbus MultibusII PCAT

Tracewell offers a complete line of high-speed backplanes that are built to meet or exceed all current bus performance specifications. Our proprietary design provides exceptional signal integrity, low noise, and minimum EMI output --- all at an affordable price.

### Features:

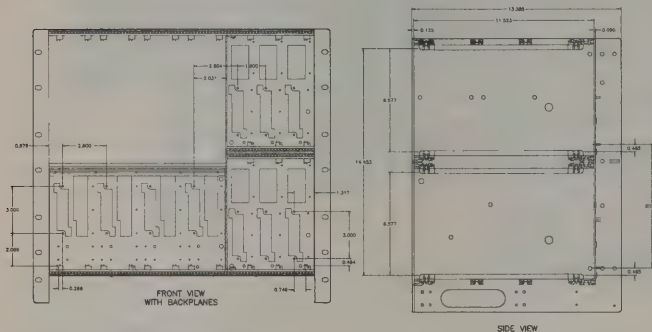

- 8 layer VME, 10 layer VXI all-stripline design
- Daisy chain jumper pins accessible front and rear
- Ground plane between outer layers, and true ground return planes adjacent to all signal layers for embedded RFI/EMI control
- Proprietary conformance testing on every unit at board level and on full backplane assembly
- All gas tight press fit assembly
- Bus bars on +5 VDC and ground are designed for clear access to rear of backplane and provide a 'clean' wire harness
- On-board signal termination for minimal reflection
- Decoupling capacitors at each slot; high pass (.01uF ceramic) low pass (22uF tantalum)
- Impedance: 73Ω unloaded, 55Ω with connectors loaded
- Propagation delay: 2.26 ns/ft
- Crosstalk 1.27mV (typical line)
- UL approved to Level 796
- Multiple Vcc and Gnd planes provide uniform power distribution (<.0078 voltage gradient 1-12 slots)

| Bus    | Type                   | Slots               |
|--------|------------------------|---------------------|
| VME    | J1/J2 Monolithic       | 5, 7, 9, 12, 15, 20 |

| PC     | ISA                    | 8                   |
| MB II  | J1 (PSB)               | 8                   |

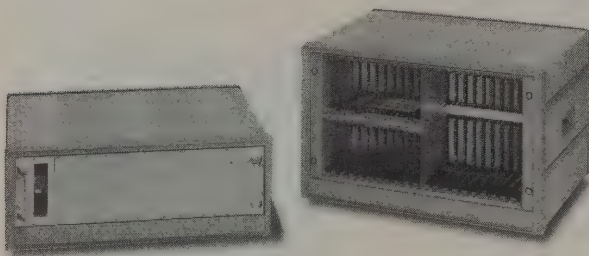

## Sub racks

Custom designed and built subracks constructed of heavy duty aluminum and double-bolted profiles to insure structural rigidity. Available in Eurocard form factor or designed to meet an application-specific requirement. Offered in a clear chromate finish, features include: power distribution, customized I/O, provisions for EMI suppression. Available in various depths and heights.

## E Series

### Desktop Enclosures for 19" Sub-Racks

All-aluminum construction for light weight, good heat dissipation, and superior shielding and grounding characteristics. Subracks may be mounted flush with the front or rear of the enclosure, or recessed to any depth.

**Sizes.** Available in 3U (5.25"), 6U (10.50"), and 9U (15.75") heights, and in standard depths of 12", 16", and 21" (other depths may be ordered).

**Standard Components.** Solid top and bottom covers, side panels with recessed handles, rear panel, pull-down feet, internal mounting rails, and EIA mounting hardware.

**Options:** Vented top and bottom covers, fan tray holding up to nine 1" thick fans, air filter removable from bottom, aluminum or translucent plastic front cover panel, rear I/O panels, support rails, grounding kit, and recessed mounting frames.

## CH Series

### 19" Rack-Mount

Heavy duty aluminum chassis enclosures with precision die cast handles that act as both structural members and as EIA mounting brackets. Panels remove easily while leaving the sub-assembly intact.

**Sizes.** Heights are 1U (1.75"), 2U (3.50"), 3U (5.25"), 4U (7.00"), and 5U (8.75"). Standard depths are 12" and 19", with custom depths available.

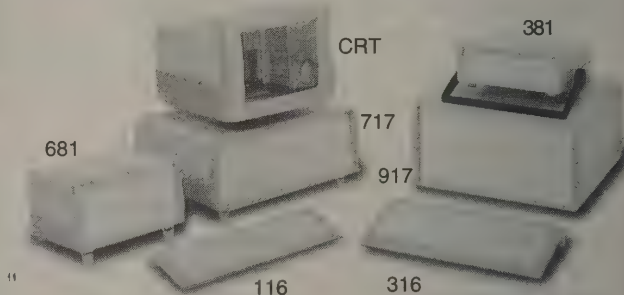

**Standard Components.** Solid top and bottom covers, die cast handles, punched sides, front and rear panels, mounting rails, and assembly hardware.

**Options.** Ventilated covers, horizontal and vertical mounting plates, and slides for rack mounting.

## NC Series

### Molded Plastic Systems Enclosures

Durable, attractive enclosures are injection molded in glass-filled polycarbonate, and finished in mar-resistant textured polyurethane. Optional EMI shielding available.

**NC917.** Holds 12" CRT, two 5 1/4" disk drives, power supply, and 5U card cage. Also accepts 19" components.

**NC717.** Accepts 9" CRT, one disk drive, power supply, and 4U card cage. Also holds 19" hardware.

**NC681.** For 7" CRT and one disk drive or power supply.

**NC381.** Accommodates 5" CRT and 3 1/2" disk drive.

**CRT.** Sized for 14" or 15" chassis- or kit-mounted CRTs.

**NC316.** 7-row full travel keyboard.

**NC116.** 5-row low profile keyboard.

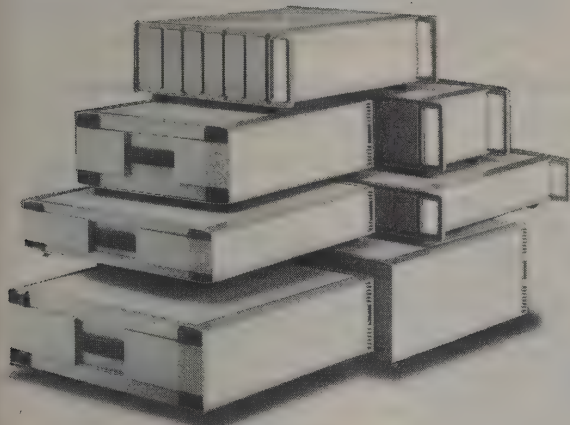

## Enclosures

# TRACEWELL

### R/SR Series

#### Full and Half Rack Enclosures

All-aluminum enclosures feature die cast sides for super rigidity. R Series has integral front handles; SR Series has retractable side handles. Unique front bezel design conceals fasteners, yet provides easy access to interior.

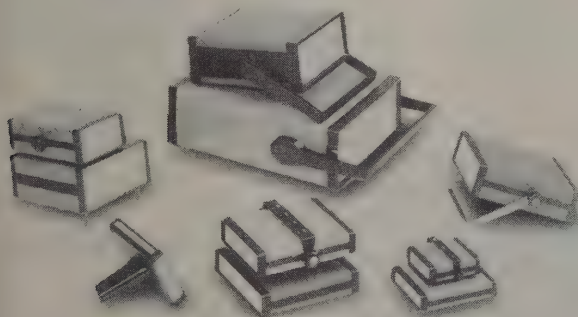

**SR Sizes:** 8.59" and 17.20" widths standard (custom widths available), 2U (3.50"), 3U (5.25"), and 4U (7.00") heights, and 12" and 16" depths. **R Sizes:** Same as SR except not available in 4U height or 16" depth.

**Standard Components:** Solid top and bottom covers, die cast sides, front and rear panels, bezels, and mounting rails.

**Options:** Vented covers, pull-down feet, EIA brackets.

### L/SL Series

#### Small Aluminum Enclosures

Ideal for bench/portable applications. Side extrusions have built-in slots for PC boards and plates. Vinyl clad top and bottom are easily removable.

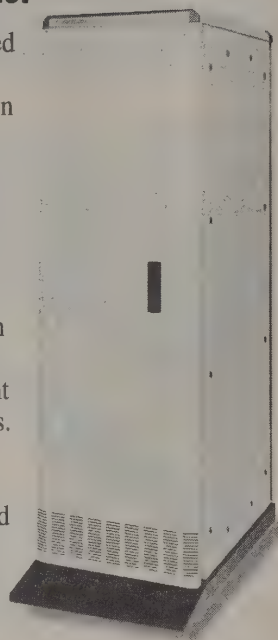

**Sizes.** Nine sizes from 2.70"w x .98"h x 3.70"d to 11.34"w x 4.32"h x 10.00"d.

**Standard Components.** Solid top and bottom covers, side extrusions, front and rear panels, bezels, and mounting rails.

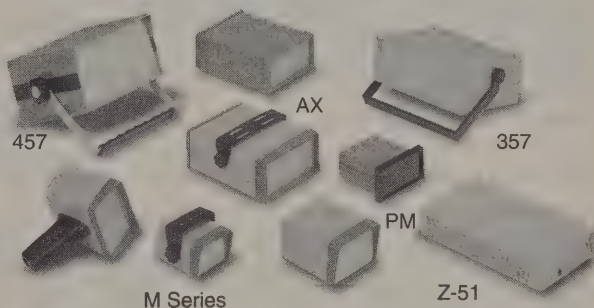

**Options.** Vented covers, handles, mounting bracket, and belt clip.

### EMI Shielded 19" Cabinet

Elegantly styled with contoured panels and identification header. Aluminum construction for light weight. Choice of copper finger stock or braided mesh gasketing, depending on desired attenuation level. Multiple side latches and rack and pinion door handles increase EMI integrity through uniform gasket compression. Base features tip-resistant front extension, casters, and levelers. Options include fans, removable air filter, ganging and grounding kits, and customized power distribution panel. Available in EIA standard heights and variable depths.

### Other Enclosures

**357/457.** Molded-in card grooves, horizontal mounting bosses, vented bottom. 7.50"w x 3.00/4.00"h x 6.50"d.

**AX.** Two-piece extruded aluminum housing, front & rear panels and plastic bezels. 5.50"w x 2.50"h x 6.00"d\*.

**Z-51.** One-piece extruded aluminum housing, front & rear panels and plastic bezels. 5.88"w x 1.75" h x 7.25"d\*.

**M.** Housing is .050" deep drawn aluminum. Plastic front bezel and aluminum front panel. 3.00"w x 2.00"h x 3.25"d and 4.00"w x 2.50"h x 4.00"d.

**PM31.** Extruded aluminum housing, rear panel. Plastic bezel with red Lexan filter. 3.60"w x 1.75" h x 3.31"d\*.

\* Other lengths available on special order.

**UNITRACK®****P.C. CARD GUIDES****NEW LOCATION...  
NEW PHONE NUMBER****UNITRACK INDUSTRIES INC.**

**PLASTIC****METAL****VIBRATION and SHOCK  
DAMPING P.C. CARD  
GUIDES**

Cantilever springs grip cards firmly. Spring gripping action prevents looseness which often results from board warpage or thickness variations.

Cools card and card components efficiently. Free flow of air through open area design.

Dampens severe vibrations up to 2000 cps without adverse effect to the cards or components.

Dimensional stability and strength provided by Polycarbonate resin under pressures of up to 2000 psi.

Polycarbonate resin virtually unaffected by moisture or humidity. Performs at temperatures ranging from -60° to +250°F without degradation of elasticity, strength or other physical properties.

No other p.c. card guides offer the features of Unitrack. Precision molded of dimensionally stable polycarbonate... complete line of sizes... snap-in buttons or countersunk holes for easy, quick mounting... free air flow thru card guide... vibration and shock damping with viscoelastic fingers gripping p.c. card.

**ESD GUIDES (Electrostatic discharge)**

All sizes of Unitrack card guides are molded in conductive plastic for users who need protection against damage to static susceptible devices.

Chart below gives part numbers and sizes of Unitrack Vibration and Shock Damping card guides.

**FOR GROUNDING OR  
HEAT DISSIPATION****Open Style****Track Style**

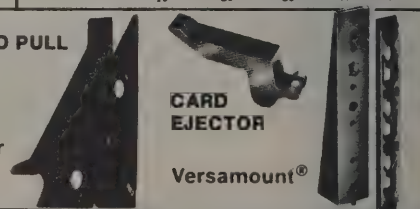

For p.c. card applications requiring grounding or heat dissipation (p.c. card - to guide - to chassis). Metal card guides are the solution. Choice of beryllium copper, stainless steel or phosphor bronze is available formed in the spring fingered action. Both open or track styles offer excellent electrical conductivity and good heat transfer.

**KOOLER GUIDE® - THE  
HEAT SINK CARD GUIDE!**

The metal spring fingers press the p.c. card against the aluminum track the full length of the guide for heat dissipation (see chart below). Available in beryllium copper, stainless steel and phosphor bronze and in mounting styles which provide intimate contact of the guide to chassis. For cards .040 to .095 thick to any length.

**Accessories:**

Both card pulls and ejectors are available in 10 colors for circuitry identification. Versamount for mounting isolated cards on chassis or mother boards.

**CARD PULL****CARD  
EJECTOR****Versamount®**

## FAN-PAK® 3120

**YOUR BEST BUY.**  
*Famous Unitrack quality  
in a high volume unit!*

**\$99.00**  
complete

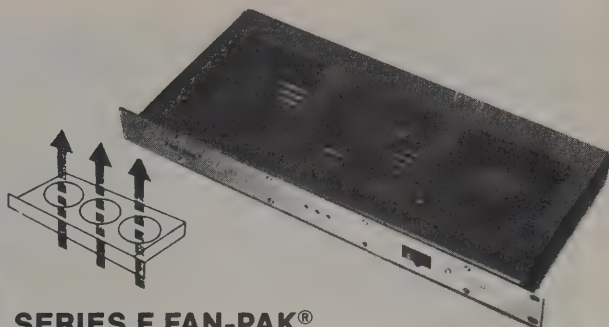

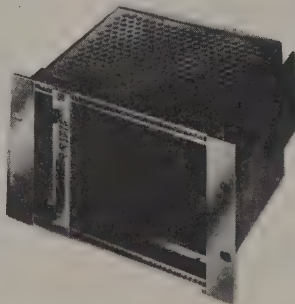

Ready to plug in.  
Power cord included.  
Stock these and get  
this great quantity  
discount!\*

\*\$123.75 in single units.

Here is the cooling package priced for high volume users! Fan-Pak 3120 has three fans each delivering 100 cfm air. Packaged in 1U (1¾") high sturdy, clear finish aluminum case to be used in 19" cabinetry. The front panel has a lighted OFF/ON switch and fuse holder. Back panel has AC receptacle for power cable and a switchable socket to supply power for companion equipment when fans are ON. Ready for immediate shipment from stock!

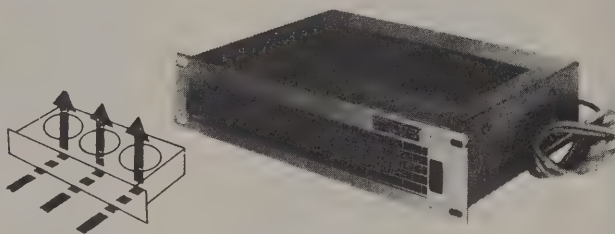

## SUBRACK 90 VME™

The Subrack 90 VME was developed for those using Eurocard based systems and VME bus systems. The basic Subrack 90 VME is available for single or double high boards, 3U to 9U heights and up to 84 HP width. The variations such as divided subracks for 3U and 6U cards in the same subrack, hinged or fixed front panels, top, bottom and back panels, insulator strip, etc., are available. Subrack 90 VME uses attractive brushed aluminum finish parts that are sturdy, accurately punched, drilled and tapped. Subrack 90 VME is available assembled or unassembled.

## SERIES F FAN-PAK®

These Fan-Paks are one U height (1¾") compact, sturdy clear finished aluminum holding rows of three fans (up to 12) which can be rack mounted into standard 19" or 24" cabinetry. The fans each deliver 100 cfm air for cooling and are usually mounted below the p.c. cards to move air up and around the cards. Standard package includes replaceable fuse and 6' line cord or terminal block. Options available are: pilot light, power switch, Fan Alarm™ circuit, filter and silk screening panel legend.

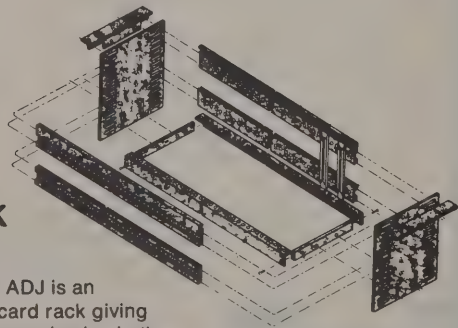

## SERIES RA FAN-PAK®

The Series RA Fan-Pak draws air through the front grill with one, two or three 100 cfm quiet, long-life fans. This type of cooling is especially useful when the p.c. card cage is isolated from the flow of cabinet cooling. The RA Fan-Pak is also available as an integral part of a standard or special Unitrack card cage. The options for Series F (above) are available with this series also.

## SUBRACK 90 ADJ

The Subrack 90 ADJ is an adjustable p.c. card rack giving great flexibility to packaging both large and small p.c. cards. Subrack 90 ADJ is designed for quick, easy assembly and sold unassembled (also available assembled) with all parts also available separately. Subrack 90 ADJ fits 19" cabinetry or can be used as a stand-alone rack.

Unitrack also manufactures special card cages to meet customer requirements. Mail or fax drawings... we'll promptly respond with a quote. Unitrack has a line of card cages for Multibus I & II, STD bus and for other bus systems. Consult factory for details.

## SYSTEM ENCLOSURES • CARD CAGES • COMPONENTS

### System Enclosures

#### The Omega

- Table top, Rack Mount, or DeskMate™ configurations.
- 3-14 Slots, VME or 4-18 Slots Multibus.
- Up to 1000 Watts.
- Front, Rear, or Top Card Loading with Many Peripheral Mounting Options.
- UL Listed, CSA Certified, and GS Approved through TUV Certification.
- Designed to Meet FCC Class A EMI/RFI.

#### The Volksclosure

- Table top configurations.
- 6 Slots, VME Multibus II.
- 190 or 270 Watts.
- Front Card Loading and Accepts up to 3 Half-Height 5 1/4" Peripherals.
- UL and CSA Recognized.
- Designed to Meet FCC Class A EMI/RFI.

#### The MaxChassis II

- Table top, or Rack Mount configurations.
- 12 or 20 Slots VME or Multibus II.
- Up to 1000 Watts.
- Front Card Loading, Accepts up to 4 Half-Height 5 1/4" Peripherals and a Variety of Peripheral Mounting Adapters.
- UL Listed, CSA Certified, and GS Approved through TUV Certification.
- Designed to Meet FCC Class A EMI/RFI.

#### The Epsilon

- Table top configurations.
- 3 Slots VME.
- 175 Watts (Auto ranging).
- Front Card Loading, Accepts up to 2 Half-Height 5 1/4" or 3 1/2" Peripherals and up to 6 Motorola Transition Cards.
- UL Recognized and CSA Certified.
- Designed to Meet FCC Class B and VDE 0871/6, 78 Class B EMI/RFI.

Whether you're looking for a standard package, off-the-shelf or something designed from the ground up to meet your specific application, Electronic Solutions is the manufacturer of choice. We have a broad array of standard system enclosures to meet a variety of packaging requirements. Yet less than 20% of the enclosures we ship are found among them. That's because we modify the vast majority of our products to meet our customers' requirements - from custom paint or silk screening to entirely new concepts in system packaging. In order to meet these requirements, we have the ability to perform backplane design analysis, empirical backplane tests, safety agency approvals (most of our enclosures are UL Listed, CSA Certified, and GS Approved through TUV Certification), airflow analysis, EMI/RFI testing - and many other capabilities. Standard enclosures include:

#### The TeleChassis

- Bellcore NEBS Rack Mount configurations.
- 20 Slots VME.
- 150 Watts accepts telecommunications -48Vdc input.
- Front Card Loading and Accepts a Variety of Peripheral Mounting Adapters.

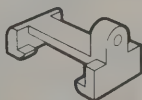

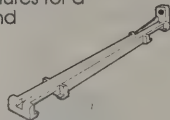

### Card Cage Components

Build your own card cage from these five basic parts - card guides, mounting bars, spacers, mounting feet and end plates. Thousands of possible combinations can be assembled.

All items can be color coded (12 colors) and/or hot ID stamped. Ask for the "Here's How" and "Snap File Card Mounting System" brochures for a complete description and ordering guide.

#### Card Guides

The patented "T" series guides have integral connector mounting feet or are available as Thru-Guides for separate connector mounting components. Lengths 2.750" to 12.815". Also Snap-in Guides 2.500" to 12.000".

#### Connector Mounting

Thru-hole or with 4-40 threaded brass or stainless steel inserts. Available as "A" Series nylon mounting feet that slide on mounting bars, or as a connector mounting bar for high insertion force connectors.

#### Mounting Bars

For "T" Series Guides and "A" Series mounting feet, up to 24" length, for single and multiple card rows. For Snap-in guides mounting bars are pre-punched with .5, .6, .7 or .75" centers. 17" length standard, but can be cut to length.

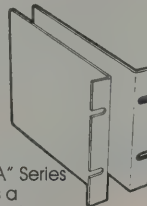

#### Spacers

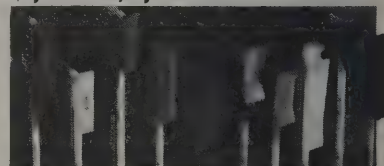

Adjust the nominal .500" width of "T" Series card guides to your card spacing. Spacers 0.031" to 1.000" for card spacing 0.531" to 1.500".

#### Endplates

Mate with mounting bars and provide ears for rack or panel mounting. Heights 5.22" to 17.47", depths 8.25" to 11.25".

### Injectors/Ejectors

Electronic Solutions circuit card ejectors fit virtually all card support systems. They easily attach by means of roll pins to cards either 0.062" or 0.093" thickness, and operate by lever action against the card guide or mounting bar.

Styles:

- S-200 Single action, .375" wide
- S-202 Slim line single action, .250" wide
- S-203 Low profile (.125") single action
- S-205 Single action, offset
- S-206 Locking ejector for "T" series guides
- S-208 Low Profile tabbed
- S-209 Double action injector/ejector
- S-211 Single action, medium length
- S-212 Single action, for larger cards
- S-213 Ultra long for maximum leverage
- S-214 Double action for sheet metal cage
- S-216 E-Z-Ject VME panel ejector
- S-217 Eurocard injector/ejector

## SYSTEM ENCLOSURES • CARD CAGES • COMPONENTS

### Peripheral Modules

Here is a convenient and cost effective way to add disk/tape drives or other 5 1/4" peripherals to your Eurocard system. The peripheral modules mount directly in 6U 12-slot Vertical Rack Mount VME or Multibus II card cages.

| Disk drive slots                          | Part No. |
|-------------------------------------------|----------|
| 4 half-height (or 2 full height)          | 32013-1  |
| 3 half-height (or 1 full & 1 half height) | 32013-2  |
| 2 half-height                             | 32013-3  |

### E-Z-JECT VME Ejectors and Panels

The E-Z-Ject™ has become the industry standard ejector for VMEbus boards, providing a quick and easy

method of removal from Eurocard format card cages. The standard E-Z-Ject front panel assembly includes the front panel, the handle(s) and the corresponding hardware. Custom panel labeling as well as custom ID panels for E-Z-Ject handles are readily available.

| Size                     | Part No.    |           |
|--------------------------|-------------|-----------|
|                          | Unassembled | Assembled |
| 3U x 4HP                 | 32025       | 32005     |
| 6U x 4HP (lower bracket) | 32030       | 32010     |
| 6U x 4HP (upper bracket) | 32028       | 32027     |
| 6U x 8HP (std.)          | 32094       | 32091     |
| 6U x 8HP (wire wrap)     | 32152       | 32011     |
| 9U x 4HP                 | 32035       | 32014     |
| 9U x 8HP (wire wrap)     | 32153       | 32128     |
| 9U x 8HP (deep comp.)    | 32226       | 32186     |

**Component Kits — without front panel**  
Includes handle(s), I.D. plates, bracket(s), and corresponding hardware:

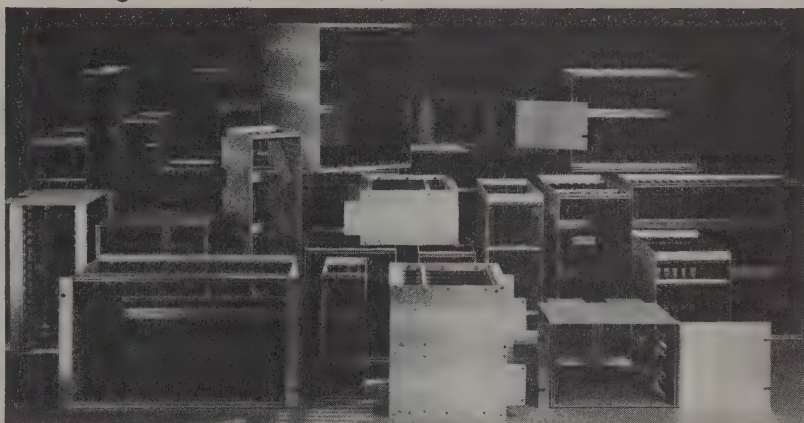

| Size     | Part No. |
|----------|----------|
| 3U x 4HP | S216-311 |
| 6U x 4HP | S216-611 |
| 9U x 4HP | S216-911 |

**Eurocard (VME) Filler Panels**  
Filler panels are prepunched, anodized, vertical grained, .090" thick aluminum covers that fasten to card cage extrusions to cover openings in the front of a card cage. Mounting hardware is included, but not handles.

Include both main part no. for height, dash no. for width

| Height/Part no. | Width/dash no. |             |
|-----------------|----------------|-------------|
| 3U 32145-       | 2HP            | -01 6HP -14 |
| 6U 32146        | 3HP            | -02 8HP -11 |
| 9U 32251-       | 4HP            | -03         |

### Card Cages - VME / Multibus / Eurocard

All Electronic Solutions' Card Cages are fully assembled and tested.

Electronic Solution's Eurocard cages come in hundreds of combinations from 3U to 9U heights, 100mm to 400mm depths, and from 3 to 21 slots. Universal mount, vertical rack mount and horizontal rack mount are available.

For VMEbus or Multibus II, high quality J1 backplanes are installed and tested — J2 backplanes are optional.

#### Universal Mount

For use inside enclosures, equipment drawers, towers and subsystems. End plates have captive fasteners for easy installation.

#### VME

3Ux160mm: 9, 12, 16, 20 slots  
6Ux160mm: 3, 5, 7, 9, 12, 16, 20, 21 slots  
9Ux400mm: 12, 16, 20 slots

#### Multibus II

6Ux220mm: 3, 5, 7, 9, 12, 16, 20 slots

#### Vertical Rack Mount

Standard 19" rack mounting unit with cards vertically oriented.

#### VME

3Ux160mm: 9, 12, 16, 20 slots  
6Ux160mm: 9, 12, 16, 20, 21 slots  
9Ux400mm: 12, 16, 20 slots

#### Multibus II

6Ux220mm: 9, 12, 16, 20 slots

#### Horizontal Rack Mount

Save rack space on cages with 9 slots or less.

#### VME

6Ux160mm: 3, 5, 7, 9 slots

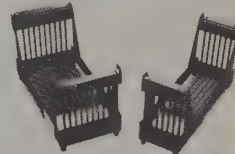

#### Multibus II

6Ux220mm: 3, 5, 7, 9 slots

#### Accessories

Center adapter 60475-01 divides a 6Ux160 slot into two 3U slots. Fans, covers, J2 and J1/J2 monolithic backplanes are all available.

### Multibus I

The MICRO-FILE™ line of Multibus cages is available with 4 to 26 slots, with or without low noise backplanes, and in universal mount, vertical rack mount or horizontal rack mount.

#### Standard Mounting

0.60" Card Centers: 4, 5, 6, 8, 9, 10, 12, 13, 14, 15, 16, 20, 24 or 26 slots.  
0.75" Card Centers: 3, 4, 5, 7, 9, 12, 16, or 21 slots.  
4- or 9-slot versions available with female bus extension on connector.

#### Vertical Rack Mount

0.60" Card Centers: 12, 14, 15, 16, 20, 24 or 26 slots.  
0.75" Card Centers: 12, 16, or 21 slots.  
Rack Height 15.72" on all vertical rack mount cages.

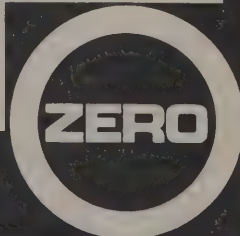

#### Horizontal Rack Mount

0.60" Card Centers: 4, 5, 6, 8, 9, 10, 12, 14, or 15 slots.  
0.75" Card Centers: 3, 4, 5, 7, 9, or 12 slots.  
Rack Height ranges from 3.47" to 10.47".  
See our catalog for details.

### EPOCH 2000

### ZERO CABINETS INTRODUCES EPOCH 2000

A unique modular system that allows you to design cabinet assemblies to meet your special needs. The strong visual appearance of the **EPOCH 2000** reflects quality, enhances systems integration and reinforces the high technology trend combining form and function. The sculptured appearance with soft edges marks a

significant step forward in the styling of computer and electronic cabinets.

With over 35 years of extensive manufacturing experience we have designed the **EPOCH 2000** to meet the highest standard of precision and for maximum flexibility requested by our valued customer.

## ZERO MATRIX IV SERIES 101 & 404

### Heavy Duty Commercial Cabinet

Modularized **Series 101** cabinets are the most flexible models in the Matrix IV line. Their wide-open design provides access on both sides, front, and back. Instruments are easy to install and simple to service. Series 101 units are easily expanded from one to two or more bays—you simply bolt them together.

The standard Series 101 includes a basic frame, two lift-off side panels, your choice of flush or pagoda top, a surface-mounted auxiliary hinged rear door with magnetic latch, four leveling feet, and two mounting rails. Extra sets of mounting rails are available as an option.

Side panels and rear doors are painted with a light beige baked, textured finish. Tops and frame are black. Other colors are available on special order.

In quantity orders, **Series 404** is the most economical Matrix IV cabinet and is ideally suited to applications that do not require lateral enclosure access. For high strength and rigidity, the space-saving Series 404 uses side panels that function as stationary frame members.

The standard Series 404 cabinets consist of a basic frame, your choice of a flush or pagoda top, a surface-mounted auxiliary hinged rear door with magnetic latch, four leveling feet, and two mounting rails. Extra sets of mounting rails are available as an option.

Cabinet frame and top are painted black. Rear door is painted with a light beige baked, textured finish. Other colors are available on special order.

#### For reference only:

approximate weight:

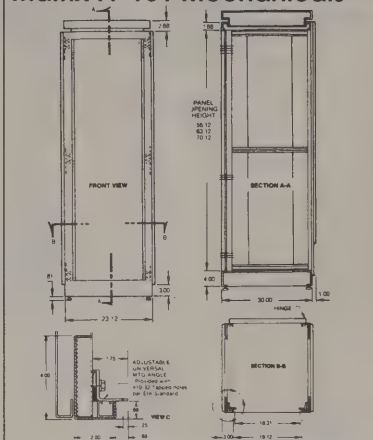

|             |          |
|-------------|----------|
| 56" cabinet | 232 lbs. |
| 63" cabinet | 245 lbs. |
| 70" cabinet | 258 lbs. |

Mounting angles are 12 GA. steel. Drilled and tapped for #10-32 screw to E.I.A. Standard hold pattern.

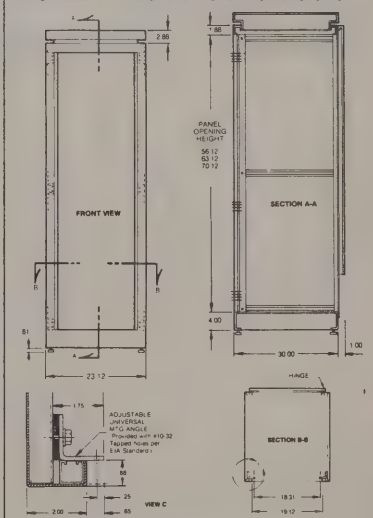

#### Standard Finish:

Painted with minimum 2 mils of polyester coating. Hardware, including 10-32 tapped mounting angles, are plated. Matrix IV cabinets come with your choice of top styles. The flush-mounted top is ideal for applications where overhead clearances may be a problem. Pagoda tops provide an interesting styling alternative and the functional benefits of an integral cooling pattern. (Vent holes on underside.)

# ZERO ALUMA-TRAK® CHASSIS SLIDES

### Tilt-Type/Quick Disconnect Slide Locks in Extended Position

### Non-Tilt/Quick Disconnect Slide Locks in Extended Position

14 GA. Steel Cad. Plate  
Our quick mounting bracket is an exclusive design that makes it easy and quick to mount all Zero ALUMA-TRAK slides. It is designed so that slides can be mounted to compensate for rack misalignment. The reverse channel on the bracket eliminates fumbling and time lost in securing the slide cabinet section to the cabinet rails. Slides can be mounted from either the front or rear of the cabinet, thus providing easiest access.

.25 x .50 mounting slots, 4 places.  
Allow installation tolerance on  
cabinet and chassis width. No  
shims required.
